H. REMARKS AND OVERLAP REVIEW ANALYSIS

INDICATES THAT THE SPRING HAS BEEN FLOWING. LIVESTOCK USE CONSISTS OF A MAXIMUM OF 50 HEAD RANGE COWS. ALTHOUGH NO WATER WAS FLOWING AT EXAM TIME I RECOMMEND LICENSING THIS RIGHT IN A MANNER CONSISTANT WITH BLM STOCK WATER DEVELOPMENT LICENSING PRACTICES - USING A THEORETICAL CALCULATION TO DETERMINE THE SYSTEM CAPACITY. THE FLOW FROM THIS SYSTEM IS RELATED TO ^{LOCAL} IRRIGATION PRACTICES DURING THE SUMMER AND SNOW PACK FOR WINTER/SPRING RUNOFF. NO IRRIGATION HAD OCCURED IN THE NEAR VICINITY THIS YEAR.

Re: Application for Permit

Dear Applicant:

Your recent application for stockwater needs some clarification before we can process it. Please examine the following items and respond within 30 days to avoid complications with the application.

1) The source is listed as ground water but is also referred to as a spring. Is the source a well or a spring? Springs are considered surface water. If a spring is involved, did the spring flow into a stream or other natural body of water before you developed the water source? If so, what did it flow into? If not, the spring would be described as one that sinks.

2) The point of diversion (location of the water source) is listed as the NWSENE, S. 16. However, your map shows the diversion at the NENWSE, S. 16. Refer to the attached topo map showing the area in question and indicate the diversion point on the map. Note that Hwy. 52 runs through the SWSENE and that the road to Montour borders the west side of SWSENE and the east sides of NENWSE and SENWSE.

3) The place of use for stockwater use is stated as the SENE. However, your map indicates the NWSE. Which is correct? Please show the area of use on the map also.

4) Do you own the property at the place of use? This was left blank on the application.

Please provide your response, including the map showing the point of diversion and place of use, to me as soon as possible within the 30 days previously mentioned. Additional help is available from this office.

Sincerely,

Steve Lester
