Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

Sincerely,

JIM JOHNSON

Mr. or Mrs. Hodges:

Our office has received and I have reviewed your Application for Permit for a water right. You have an alternate filing option available that may adjust your date of priority back to 1977.

Through the Snake River Basin Adjudication procedure, all beneficial water uses in place before 1987 may be claimed based upon the date of their first use. Although there are some limiting factors in your area, your date through adjudication may still be able to be adjusted as far back as 1977.

If you are interested in knowing more about your option, please call me at 334-2190 and I will be happy to explain the facts. Your benefit in filing an adjudication claim versus a new claim is a priority date of 1977 rather than 1990. Either claim will give you a valid water right.

Please call me within 10 days of the date of this letter if you are interested in filing differently. If I do not hear from you, I will process the your original application in a normal fashion.

Sincerely,

Cindy Hodges
Water Resource Agent
