STORY OF THE I-O-N HIGHWAY
During the 1920s a growing network of U.S. Numbered Highways was to include the famous Idaho-Oregon-Nevada, or I-O-N Highway. This early trafficway later became U.S. Route 95. Many old timers recall the yellow I-O-N markers on the telegraph poles along the route. At today's 55 mph speeds many travelers shun the interstate in favor of the more entertaining "Old Highway." Our maps have tried to identify old routes such as the I-O-N to enhance your travelling pleasure.

Sprinkler head: $12 \text{ pipes} / 9 \text{ ft heads} / 45 \text{ psi} = \frac{3.99 \times 12}{440} = .11 \text{ cfs}$

E. NARRATIVE/REMARKS/COMMENTS

This system consists of 2 pumps on one well. The pump for irrigation is a 3hp. The well is 106' ^{deep} with a 16" casing. The static water level is 100' according to well logs in the same 1/4, 1/4. An estimated drawdown is 7.5'. The well is used to irrigate 2 pastures, a corral, a garden and a house. The owner has a drip/peirce system to irrigate

* This area was reclassified under the Payette River Adj., so well # 105-10400 is the same well as 105-13241. The well has changed from domestic to irrigation.

PERMIT APPROVAL NOTICE

RE: PERMIT NO. P65-13241

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

You should be aware that the groundwater you propose to divert is located within a drainage basin where surface waters are regulated during the months of low flow. It is possible that diversion of groundwater may have an adverse impact on these surface water flows. Information available to us at this time does not warrant refusing to issue permits in your area, but we do caution that diversions of groundwater are not allowed to deplete flows available for surface water users with earlier priority dates. Siting your well as far from surface sources as possible and casing out upper water producing zones may reduce the potential of interference.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

We have enclosed a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit. Also enclosed for your convenience is a form entitled "Proof of

Beneficial Use" that must be submitted to the Department when your project is completed. If development is complete, you may submit proof of beneficial use immediately.
