E. NARRATIVE/REMARKS/COMMENTS

THIS SYSTEM, AT BEST, CAN BE ESTIMATED. THE WELL, ACCORDING TO THE PERMIT, IS 85' DEEP. AT THE EXAM IT WAS EVIDENTALLY SERVING TWO HOMES; USED TO IRRIGATE THE LAWNS. THE CASING WAS 8" AND THE LINES WERE BURIED. THE HOME WAS USING POP-UPS WHILE THE TRAILER ACROSS THE CREEK USED SPIGOTS & HOSES TO IRRIGATE. THE HOME HAD @ 1 1/2 ACRES OF LAWN WHILE THE TRAILER @ 1500 SQ FT. EARLIER A SPRING WAS USED TO SUPPLY THE HOMES, BUT NOW IT IS USED TO IRRIGATE THE REST OF THE IMMEDIATE HOMESTEAD. THE OWNER STATED THAT THE STATIC WATER LEVEL IS NEAR THE SURFACE AND ONLY DROPS APPROX. 20' WHILE THE SYSTEM IS IN USE. WELL LOGS COULD NOT BE LOCATED. THE SYSTEM IS USING A 1 HP MOTOR. A THEORETICAL COMPUTATION, AT BEST, GIVES A FLOW OF .66 CFS, WHICH IS REASONABLE CONSIDERING GIVEN INFORMATION. THE SYSTEM RUNS AT 35 PSI.

MEMORANDUM

TO: File 65-13159 / Haw Creek Ranch, Inc.
FROM: Brenda Chapman
DATE: March 22, 1995
RE: Recommendation Adjustment(s)

=====

The final licensing recommendations for the above referenced water right are based on the information below:

C. DIVERSION AND DELIVERY SYSTEM

2. Place of Use: The exam map indicates the place of use is in the SWNE of Section 8 and there is no recommendation to amend the place of use. Based on that information and the fact the location agrees with the permit, the place of use recommendation will not change.

F. FLOW CALCULATIONS

The permit application stated that the domestic use was internal and therefore did not include up to $\frac{1}{2}$ acre of irrigation. It is then assumed the permitted 1 acre of irrigation was meant to cover all of the lawn area for both homes. Based on that information the recommended irrigation rate of .03 cfs for 1 acre is being made.

The domestic rate is reduced to conform with the current guidelines for processing combination domestic and irrigation rights.

G. VOLUME CALCULATIONS

Volume recommendations adjusted based on 1 acre of irrigation at 4.5 af and 2 domestics (with internal use only) at 1.2 af.

PROOF DUE NOTICE

RE: PERMIT NO. 65-13159

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before June 1, 1991. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

Rita Fleck
Secretary/Records Manager

PERMIT APPROVAL NOTICE

RE: PERMIT NO. 65-13159

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

You should be aware that the groundwater you propose to divert is located within a drainage basin where surface waters are regulated during the months of low flow. It is possible that diversion of groundwater may have an adverse impact on these surface water flows. Information available to us at this time does not warrant refusing to issue permits in your area, but we do caution that diversions of groundwater are not allowed to deplete flows available for surface water users with earlier priority dates. Siting your well as far from surface sources as possible and casing out upper water producing zones may reduce the potential of interference.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

We have enclosed a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit. Also enclosed for your convenience is a form entitled "Proof of

Beneficial Use" that must be submitted to the Department when your project is completed. If development is complete, you may submit proof of beneficial use immediately.
