MEMO TO FILE:

From: Carolyn Andregg

During the spring and summer of 1992, drought conditions caused record low flows in the Snake River. Twice, the flow of the Snake River fell below 4,750 cfs, the minimum stream flow at the Weiser gauge. Notices were mailed to the water user listed under this right because the priority is later than July 1, 1976, in order to protect the Snake River minimum stream flow. The following is a chronological history of the mailings.

May 19, 1992: Letter sent to water right holder informing holder of possible temporary cessation of diversion rights and notice of public meetings.

June 8, 1992: Letter sent informing water right holder directing immediate cessation of diversion of water until further notice.

June 12, 1992: Letter sent to water right holder authorizing resumption of diversion of water.

June 26, 1992: Letter sent to water right holder directing immediate cessation of diversion of water until further notice.

June 29, 1992: Letter sent to water right holder authorizing resumption of diversion of water.

PERMIT APPROVAL NOTICE

RE: PERMIT NO. 65-13246

Dear Permit Holder:

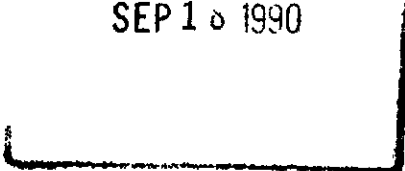

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

Natural flow of the Payette River is fully appropriated except during periods of flood flow. Your permit is conditioned to require you to obtain storage water to compensate for your diversion of natural flow from the river. The amount of storage which you will be required to obtain is approximately 3 acre-feet per acre of irrigated ground. You will be notified in the future of the necessity to obtain storage water.

We have enclosed a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit. Also enclosed for your convenience is a form entitled "Proof of Beneficial Use" that must be submitted to the Department when your project is completed. If development is complete, you may submit proof of beneficial use immediately.

WITNESSETH, That Whereas the parties of the first part heretofore acquired certain rights to divert into and run through what is known as "49 Slough" the intake of which said Slough is about three miles in a southeasterly direction from Payette, Canyon County, Idaho, and the termination or end of which is near the Township line of the Southerly limits of the said City of Payette, a certain amount of water diverted from the Payette River, which said water, so diverted, has been, and is to be used for the purpose of floating and storing logs and other commercial purposes for which said purposes the said Slough has been used and employed for a period of more than ten years last past, and

WHEREAS the said parties of the first part have duly acquired in the manner prescribed by law a right to divert water from the said Payette River into the said Slough for the above described purposes, which said right is evidenced by Permit Number 7340, duly issued by the State Engineer of the State of Idaho, and

WHEREAS the said parties of the first part have heretofore conveyed to other persons and to other interests certain rights to the use of a portion of the water thus diverted and run through the said Slough, some of which said rights are now in effect and being used and the said parties of the first part now desire to convey unto the said party of the second part a right to the use of a portion of the water being and to be diverted from the said Payette River, and run through the said Slough under and by virtue of the said permit, now

THEREFORE, for and in consideration of the premises and the sum of One Dollar lawful money of the United States, the receipt of which is hereby acknowledged, the said parties of the first part do by these presents remise, release and forever quitclaim unto the said party of the second part, to its successors or assigns, the right, privilege and authority to divert from the Payette River into and through the said "49 Slough" a sufficient amount and quantity of water to generate power for the purpose of operating the flour milling plant now being operated by the said party of the second part, and located near the County Bridge across the Payette River and at the intersection of 6th Street with the Township line between Township 8 and 9 North, Range 5 W.B.M. Canyon County, Idaho, up to a capacity of 100 barrels of flour per day, that is to say for a period of twenty four hours, as heretofore fully set out in a certain contract between the said "49 Slough" Committee and Thomas & Klingler, said contract being dated the 17th day of August, 1905; and also all of their right, title and interest in and to a similar water right to that hereinbefore described that has been used in connection with and for the purpose of generating power with which to run and operate what is commonly known as the Payette Feed Mill, located at the intersection of the said 6th Street above named, and 3rd

It is understood that the intention of this conveyance is to perfect title in the said party of the second part, in and to the water rights heretofore used in generating power for the purpose of operating the two milling plants hereinbefore described.

That in the use of the water right hereinbefore described the said party of the second part will in no way claim any right in the said Slough which will interfere with the use of said Slough by others for other milling or irrigating or any other purpose, and will at all times recognize the right of the people of the City of Payette, in conjunction with the farmers through whose land said Slough runs, to make contract and other arrangements for conveying water through said Slough, it being understood that such use of said Slough by others shall not interfere with the use of it by the said party of the second part, or involve it in any unnecessary expense by reason of such use by others.
