CONDITIONS/REMARKS:

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount which can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. Commercial use is for building supply store and office and watering of lawn associated with the building.

This license is issued pursuant to the provisions of Section 42-219, Idaho Code. Witness the seal and signature of the Director, affixed at Boise, this 17th day of OCTOBER, 1991.

RE: PERMIT NO. P65-12991

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

You should be aware that the groundwater you propose to divert is located within a drainage basin where surface waters are regulated during the months of low flow. It is possible that diversion of groundwater may have an adverse impact on these surface water flows. Information available to us at this time does not warrant refusing to issue permits in your area, but we do caution that diversions of groundwater are not allowed to deplete flows available for surface water users with earlier priority dates. Siting your well as far from surface sources as possible and casing out upper water producing zones may reduce the potential of interference.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

We have enclosed a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit. Also enclosed for your convenience is a form entitled "Proof of

RECORDED

FEB 27 1990

Beneficial Use" that must be submitted to the Department when your project is completed. If development is complete, you may submit proof of beneficial use immediately.

Sincerely,

GARY SPACKMAN, Supervisor

Re: Application for Permit

Dear Sir:

Your application for permit was received, reviewed, and is in processing. I apologize for the delay in contacting you, but the Snake River Basin Adjudication demands considerable time. Your preliminary priority date of 12/22/88 is not affected by Department delays.

The application is returned to you for additional information. Item 13 refers to an attached map, but no map was received. Please provide the map and complete the legal descriptions in items 3 and 9. Also, we need the names, titles, and addresses of officers, partners, or directors for an application in the name of a business. The last inquiry concerns the nature of use found in item 4. Commercial use is listed, but item 8 describes domestic use at the commercial site. Domestic use is appropriate for up to one-half acre of lawn use and internal use within the business related to bathroom, kitchen, etc. uses. The commercial label applies to water uses involved in production or manufacturing systems. Please enter the appropriate use in item 4.

By completing and returning the application within 30 days, the proposed water right will not be jeopardized. Please contact this office for additional help.

Sincerely,

Steve Lester
Sr. Water Resource Agent
