WATER RIGHT LICENSE
WATER RIGHT NO. 65-12949

Priority: November 23, 1988 Maximum Diversion Rate: 0.03 CFS
Maximum Diversion Volume: 1.8 AF

This is to certify, that DENNIS M CAMPBELL
MARY M LEVIN

RT 1 BOX 90A
MC CALL ID 83638

has complied with the terms and conditions
of the permit, issued pursuant to Application for Permit dated November 23, 1988; and
has submitted Proof of Beneficial Use on May 29, 1991. An examination indicates
that the works have a diversion capacity of .030 cfs of water from:

COLD CREEK tributary to BOULDER CREEK

source, and a water right has been established as follows:

<u>BENEFICIAL USE</u>	<u>PERIOD OF USE</u>	<u>RATE OF DIVERSION</u>	<u>ANNUAL VOLUME</u>
IRRIGATION	04/15 to 10/15	0.03 CFS	1.8 AF

CONDITIONS/REMARKS:

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount which can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. A lockable device subject to the approval of the Department shall be maintained on the diverting works in a manner that will provide the watermaster suitable control of the diversion.

This is to certify that I have examined Application for Permit to appropriate the public waters of the State of Idaho No. 65-12949, and said application is hereby APPROVED

1. Approval of said application is subject to the following limitations and conditions

a. SUBJECT TO ALL PRIOR WATER RIGHTS.

b. Proof of construction of works and application of water to beneficial use shall be submitted on or before June 1, 19 91.

c. The rate of diversion, if water is to be used for irrigation under this permit, when combined with all other water rights for the same land shall not exceed 0.02 cubic feet per second for each acre of land

d. The water right acquired under this permit if for hydropower purposes shall be junior and subordinate to all rights to the use of water, other than hydropower, within the State of Idaho that are initiated later in time than the priority of this permit and shall not give rise to any right or claim against any future rights to the use of water, other than hydropower, within the State of Idaho initiated later in time than the priority of this permit

e Other. A lockable device, subject to the approval of the Department, shall be installed on the diverting works in a manner that will provide the watermaster suitable control of the diversion prior to diversion of water under this permit.

Permit holder shall commence the excavation or construction of diverting works within one year of the date this permit is issued and shall proceed diligently until the project is complete.

Use of water under this permit is subject to control by the watermaster of State Water District No. 65D, Boulder Creek.

The maximum rate of diversion for irrigation purposes under this permit shall not exceed 0.03 cfs.

3. Narrative: Description (As operating at time of measurement Indicate pressure, number of sprinklers, etc.)

Cold Creek is used primarily in the spring and FALL when the irrigation ditch is dry. Approximately 1 1/2" PVC is pumped from Cold Creek by 1 h.p. General Electric pump near chicken coop. A short piece of 1 1/4" PVC is attached to hoses for irrigating 0.6 acre of lawn and garden area. Both lawn and garden are sprinkler irrigated. Since primary irrigation is from irrigation district ditch, this system from Cold Creek is seldomly used except in spring and fall.

H. REMARKS AND OVERLAP REVIEW ANALYSIS

OVERLAPS - (P/I & P/U) - same area but different P/U and P/D.

Measured flow was 0.03 cfs, while the theoretical calculated to be 0.1 cfs. Applicant is requesting 0.03 cfs on permit. Therefore recommend licensing for 0.03 cfs as requesting on permit.

The same pump is also used to pump irrigation water from 1 1/2" PVC gravity system during irrigation season.

PROOF ACKNOWLEDGMENT LETTER

RE: PERMIT NO. 65-12949

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit. The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water.

I note that the permit issued to you by the department requires the installation of a lockable device to allow the department to determine the rate of diversion. The proof which you submitted does not show that you have installed this equipment.

The installation of the lockable device must be complete by the time the department representative conducts the examination of your system unless the department has rescinded the requirement prior to the field examination. In some cases, the equipment requirement can be rescinded because the equipment cannot be physically installed, is not appropriate or can be accommodated with other measuring methods.

If you have questions concerning this matter, please feel free to contact the WESTERN Regional Office in Boise at (208)334-2190.

Sincerely,

Rita Fleck
Secretary/Records Manager

PROOF DUE NOTICE

RE: PERMIT NO. 65-12949

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before June 1, 1991. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

Rita Fleck
Secretary/Records Manager

RE: PERMIT NO. 65-12949

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

Be sure to note the special condition requiring you to install a lockable device that will provide the watermaster control on your diversion.

Please note the requirement that as a permit holder you must commence the excavation or construction of diverting works within one year of the date the permit was issued, and you must proceed diligently until the project is completed. The enclosed blue card must be completed and returned to this office as soon as you commence construction, no later than one year from the date the permit was approved.

We have enclosed a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit into a license.

Sincerely,

GARY SPACKMAN, Supervisor
