PERMIT APPROVAL NOTICE

RE: PERMIT NO. P65-13213

Dear Permit Holder:

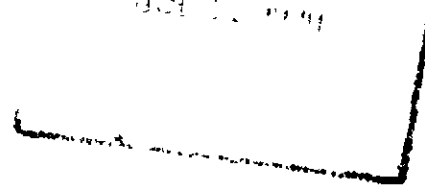

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

You should be aware that the groundwater you propose to divert is located within a drainage basin where surface waters are regulated during the months of low flow. It is possible that diversion of groundwater may have an adverse impact on these surface water flows. Information available to us at this time does not warrant refusing to issue permits in your area, but we do caution that diversions of groundwater are not allowed to deplete flows available for surface water users with earlier priority dates. Siting your well as far from surface sources as possible and casing out upper water producing zones may reduce the potential of interference.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

We have enclosed a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit. Also enclosed for your convenience is a form entitled "Proof of

324 11 1990

Beneficial Use" that must be submitted to the Department when your project is completed. If development is complete, you may submit proof of beneficial use immediately.

Sincerely,

GARY SPACKMAN, Supervisor

Re: Application for Permit

Dear Mr. Kilburn:

The water right application for a well and church was received but needs additional attention before this office can recommend approval of the application. Please respond to the following items; the answers will allow this office to advertise and expedite your application.

1) time required to drill the well and apply the water to the proposed beneficial use - minimum of one year and maximum of five years. If the well exists and the church already uses water from the well, please indicate this.

2) map and place of use - the application did not show the place of use and did not include a map indicating the well and church location. Please refer to the attached map and mark the sites. Your application indicated that the well is or will be in the SWSWSE Sec. 12. Return the map to me along with your answers.

3) ownership - who owns the property at the well site and at the church location? If the land is owned by someone other than the applicant, explain the arrangement that allows this application (lease, right of way, etc.).

Your prompt response will facilitate the approval of the application. Additional information is available by contacting me at 334-2190.

Sincerely,

Steve Lester
Sr. Water Resource Agent
