RE: Complaint Regarding Use of Ditch

Dear Mr. Adams:

This office recently received a complaint that you are diverting water from a ditch without a valid water right. A telephone conversation between you and a staff member at this office resulted from the complaint. According to the telephone conversation memorandum, you stated that your water right license no. 65-13067 provides use of the ditch.

However, license no. 65-13067 is for a domestic well for use in Lot 12, Pine Tree Ranch Subdivision No. 2. The well can be used for one home and up to one-half acre of irrigation associated with the home. Your water right is for land in the NWSW, Sec. 22, T10N, R04E.

I checked water right records filed with this agency for any rights within the NWSW of Sec. 22. The only valid water right listed for that tract of land is your licensed domestic well.

Therefore, I must conclude that you do not have a valid right to use a ditch served by surface water for any use on your property within the NWSW of Sec. 22, including but not limited to Lot 12 of the subdivision.

Of course, I am in no position to either confirm or deny the allegation since a site visit related to the complaint has not occurred by any staff members from this office. Please be advised that any use of water by you for the property in question other than the licensed domestic well must be considered as an illegal diversion subject to regulation by this agency pursuant to Section 42-351, Idaho Code.

Please contact this office if you feel that the information in this letter is in error or if you have any questions regarding water rights.

Sincerely,

Steve Lester
Water Rights Supervisor

RE: Shriever Creek Ditch.

Conversation - (Mr. Throgard.)

Mr. Throgard stated Mr. Adams is diverting irrigation water from the ditch with no water right.

Conversation - (Mr. Adams) claims he can divert water under WR # 65-13067 from the ditch - This is a groundwater right, I explained this does not apply to the ditch. He was not convinced, I told him we would further investigate the matter, and take action.

NORMALLY WOULD NOT SEND WRITTEN RESPONSE BASED ON TELEPHONE COMPLAINT ("RESPOND IN KIND - CALL FOR CALL" ETC.) BUT DID IN THIS CASE SINCE CONV. MEMO INDICATED WE WOULD BE DOING SOMETHING.

RECOMMEND NO ADD'L ACTION UNLESS RECEIVES WRITTEN COMPLAINT.

PROOF DUE NOTICE

RE: PERMIT NO. 65-13067

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before September 1, 1991. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

Rita Fleck
Secretary/Records Manager

RE: PERMIT NO. P65-13067

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

You should be aware that the groundwater you propose to divert is located within a drainage basin where surface waters are regulated during the months of low flow. It is possible that diversion of groundwater may have an adverse impact on these surface water flows. Information available to us at this time does not warrant refusing to issue permits in your area, but we do caution that diversions of groundwater are not allowed to deplete flows available for surface water users with earlier priority dates. Siting your well as far from surface sources as possible and casing out upper water producing zones may reduce the potential of interference.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

Please note the requirement that as a permit holder you must commence the excavation or construction of diverting works within one year of the date the permit was issued, and you must proceed diligently until the project is completed. The enclosed blue card must be completed and returned to this office as soon as you commence construction, no later than one year from the date the permit was approved.
