This system covers 2 acres of property. There are two wells on this property, but only the well displayed is applying for the license. This well is 100 ft deep with a 6" casing. The water level is around 15'. There are 16 ^{spigots} supplied by the well & from them sprinklers are used to irrigate. A neighboring pasture is included in the 2-acre parcel, but is not irrigated at present. The lower is one acre. A pressure ^{gauge} test proved the pressure to be 40 psi.

H. REMARKS AND OVERLAP REVIEW ANALYSIS

* The 1 hp serves not more than 3 or 4 rain bird sprinklers at a time. A 1 1/2" discharge line connects the various ^{5 ft 9 in} sprinklers.

There are no overlapping rights. No ditches cross system; no other water systems are used on the property.

RE: PERMIT NO. 65-13202

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

You should be aware that the groundwater you propose to divert is located within a drainage basin where surface waters are regulated during the months of low flow. It is possible that diversion of groundwater may have an adverse impact on these surface water flows. Information available to us at this time does not warrant refusing to issue permits in your area, but we do caution that diversions of groundwater are not allowed to deplete flows available for surface water users with earlier priority dates. Siting your well as far from surface sources as possible and casing out upper water producing zones may reduce the potential of interference.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

We have enclosed a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit. Also enclosed for your convenience is a form entitled "Proof of

Beneficial Use" that must be submitted to the Department when your project is completed. If development is complete, you may submit proof of beneficial use immediately.
