CONDITIONS/REMARKS:

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount which can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. Domestic use is for 3 homes.
6. Place of use is also known as Lot 61, Payette Lakes Cottage Sites.

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Application for Permit to appropriate the public waters of the State of Idaho No 65-12935, and said application is hereby APPROVED.

1 Approval of said application is subject to the following limitations and conditions:

a. SUBJECT TO ALL PRIOR WATER RIGHTS.

b. Proof of construction of works and application of water to beneficial use shall be submitted on or before June 1, 19 90

c. The rate of diversion, if water is to be used for irrigation under this permit, when combined with all other water rights for the same land shall not exceed 0.02 cubic feet per second for each acre of land.

d. The water right acquired under this permit if for hydropower purposes shall be junior and subordinate to all rights to the use of water, other than hydropower, within the State of Idaho that are initiated later in time than the priority of this permit and shall not give rise to any right or claim against any future rights to the use of water, other than hydropower, within the State of Idaho initiated later in time than the priority of this permit

e. Other: Permit holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code.

A 36" diameter, 11.6' long upended culvert is used to provide access to groundwater. (See Remarks about fairbury). The diversion is located in a pump house that is also used for 6512936 (lake water for irrigation). A 1/2 hp. pump is 1 1/2" line pump water from the culvert, through a pressure tank, and on to 3 cabins for interval use. The 1 1/2" line parallels the 1 1/2" irrigation line (see photograph #4), but the two water sources are not connected.

1 Volume Calculations for Irrigation

$V_{IR} = (\text{Acres Irrigated}) \times (\text{Irrigation Requirement}) =$ _____

$V_{DR} = [\text{Diversion Rate (cfs)}] \times (\text{Days in Irrigation Season}) \times 1.9835 =$ _____

$V = \text{Smaller of } V_{IR} \text{ and } V_{DR} =$ _____

2. Volume Calculations for Other Uses.

Domestic 3 cabins, interval use only:

$(3)(.6) = 1.8$ Afa

$.06$
 $(.07)(365)(1.9835) = 50.7$

note: cfs: Allow .07 cfs
 a) hp equation = .06 cfs
 b) expert well designed system with 1 1/2" pipe at 5 fpm to yield $(5)(\pi)(.75)^2 = .06$ cfs

H. REMARKS AND OVERLAP REVIEW ANALYSIS

Plu AKA Lots 59-62 of Payette Lakes Cottage Stry.

Domestic use is for in-house use for 3 homes.

Source: Although this is a groundwater right, the source appears to be directly related to the lake. The "well" is not really a well but is groundwater approx. 30' from lake and only about 5' below L.S.O. The water level rises & falls with the lake level according to B. Smyth. Recommend that (a) show tributary as Big Payette Lake, and (b) include watermaster control condition. If not (a) then at least (b) should be included in license. Advantage of including (a) is to create an easy way to incl. such rights in database. This would be useful in conjunctive mgt. of ground & surface waters that are related.

I. RECOMMENDATIONS

1 Recommended Amounts

Beneficial Use	Period of Use		Rate of Diversion Q (cfs)	Annual Volume V (afa)
	From	To		
Domestic	1/1	12/31	.06	1.8
Totals:			.06	1.8

2. Recommended Amendments

RE: PERMIT NO. 65-12935

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

You should be aware that the groundwater you propose to divert is located within a drainage basin where surface waters are regulated during the months of low flow. It is possible that diversion of groundwater may have an adverse impact on these surface water flows. Information available to us at this time does not warrant refusing to issue permits in your area, but we do caution that diversions of groundwater are not allowed to deplete flows available for surface water users with earlier priority dates. Siting your well as far from surface sources as possible and casing out upper water producing zones may reduce the potential of interference.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

We have enclosed a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit. Also enclosed for your convenience is a form entitled "Proof of
