H. REMARKS AND OVERLAP REVIEW ANALYSIS

65-12915 and this permit overlap point of diversion. They share water from the same well for two different commercial uses. 65-12915 is a woodworking shop and this permit use is for an autobody shop. The other rights in same PP do not affect this permit.

The combination of this permit and 65-12915 shall not exceed .03 cfs, the capacity of the diversion system. and 7 afa
No irrigation found.

Rate for combination of 65-12915 & 65-12930 not to exceed .03 cfs.

(Found no reason to limit flow below system capacity)

RE: PERMIT NO. 65-12930

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

Please note the requirement that as a permit holder you must commence the excavation or construction of diverting works within one year of the date the permit was issued, and you must proceed diligently until the project is completed. The enclosed blue card must be completed and returned to this office as soon as you commence construction, no later than one year from the date the permit was approved.

We have enclosed a form entitled "Instructions for Proof of

Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit into a license.
