E. NARRATIVE/REMARKS/COMMENTS

OVERLAPS - P/D - Same QR, different source.

Neighbor, McCormick - 65-13354

P/U - Same QR, different areas of use.

Water from a 10' deep dug out depression around spring, is pumped out by a 2 h.p. Red Jacket pump to a 2" main distribution line. The line then forks and reduces to 1 1/4". Lines continue to reduce to 1" and finally to 1/2". The irrigation system is all underground with pop up nozzles. Since flow was immeasurable, used theoretical calculation. The pump is oversized, thus the theoretical calculation is much larger than the needed flow for less than 1/2 acre. Therefore, recommend Licensing for 0.20 CFS as requested on permit.

$$Q(\text{Theoretical}) = \frac{(8.8)(0.7)(2)}{(2.31 \times 20) + 15} = 0.20 \text{ CFS}$$

NOTE: P/D & P/U are located in NENE, not the SENE of Section 16, T.16N, R3E.

Re: Permit No. 65-13353

Dear Permit Holder:

Returned is the proof of beneficial use you submitted in connection with the above referenced permit.

The Department has determined, from pertinent sections of the Idaho Code, that the permit holder must meet two requirements in order to be exempt from the license exam fee. They are:

1. The water right must use a groundwater source.
2. The rate of diversion must be .04 cfs or less.

As you can see, you do not meet requirement #1 since you use a spring for your source. Therefore, a license examination fee of \$50 applies to your permit. I have enclosed a copy of the Instruction for the Proof of Beneficial Use for your convenience.

Please return the proof of beneficial use and the \$50 license exam fee as soon as possible.

If you have any questions or if I can be of any further assistance, please feel to contact me.

Sincerely,

Karen L. Gustafson
