PERMIT # 65-12929
SUPPLEMENTAL INFORMATION SHEET:

The permit lists the wrong township, section and quarter/quarter. Also incorrect is the reference to the Ski Ranch # 2 subdivision. In conversing with Mrs. Owsley, the selection of the legal description was based upon a well log that they received from the previous owner. Unfortunately the well log is for property in McCall. The incorrect well log is currently attached to the "Proof of Beneficial Use" form.

The property description under section 8 describes the use found and therefore I based the validity of the permit upon those facts and recommend the amendments to the legal description to match the physical facts found.

I was unable to locate a well log that matched the property described but other logs within the same subdivision indicate that the static water level should be from 15 to 30 feet. This was the basis used for the theoretical calculation for the rate of diversion.

RE: PERMIT NO. 65-12929

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

You should be aware that the groundwater you propose to divert is located within a drainage basin where surface waters are regulated during the months of low flow. It is possible that diversion of groundwater may have an adverse impact on these surface water flows. Information available to us at this time does not warrant refusing to issue permits in your area, but we do caution that diversions of groundwater are not allowed to deplete flows available for surface water users with earlier priority dates. Siting your well as far from surface sources as possible and casing out upper water producing zones may reduce the potential of interference.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

We have enclosed a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit.

Sincerely,

GS: SC
