Dear Mr. Johnson,

I am writing you in reference to Permit to Appropriate Water # 65-13366. Specifically with regards to item # 4 under conditions/remarks.

I request that this condition be waived. The system which I have devised depends upon capturing a small amount of water in a PVC pipe laid in the creek some distance upstream and at such a height that the natural fall of the creek gives adequate volume and gravity pressure to run 2 to 3 rainbird type sprinklers. I have secured a permit from Idaho Department of Lands to place this pipe in the stream and run the pipe over state land to the cabin site

The sole purpose of the system is to provide adequate water to the conifer trees on the property to deter beetle and larva infestation and to keep the natural ground cover in a moist and green condition to serve as a ground fire retardant. This system would only be used during the summer and early fall and only once to twice per month. The requirement to place a metering and lockable device would add substantially to its cost. Controlling water usage by the watermaster would be as simple as removing the main line plastic pipe. My agreement with the Dept. of Lands specialist, Mr. Timothy C. Duffner is to utilize a simple system which will be non-invasive and protect the watershed environment to the greatest extent possible.

I would appreciate your giving approval to this request

Sincerely,
William P. Hussman

PROOF DUE NOTICE

RE: PERMIT NO. 65-13366

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before October 1, 1994. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

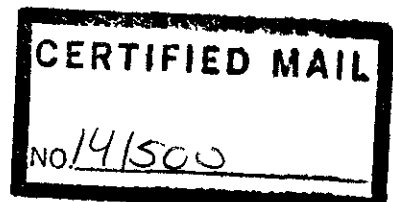

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

JULIE L. YARBROUGH
Senior Secretary

I redrew your red marked square to show more clearly pipes & point of use. Nothing I had marked clearly over the dark tree area.

Pipe is in stream bed & then angles North over small North clearing to 1 acre lot - splitting & going down back side. Lot is on South edge of this clearing.

I have talked to the McColl State Forester. He said he would give either a right of way or a temp. permit. We will meet on the site when the snow clears and access is good. Probably this will be May-June.
