TRANSFER NO. 5280
WATER RIGHT NO(S). 65-07545/65-13294

CONDITIONS OF APPROVAL AND REMARKS

1. Right holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code.
2. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 3.5 afa per acre at the field headgate for irrigation of the lands above.
3. The right holder shall accomplish the change authorized by this transfer within one (1) year of the date of this approval.
4. Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
5. Prior to diversion of water under this approval, the right holder shall provide a means of measurement acceptable to the Department from all authorized points of diversion which will allow determination of the total rate of diversion.
- * 6. The total instantaneous diversion of water from all points of diversion under Transfer 5280 shall not exceed 0.20 cfs, nor a total combined annual volume of 59.4 af.
- * 7. Right 65-13294 when combined with Right 65-07545 shall not exceed a total combined diversion rate of 0.20 cfs.
8. The quantity of water decreed for Right 65-07545 is not a determination of historical beneficial use.
9. The quantity of water under Right 65-07545 shall not exceed 13,000 gallons per day.
10. Two points of diversion are located within SWSW, S23, T09N, R04E.
11. Domestic use under Right 65-07545 is for 5 homes.
12. Domestic use under Right 65-13294 is for 36 homes.

CONDITIONS OF APPROVAL AND REMARKS

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount that can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.

MEMORANDUM

TO: Files 65-07545 & 65-13294

FROM: Pam Skaggs/^{JS}State Office

SUBJECT: Transfer 5280

DATE: July 29, 1998

Transfer 5280 adds a second point of diversion under Right 65-07545 and 65-13294 to meet DEQ requirements.

These rights serve the domestic and irrigation uses of the subdivision. Right 65-07545 has been recommended in the SRBA and Right 65-13294 does not require a SRBA Claim. The transfer approval is based on the recommended AJ and licensed records.

Recommended conditions include drilling permit requirements, irrigation overlap, multiple points of diversion/measuring devices, domestic use limits, combined right limits and standard transfer conditions.

Enclosure

AUG 09 1996

MEMORANDUM

TO: File 65-13294

FROM: Sharla

DATE: July 9, 1996

RE: Recommendation Adjustment(s)

In a telephone conversation on this date with Arthur Longstreet, he supplied information in response to Brenda Chapman's questions raised in her 1/31/95 letter.

According to Mr. Longstreet, a 20 hp pump was never intended; originally a 15 hp pump was planned for the diversion system. Then a 3 hp pump was decided upon by the president of Garden Valley Ranchettes Inc. based on an engineering evaluation of what they would need to supply 41 homes. There is only the one well and the pump is 3 hp. The system was stubbed to all 41 lots back in 1974-75 when the subdivision was formed. The field examination conducted on 65-07545 from the same system indicated a 20 hp pump and the measurement taken with a McCrometer flow meter was 100 gpm. The license issued on that permit was for the entire 100 gpm (0.20 cfs). Based on a 3 hp pump for the recent examination, a theoretical yields 0.09 cfs. After discussing this situation with Shelley Keen, it was decided to license 65-13294 with a condition limiting the rate under the two rights combined to 0.20 cfs. (The theoretical appears to have been accidentally calculated with the diameter of the well (10) inches instead of hp. Based on the 3 hp, the theoretical calculation comes out to 0.09 cfs).

The application for permit identified irrigation for 2.8 acres with an explanation that 8 of the 13 existing homes at the time irrigated small yards. The previous license covered internal and external use for 5 of the 41 homes. This license will be issued for the remaining 36 homes, with volume calculated for internal and external use. Based on the sizes of the lots, the irrigation of 2.8 additional acres will also be recognized.

RE: WATER RIGHT NO. 65-13294

Dear Mr. Longstreet:

We are in the process of reviewing the above referenced permit for licensing. The Beneficial Use Field Exam conducted on the property in September of 1994 provided information that requires some additional clarification.

There are several discrepancies between the 1980 (for 65-07545) and 1994 exams conducted on this subdivision's system. The 1980 exam indicated the system has one well in the SWSW $\frac{1}{4}$ of Section 23 with a 20 horsepower pump. According to the 1994 exam, there is also only one well in the SWSW $\frac{1}{4}$ for the subdivision, but it is listed as having a 3 horsepower pump. Would you please verify if there is more than one well in the subdivision's system and the correct pump size(s)?

Also, the examiner found 15 of the permitted 41 homes have been built. Are all of the empty lots stubbed in for the future homes?

Thank you for your assistance and if you have any questions, please contact me. My telephone number is (208) 327-5452.

Sincerely,

Brenda L. Chapman
Water Resource Agent

E. NARRATIVE/REMARKS/COMMENTS

THIS SYSTEM USES A 10", 140' WELL TO SERVE VARIOUS UNITS. THE WELL HAS A 3HP SUBMERSIBLE THAT LIFTS WATER FROM A DYNAMIC PUMPING LEVEL OF 130'. IT THEN LIFTS THE WATER AN ADDITIONAL 80' TO 2 STORAGE FACILITIES IN A 4" LINE. AN 800 GALLON PRESSURE TANK IS FILLED & PUMPS WATER TO UPPER UNITS WITH A 5HP ^{BOOSTER} MOTOR. A 46,000 GAL TANK IS ALSO FILLED TO SERVE THE LOWER UNITS. THEY ARE GRAVITY FED. 15 HOMES ARE CURRENTLY USING THIS SYSTEM UNDER THIS PERMIT #.

* WR #'S 65-07545 & 65-13794 WERE THE SYSTEM OTHERS ARE NEIGHBORS IN THE SAME 1/4. * SEE PERMITS COMPUTATIONS IN RIGHT HAND SIDE OF FILE

PERMITS AVERAGE: 41 UNITS / 2.9 ACRES = .07 ACRES/UNIT

15 HOMES DEVELOPED x .07 = 1.1 ACRES

NEED = .07 ^(PERMIT) / (UNIT / ACRE) x 1.1 = .02 CFS

PERMITS DOMESTIC: 41 UNITS / .33 CFS = .01 CFS/UNIT

15 UNITS DEVELOPED x .01 CFS/UNIT = .15 CFS

Have conditions of permit approval been met? ☒ yes ☐ no

APPROVED

PROOF ACKNOWLEDGEMENT LETTER

RE: PERMIT NO. 65-13294

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit. The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water.

If you have questions concerning this matter, please feel free to contact the WESTERN Regional Office in Boise, at (208)334-2190.

Sincerely,

JULIE L. YARBROUGH
Senior Secretary

PROOF DUE NOTICE

RE: PERMIT NO. 65-13294

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before February 1, 1994. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

JULIE L. YARBROUGH
Senior Secretary

GOVERNOR

R. KEITH HIGGINSON
DIRECTOR

October 18, 1993

Darrel Reidinger
P.O. Box 132
Garden Valley, ID 83622

Dear Mr. Reidinger:

As a follow up to my visit with the subdivision water users association on October 17, I am forwarding you a copy of the earlier priority water right license and Department field examination for the subdivision ground water well. Also enclosed is copy of the Department field exam for the School District well.

You will note that the subdivision field exam was conducted in 1980. According to the examiner's notes, the well was fitted with a 20 horsepower motor and submersible pump. A McCrometer in-line pipe flow meter had also been installed and provided a measurement of about 100 gpm. The exam does not include any photos or schematic diagram of the well and the system so I am not sure where the meter was actually located and/or how the horsepower rating was obtained. There also is no reference to the storage tank but that does not necessarily mean that the tank was not in use or part of the system at the time. You will note that the capacity of the well was recorded on the license as 0.22 cfs (or approx 100 gpm) and that the use under the right was actually limited to .20 cfs (or 0.04 cfs per house) and annual volume of 6 acre-feet.

The field exam for the School district well was made in 1988. You will note that the examiner indicated that the well was equipped with a flow meter which provided a measurement of 23 gpm at the time of the visit. Note further the comments indicating that the well can produce up to 40 gpm but goes dry when pumped at over 25 gpm (comments likely provided via School District personnel who accompanied examiner during inspection). If the condition concerning the school's well going dry when pumped at a rate of over 25 gpm is still true, then the water right rate of diversion of 23 gpm or 0.05 cfs seems to be appropriate and it is likely that this rate from the well is not exceeded. Little information is provided about the District's second well but it is apparent that the second well is not part of this license. The second well is covered by an older beneficial use claim which apparently has never been verified by the Department. I am not certain as to the extent of use from the second well. You should check the distance between the school well and the subdivision well. My review of the exams and approximate locations on a topo map indicate that the distance between the wells may be greater than 500 feet.

RECORDED

FEB 24 1994

I have also enclosed the USGS well observation measurements and dates for the nearby observation well. In addition, I have included some information on using a theoretical pump equation for estimating well discharge. As you may know actual measurements of pressure or have a better idea of operating pressures within the system, you can use the equation to check your previous estimates of discharge at the tank and/or estimate discharge at the well head.

I learned this morning that the Department's Energy Division normally conducts well pump tests for pumps that are 25 horse power or larger. However, I was told that you should still contact them as they can probably offer some assistance for your system if you can provide them with some basic information. Contact Rick Sterling, Resource Conservation Section Manager, at 327-7961.

Please call me at 327-7864 if you have further questions about the enclosed information or any related matters.

Sincerely,

Tim Luke
Hydrologist

RE: Garden Valley Ranchettes Water Rights

Dear Mr. Baldridge:

You recently requested a summary of water right information for the well system that provides water to the subdivision. This letter outlines the water rights as recorded at this agency. The information is for the subdivision well(s).

Right No. 65-07545

Date of Priority - 4/15/1975.

Amount of Water - 0.20 cubic feet per second (cfs), which is 90 gpm.

Water Uses - Domestic for five homes and yards (assumes each yard does not exceed one-half acre).

Water is assumed to be prorated among the five homes. Therefore, each home would be entitled to .20 cfs / 5 homes or .04 cfs/home (18 gpm/home).

Right No. 65-13294

Date of Priority - 8/31/1990.

Amount of Water - 0.39 cfs (175 gpm).

Water Uses - Domestic for 41 homes and irrigation of 2.9 acres (yards).

The five homes from 65-07545 are also included in the 41 homes in 65-13294. Water is assumed to be prorated among the 41 homes and yards. Here is a summary per unit shown in gpm for this right.

Domestic water (in-house): $148 \text{ gpm} / 41 \text{ units} = 3.60 \text{ gpm/unit}$

Irrigation water (yards): $27 \text{ gpm} / 41 \text{ units} = 0.66 \text{ gpm/unit}$

Total uses per unit = 4.26 gpm/unit

RECEIVED

FEB 24 1994

Mr. Charles Baldridge
August 18, 1993
Page 2

Note: $4.26 \text{ gpm/unit} \times 41 \text{ units} = 175 \text{ gpm}$

$175 \text{ gpm} / 448.8 \text{ gpm/cfs} = 0.39 \text{ cfs}$).

The distribution of water within the subdivision is an internal affair of your organization. This office cannot be responsible for administering the use of water to each home covered by these water rights. I hope this information clarifies the water right situation for the subdivision. Please let me know if you need more help.

Sincerely,

Steve Lester
Water Rights Supervisor

PERMIT APPROVAL NOTICE

RE: PERMIT NO. 65-13294

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

As a permit owner you must commence the excavation or construction of the diverting works within one year of the date the permit was issued, and you must proceed diligently until the project is completed. The date shown under condition no. 1 is the date when the project must be completed. You will receive a "Proof Due Notice" from this Department approximately 60 days prior to the completion date requiring you to file either a Proof of Beneficial Use form stating that the project has been completed or file a Request for an Extension of Time in which to file the proof statement.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

Sincerely,

JIM JOHNSON
Water Rights Supervisor
