WATER RIGHT LICENSE

WATER RIGHT NO. 65-13040

Priority: May 17, 1989

Maximum Diversion Rate:

0.02 CFS

Maximum Diversion Volume:

2.3 AF

This is to certify, that GERALD A BROWN
APRIL L BROWN

12008 HWY 52

HORSESHOE BEND ID 83629

has complied with the terms and conditions of the permit, issued pursuant to Application for Permit dated May 17, 1989; and has submitted Proof of Beneficial Use on January 31, 1992. An examination indicates that the works have a diversion capacity of 0.120 cfs of water from:

PAYETTE RIVER

tributary to SNAKE RIVER

source, and a water right has been established as follows:

<u>BENEFICIAL USE</u>	<u>PERIOD OF USE</u>	<u>RATE OF DIVERSION</u>	<u>ANNUAL VOLUME</u>
IRRIGATION	03/15 to 11/15	0.02 CFS	2.3 AF

LOCATION OF POINT(S) OF DIVERSION: Lot 1(NESE), Sec. 25, Township 07N, Range 01E
GEM County

PLACE OF USE: IRRIGATION

<u>TWN</u>	<u>RGE</u>	<u>SEC</u>	<u>ACRES</u>	<u>ACRES</u>	<u>ACRES</u>	<u>TOTAL</u>
07N	02E	30	Lot 3(NWSW)	0.5		0.5

Total number of acres irrigated: 0.5

CONDITIONS OF APPROVAL AND REMARKS

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount which can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license shall be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. Use of water under this water right will be regulated by the watermaster of State Water District No. 65.
6. The Director retains jurisdiction of this right to require purchase or lease of storage water to compensate for diversion of the streamflow authorized by this right.

RE: WATER RIGHT NO. 65-13040

Dear Water Right Holder(s):

The Department of Water Resources (the Department) has issued the enclosed license confirming that a water right has been established in accordance with the permit referenced above. The license is a preliminary order issued by the Department pursuant to section 67-5243, Idaho Code. It can and will become a final order without further action of the Department unless a party petitions for reconsideration or files an exception and/or brief as further described below:

PETITION FOR RECONSIDERATION

Any party may file a petition for reconsideration of a preliminary order with the Department within fourteen (14) days of the service date of this order. The Department will act on a petition for reconsideration within twenty-one (21) days of its receipt, or the petition will be considered denied by operation of law. See section 67-5243(3), Idaho Code.

EXCEPTIONS AND BRIEFS

Within twenty-one (21) days after (a) the service date of a preliminary order, (b) the service date of a denial of a petition for reconsideration from this preliminary order, or (c) the failure within twenty-one (21) days to grant or deny a petition for reconsideration from this preliminary order, any party may in writing support or take exceptions to any part of a preliminary order and may file briefs in support of the party's position on any issue in the proceeding. Otherwise, this preliminary order will become a final order of the Department.

If any party appeals or takes exceptions to this preliminary order, opposing parties shall have twenty-one (21) days to respond to any party's appeal. Written briefs in support of or taking exceptions to the preliminary order shall be filed with the Department. The Department retains the right to review the preliminary order on its own motion.

MICROFILMED

APR 16 1998

ORAL ARGUMENT

If the Department grants a petition to review the preliminary order, the Department shall allow all parties an opportunity to file briefs in support of or taking exceptions to the preliminary order and may schedule oral argument in the matter before issuing a final order. If oral arguments are to be heard, the Department will within a reasonable time period notify each party of the place, date and hour for the argument of the case. Unless the Department orders otherwise, all oral arguments will be heard in Boise, Idaho.

CERTIFICATE OF SERVICE

All exceptions, briefs, requests for oral argument and any other matters filed with the Department in connection with the preliminary order shall be served on all other parties to the proceedings in accordance with Rules of Procedure 302 and 303.

FINAL ORDER

The Department will issue a final order within fifty-six (56) days of receipt of the written briefs, oral argument or response to briefs, whichever is later, unless waived by the parties or for good cause shown. The Department may remand the matter for further evidentiary hearings if further factual development of the record is necessary before issuing a final order. The Department will serve a copy of the final order on all parties of record.

Section 67-5246(5), Idaho Code, provides as follows:

Unless a different date is stated in a final order, the order is effective fourteen (14) days after its issuance if a party has not filed a petition for reconsideration. If a party has filed a petition for reconsideration with the agency head, the final order becomes effective when:

- (a) the petition for reconsideration is disposed of; or
- (b) the petition is deemed denied because the agency head did not dispose of the petition within twenty-one (21) days.

APPEAL OF FINAL ORDER TO DISTRICT COURT

Pursuant to sections 67-5270 and 67-5272, Idaho Code, if this preliminary order becomes final, any party aggrieved by the final order or orders previously issued in this case may appeal the final order and all previously issued orders in this case to district court by filing a petition in the district court of the county in which:

- i. A hearing was held,
- ii. The final agency action was taken,
- iii. The party seeking review of the order resides, or
- iv. The real property or personal property that was the subject of the agency action is located.

The appeal must be filed within twenty-eight (28) days of this preliminary order becoming final. See section 67-5273, Idaho Code. The filing of an appeal to district court does not itself stay the effectiveness or enforcement of the order under appeal.

If you have any questions, please call me at 208-327-7946.

Sincerely,

Shelley W. Keen
Water Rights Supervisor

Gerald &/or April Brown
12008 Highway 52
Horseshoe Bend, ID 83629

Dear Mr. and Mrs. Brown:

In follow-up to my visit earlier this week, I have prepared a new Application for Permit for your signature. As I explained to you, Mrs. Brown, the only use we can recommend for licensing of your current permit, No. 65-13040, is irrigation for your lawn and surrounding landscape. In this case, we will acknowledge irrigation of 1/2 acre. You should receive a copy of the license shortly.

At the time a field inspection is made on a permit, the examiner determines the extent of beneficial use of water and writes up a report which contains the recommendations for issuance of a license. In an examination of an irrigation system, the examiner must confirm the number of acres that have been developed and have been irrigated by the water delivery system. As I confirmed by my visit, your water delivery system is in place and is capable of supplying water for irrigation of 8+ acres, however, the lawn and surrounding landscaped areas were the only areas to which water from the river had been applied as beneficial use. We cannot "credit" development to acres that have not yet received water. In your case, I know you are very close to irrigating those acres and raising some cattle on them. The new application will allow you to cover the water needs for the cattle and put water to beneficial use on the remaining acres you own. Note that I have prepared the application for a total of 10 acres; it's best to over-estimate so that when the examiner makes his field inspection your right sufficiently covers what you've developed.

After you've signed the application and made any changes to it that you feel are necessary, please send it to our Western Regional Office (address on back side of instruction form) along with the appropriate fee. I will inform them of the circumstances surrounding this filing and will request that they contact you directly if they have any questions or concerns.

I apologize for any inconvenience or stress this situation has caused. Feel free to give me a call if I can be of further assistance.

Sincerely,

SHARLA CURTIS
Water Resource Agent

MEMORANDUM

TO: File 65-13040

FROM: Sharla

DATE: October 7, 1997

RE: Re-Exam and Recommendation Adjustment(s)

When the prepared license was sent up for signature, Norm returned the file with a note concerning the fact that the measured rate did not provide the minimum $\frac{1}{2}$ " / acre used by SRBA staff. I was asked to re-examine the system since the first inspection was during drought conditions; during an above-normal flow year like this one, we thought we could get a better idea of what the system was capable of producing and could obtain photos to document the file as proof of development and use (the only photo of the place of use taken at the time of the first exam showed the lawn area which had supposedly been receiving water, although it was almost totally dry as well).

I called Mr. Brown on September 23 and made arrangements to visit the property the following Tuesday, September 30. He told me that he wasn't sure if anyone would be home but gave me directions so I could find the place. I asked that the pump be turned on and operating by the time I got there and he said he would turn it on. I asked him how long it took to fill the pond if it was totally empty and he said that it took about 18 hours to fill; the normal practice was to turn it on about 6:00 pm and the pond would be filled by noon the next day. After getting the pond dimensions and using them along with the time it takes to fill the pond, the estimated rate of diversion is approximately 0.12 cfs.

I called on the morning of the 30th to let the Brown's know I was on my way and Mrs. Brown answered. She told me she'd be home and asked if I needed the pump turned on. Mr. Brown had forgotten to have the pump running; Mrs. Brown couldn't reach him by phone and told me he was out on a job and she had no idea what to do to start the system up. I told her I would come out anyway and we'd see if we could get by without the pump being on.

I arrived to find the pond almost full but no water being pumped from the river nor water being pumped from the pond for irrigation. As I looked around I wondered where the irrigation was taking place. The yard was green and the associated landscape was healthy, but the rest of the surrounding area was sagebrush and dry native vegetation. I asked Mrs. Brown to point me in the direction of the 8+/- acres that were irrigated from the pond. She pointed to the area west and north of the home and it was obvious that irrigation hadn't occurred on the land. It was sagebrush and dry grass.

MICROFILMED
APR 16 1998

In our ensuing conversation, she stated that the lawn and surrounding landscaping was watered from the river. Their domestic well is 500 feet deep and when they attempted to water the lawn from it, they didn't have enough pressure to even use the shower in the house. She said the pipeline and associated equipment has mostly been purchased and were intending to start irrigating the acres described above probably next spring. At that time they will also be purchasing cattle to raise on their land. I explained that we could only issue a license for the land that had been developed and irrigated at the time proof of beneficial use was filed.

The temporary examiner had told them that as long as they had the diversion system in, the department would give them credit for the acres that could be irrigated under that diversion. If they had known that they had to actually be irrigating all the acres they had applied for, they would have asked for a longer extension of time. But because the extension was granted and proof was later filed, the license can only recognize irrigation of lawn/landscape totalling approximately 1/2 acre. I explained that a new application should be filed to cover the remaining area they hope to begin irrigating next spring and to include stockwatering under the new application as well.

Back at my office, I prepared a new application (65-13749) for their signature and submittal. I spoke to Mr. Brown the next day on the phone and told him the application would be coming in the mail; he was in agreement with my suggestions.

There is no department-issued moratorium in place; a summary of the facts surrounding the filing of the new application has been placed in the comments field under the new application and a copy of those comments forwarded to Steve Lester as a heads-up.

The following adjustments have been made for the issuance of a license for Permit 65-13040:

C. DIVERSION AND DELIVERY SYSTEM

E. NARRATIVE/REMARKS/COMMENTS

THE OWNER HAS DIVERTED WATER FROM THE PAYETTE RIVER USING A $7\frac{1}{2}$ HP WITH A 6" INTAKE. THE WATER IS PUSHED 200' UP A HILL TO THE P/M FROM LINES OF 4" TO 2". THE SYSTEM RUNS AT 85 PSI AND LEADS TO A POND. THE POND IS FILLED FOR IRRIGATION PURPOSES. THE OWNER DRAWS WATER FROM THE POND USING A 1HP. THIS PUMP PUSHES WATER THROUGH A $\frac{1}{2}$ " LINE TO 10 $\frac{3}{4}$ " NOZZLES. THIS SYSTEM IS MANUAL AND LEADS TO THE "MIES IRRIGATION SYSTEM. AND IS USED TO IRRIGATE 2.8 ACRES OF PROPERTY.

NOTE: EVIDENCE FOR IRRIGATION IS SCARCER, BUT BECAUSE OF THE DROUGHT. THE OWNER WAS ONLY IRRIGATING HIS LAWN. ACCORDING TO THE PERMIT, 2 ACRES IN THE SUNKEN SECTION OF 30 ACRES BEING IRRIGATED. THE SYSTEM DOES NOT EXTEND TO THIS AVERAGE.

OTHER WRT #'S ARE NEIGHBORS ALSO DRAINING FROM THE PAYETTE RIVER.

Have conditions of permit approval been met? ☒ yes ☐ no

RE: Water Right No. 65-13040

Dear Water Right Holder(s):

On May 19, 1992, the department sent you a letter advising that you might be required to temporarily cease diverting water from the Snake River or its tributaries if the established minimum stream flow of the Snake River in the amount of 4,750 cubic feet per second measured near Weiser is not satisfied or likely will not be satisfied.

The flow of the Snake River at Weiser is now less than 4,750 cfs. You are, therefore, directed to immediately cease diverting water under the above referenced water right and to not resume use until authorized by the department.

Past flow records show that the duration of seasonal low flow periods typically last several days to a week. Since your use of water is extremely important to you and since mail notification includes a delay associated with mail delivery time, feel free to call the toll-free telephone number 1-800-451-4129 to determine when you are again authorized to divert and use water under your water right. Please use this phone number only in connection with resumption of use.

You need to be aware that Section 42-351, Idaho Code, provides for penalties of up to \$100 per day for unauthorized diversion.

Thank you for your cooperation in this matter. Please feel free to contact L. Glen Saxton (phone: 208-327-7955) or Gary Spackman (phone: 208-327-7946) of my staff if you have questions.

Sincerely,

R. KEITH HIGGINSON
Director

RE: Water Right No. 65-13040

Dear Water Right Holder(s):

On June 8, 1992, the department sent you a letter which directed you to immediately cease diverting water under the above referenced water right, since the minimum stream flow of the Snake River in the amount of 4,750 cubic feet per second (cfs) measured near Weiser was not being satisfied.

The flow of the Snake River at Weiser is now above 4,750 cfs. You are, therefore, authorized to again divert water under your water right. If the minimum stream flow is not met later this year, however, the department will again notify you to temporarily cease diversion.

Thank you for your cooperation in this matter. Please feel free to contact L. Glen Saxton (phone: 208-327-7955) or Gary Spackman (phone: 208-327-7946) of my staff if you have questions.

Sincerely,

R. KEITH HIGGINSON

APRIL L. BROWN
12008 HIGHWAY 52
HORSESHOE BEND ID 83629

RE: Water Right No. 65-13040

Dear Water Right Holder(s):

Department water right records show that you divert water from the Snake River or its tributaries under a water right that has a priority date later than December 29, 1976. This is the priority of the established minimum stream flow of the Snake River at the Weiser Gage (Weiser) in the amount of 4,750 cubic feet per second.

Because of the continuing drought conditions in the Snake River Basin, department hydrologists project that during 1992, there could be periods when the required minimum flow will not be satisfied due to low flows of the Snake River. The department urges you to not divert at a higher rate than authorized by your water right and to not use your right in any manner different than authorized. In addition, when the minimum flow will not be satisfied or is not being satisfied, you are required to cease diverting water under your water right, because your right is of later priority than the minimum stream flow at Weiser.

If the department determines the minimum flow will not be satisfied, the department will advise you and will provide as much lead time as possible in requiring that you temporarily cease your diversion of water. The greatest likelihood for this to occur is during a period from mid-June to late June.

While the department expects good cooperation from junior water right holders, water users should be aware that Section 42-352, Idaho Code, provides for penalties of up to \$100 per day for unauthorized diversions of water.

The department has contacted both the Idaho Power Company and the U.S. Bureau of Reclamation with respect to the timing of storage releases from upstream reservoirs for flow enhancement

MICROFILMED
APR 16 1998

purposes. This type of coordination could minimize the impact on existing water users and reduce the need to curtail diversions.

The department has scheduled public information meetings relative to this potential regulation as follows:

Mountain Home - June 4, 1992 - 10:00 a.m. - gymnasium at
North Elementary School, 290 E. 12th N.

Caldwell - June 4, 1992 - 7:00 p.m. - Ballroom in the
Student Union Building, Albertson College of Idaho,
2112 Cleveland

If you have questions concerning this letter or wish to provide the name of a different contact person or address to receive department correspondence, please contact the department.

Sincerely,

L. GLEN SAXTON
Chief, Water Allocation Bureau

PROOF ACKNOWLEDGMENT LETTER

RE: PERMIT NO. 65-13040

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit. The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water.

If you have questions concerning this matter, please feel free to contact the WESTERN Regional Office in Boise at (208)334-2190.

Sincerely,

Karen L. Gustafson
Secretary/Records Manager

PROOF DUE NOTICE

RE: PERMIT NO. 65-13040

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before February 1, 1992. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

Karen L. Gustafson
Secretary/Records Manager

RE: PERMIT NO. P65-13040

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

Natural flow of the Payette River is fully appropriated except during periods of flood flow. Your permit is conditioned to require you to obtain storage water to compensate for your diversion of natural flow from the river. The amount of storage which you will be required to obtain is approximately 3 acre-feet per acre of irrigated ground. You will be notified in the future of the necessity to obtain storage water.

We have enclosed a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit. Also enclosed for your convenience is a form entitled "Proof of Beneficial Use" that must be submitted to the Department when your project is completed. If development is complete, you may submit proof of beneficial use immediately.

Sincerely,

GARY SPACKMAN, Supervisor
Water Right Permits Section
