		NENE

CONDITIONS OF APPROVAL AND REMARKS

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount that can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.

OF THE
STATE OF IDAHO

IN THE MATTER OF CHANGING THE
FLOW MEASUREMENT DEVICE AND
LOCKABLE CONTROLLING WORKS CONDITIONS
OF APPROVAL FOR PERMIT NO. 65-13026 IN
THE NAME OF ROGER F. BEAL

ORDER

WHEREAS, the Department of Water Resources (department) has issued the above captioned water right permit with a condition of approval requiring the permit holder to install a measuring device and lockable controlling works to facilitate the measurement and determination of the rate of diversion by the department; and

WHEREAS, the department has determined that the rate of diversion for certain surface water uses can be estimated by the department without the use of a measuring device; and,

WHEREAS, the department has determined a lockable controlling works is not necessary at this time;

IT IS THEREFORE, HEREBY ORDERED that the condition of approval requiring the installation of a measuring device and lockable controlling works for the above captioned permit be WAIVED. The department retains jurisdiction to require the condition be reinstated in the future upon a finding of need by the department.

Dated this 26th day of August, 1994.

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Application for Permit to appropriate the public waters of the State of

Idaho No. 65-13026, and said application is hereby APPROVED

1 Approval of said application is subject to the following limitations and conditions.

a. SUBJECT TO ALL PRIOR WATER RIGHTS.

b. Proof of construction of works and application of water to beneficial use shall be submitted on or before

August 1, 19 92.

c. The rate of diversion, if water is to be used for irrigation under this permit, when combined with all other water rights for the same land shall not exceed 0.02 cubic feet per second for each acre of land.

d. The water right acquired under this permit if for hydropower purposes shall be junior and subordinate to all rights to the use of water, other than hydropower, within the State of Idaho that are initiated later in time than the priority of this permit and shall not give rise to any right or claim against any future rights to the use of water, other than hydropower, within the State of Idaho initiated later in time than the priority of this permit.

e. Other: A measuring device and lockable controlling works of a type acceptable to the Department shall be permanently installed and maintained as part of the diverting works prior to diversion of water under this permit.

Permit holder shall commence the excavation or construction of diverting works within one year of the date this permit is issued and shall proceed diligently until the project is complete.
Use of water under this permit is subject to control by the watermaster of State Water District No. 65A, Squaw Creek.

Witness my hand this 19th day of July, 1989.

RE: WATER RIGHT NO. 65-13026

Dear Water Right Holder(s):

The Department of Water Resources (the Department) has issued the enclosed license confirming that a water right has been established in accordance with the permit referenced above. The license is a preliminary order issued by the Department pursuant to section 67-5243, Idaho Code. It can and will become a final order without further action of the Department unless a party petitions for reconsideration or files an exception and/or brief as further described below:

PETITION FOR RECONSIDERATION

Any party may file a petition for reconsideration of a preliminary order with the Department within fourteen (14) days of the service date of this order. The Department will act on a petition for reconsideration within twenty-one (21) days of its receipt, or the petition will be considered denied by operation of law. See section 67-5243(3), Idaho Code.

EXCEPTIONS AND BRIEFS

Within twenty-one (21) days after (a) the service date of a preliminary order, (b) the service date of a denial of a petition for reconsideration from this preliminary order, or (c) the failure within twenty-one (21) days to grant or deny a petition for reconsideration from this preliminary order, any party may in writing support or take exceptions to any part of a preliminary order and may file briefs in support of the party's position on any issue in the proceeding. Otherwise, this preliminary order will become a final order of the Department.

If any party appeals or takes exceptions to this preliminary order, opposing parties shall have twenty-one (21) days to respond to any party's appeal. Written briefs in support of or taking exceptions to the preliminary order shall be filed with the Department. The Department retains the right to review the preliminary order on its own motion.

ORAL ARGUMENT

If the Department grants a petition to review the preliminary order, the Department shall allow all parties an opportunity to file briefs in support of or taking exceptions to the preliminary order and may schedule oral argument in the matter before issuing a final order. If oral arguments are to be heard, the Department will within a reasonable time period notify each party of the place, date and hour for the argument of the case. Unless the Department orders otherwise, all oral arguments will be heard in Boise, Idaho.

CERTIFICATE OF SERVICE

All exceptions, briefs, requests for oral argument and any other matters filed with the Department in connection with the preliminary order shall be served on all other parties to the proceedings in accordance with Rules of Procedure 302 and 303.

FINAL ORDER

The Department will issue a final order within fifty-six (56) days of receipt of the written briefs, oral argument or response to briefs, whichever is later, unless waived by the parties or for good cause shown. The Department may remand the matter for further evidentiary hearings if further factual development of the record is necessary before issuing a final order. The Department will serve a copy of the final order on all parties of record.

Section 67-5246(5), Idaho Code, provides as follows:

Unless a different date is stated in a final order, the order is effective fourteen (14) days after its issuance if a party has not filed a petition for reconsideration. If a party has filed a petition for reconsideration with the agency head, the final order becomes effective when:

- (a) the petition for reconsideration is disposed of; or
- (b) the petition is deemed denied because the agency head did not dispose of the petition within twenty-one (21) days.

APPEAL OF FINAL ORDER TO DISTRICT COURT

Pursuant to sections 67-5270 and 67-5272, Idaho Code, if this preliminary order becomes final, any party aggrieved by the final order or orders previously issued in this case may appeal the final order and all previously issued orders in this case to district court by filing a petition in the district court of the county in which:

- i. A hearing was held,
- ii. The final agency action was taken,
- iii. The party seeking review of the order resides, or
- iv. The real property or personal property that was the subject of the agency action is located.

The appeal must be filed within twenty-eight (28) days of this preliminary order becoming final. See section 67-5273, Idaho Code. The filing of an appeal to district court does not itself stay the effectiveness or enforcement of the order under appeal.

For your records I have also enclosed a copy of your Application for Amendment of Permit, which was approved.

Sincerely,

A handwritten signature in cursive script, reading "Shelley W. Keen".

RE: WATER RIGHT NO. 65-13026

Dear Permit Holder(s):

The above referenced water right is in the process of being licensed. However, before a license can be issued, your permit must be amended to depict your water right as it has actually been developed.

The enclosed Application for Amendment contains information that will be included on the license when it is issued. The amendment reflects a change in the location of the point(s) of diversion and the place(s) of use description. Please review carefully and if you concur, sign the amendment and return it with the \$50.00 filing fee within 14 days.

The last page of the Application for Amendment form contains a list of Conditions of Approval and Remarks proposed for the license when it is issued. These conditions of approval and remarks may be modified upon further administrative review.

If you do not concur, or if you have any questions about this information, please contact me as soon as possible. My telephone number is (208) 327-7946.

Sincerely,

A handwritten signature in cursive script that reads "Shelley W. Keen".

FROM: Shelley W. Keen *SWK*

RE: Change in point of diversion on 65-13026

Permit 65-13026 authorized the use of water from an unnamed tributary of Little Squaw Creek. The examiner found that the permit holder has established a point of diversion on Little Squaw Creek downstream from the confluence with the unnamed tributary. In general, if the flow of the unnamed tributary diminishes during the irrigation season, the appropriator could gain a significant advantage by moving his point of diversion to Little Squaw Creek. If there were junior appropriators on Little Squaw Creek, they could be injured by this move. However, because there are no Little Squaw Creek appropriators junior to 65-13026, I see no reason not to approve the change. Is this consistent with similar situations in your experience?

P.S. - It is interesting to compare this situation to what we have said in the new field examiners handbook.

ok to proceed *JW*

MEMORANDUM

TO: File 65-13026

FROM: Sharla Curtis

DATE: July 17, 1997

RE: Recommendation Adjustment(s)

The final license recommendations for Permit No. 65-13026 are based on the following:

H. RECOMMENDATIONS

Irrigation	4/15 - 10/15	0.96 cfs	168.0 afa
Stockwater	1/1 - 12/31	0.03 cfs	1.4 afa
	TOTALS	0.96 cfs	169.4 afa

Although the rate is not additive, the volume is.

The examiner found a diversion from Little Squaw Creek as well as the unnamed stream originally applied for. There are no junior appropriators on Little Squaw Creek; the second point of diversion (second source) can be added.

Examiner: Cindy Hodges
Exam Date: July 9, 1996

2. Measurements: tractor at ~1100 rpm. Pump not rated.

Use polysonic measurement - see record on back page

E. NARRATIVE/REMARKS/COMMENTS

Portable pump at various locations w/in ~~ENE~~ NE Sec 12 along same channel - only one pump operating. No storage created. Check dams only for pumping. What amounts to a pre-exam was conducted in June of '92. Measurement & acreage verification occurred this exam.

One pump station is in Little Squaw Creek downstream from confluence of unnamed tributary. Other 2 stations are on the unnamed stream.

All irrigation is by flooding. No spin sprinklers used.

Overlapping right 63. 12959 is held by this owner but used on separate acres in SWNE Sec 12, from Spring Source. No other rights used on permit acres. Balance of acreage shown are farmed^{as} dryland.

Instream stockwater for 65 range cattle, in unnamed stream only. Point of beginning: SEENE Point of ending: SWENE

(Mens. device requirement waived)

Have conditions of permit approval been met? ☒ yes ☐ no

Julie Garbrough,

Re: permit no. 65-13026

Installing a permanent measuring device would be impractical since this creek usually goes dry from the middle of July or around the first of August. Then only a trickle which has to accumulate for several hours to be enough to pump. I would rather go the waiver route. I am formally requesting a waiver of this condition for this permit. Please advise me how to proceed.

Yours truly,

Roger F. Seal

PROOF ACKNOWLEDGEMENT LETTER

RE: PERMIT NO. 65-13026

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit. The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water.

Please be advised that one of the conditions of your water right permit requires that the permit holder install a permanent measuring devise prior to diversion of water under this permit. This condition must be complied with before the license exam, or you can request, in writing, a waiver of the condition.

If you have questions concerning this matter, please feel free to contact the WESTERN Regional Office in Boise, at (208)334-2190.

Sincerely,

JULIE L. YARBROUGH
Senior Secretary

PROOF DUE NOTICE

RE: PERMIT NO. 65-13026

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before August 1, 1994. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

JULIE L. YARBROUGH
Senior Secretary

Idaho Department of Water Resources
Mr. Gary Spackman, Supervisor
Water Right Permits Section

RE: PERMITS NO. 65-12959 and 65-13026

Mr. Spackman:

On January 4, 1990, Mr. Beal visited the Water Resources Office and discussed with you the impracticality of installing the lockable/ measuring devices to be installed with the issuance of these two permits. You mentioned to him that these two requirements could be waived if he could get the consent of the Watermaster of the District.

Mr. Beal and I have discussed this issue. I will agree to waive these requirements.. He states that he will comply with my decision, and any subsequent watermasters', regarding use of this water.

Yours truly,

Phil Hamilton

RE: PERMIT NO. 65-13026

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

Be sure to note the special condition requiring you to install a measuring device and lockable controlling works that will enable the watermaster to control the rate of diversion.

Please note the requirement that as a permit holder you must commence the excavation or construction of diverting works within one year of the date the permit was issued, and you must proceed diligently until the project is completed. The enclosed blue card must be completed and returned to this office as soon as you commence construction, no later than one year from the date the permit was approved.

We have enclosed a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit into a license.

Sincerely,

GARY SPACKMAN, Supervisor
Water Right Permits Section
