PLACE OF USE: STOCKWATER, same as IRRIGATION use

CONDITIONS/REMARKS:

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount which can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Application for Permit to appropriate the public waters of the State of Idaho No 65-12849, and said application is hereby APPROVED

1 Approval of said application is subject to the following limitations and conditions

a SUBJECT TO ALL PRIOR WATER RIGHTS

b Proof of construction of works and application of water to beneficial use shall be submitted on or before September 1, 1989.

c The rate of diversion, if water is to be used for irrigation under this permit, when combined with all other water rights for the same land shall not exceed 0.02 cubic feet per second for each acre of land.

d The water right acquired under this permit if for hydropower purposes shall be junior and subordinate to all rights to the use of water, other than hydropower, within the State of Idaho that are initiated later in time than the priority of this permit and shall not give rise to any right or claim against any future rights to the use of water, other than hydropower, within the State of Idaho initiated later in time than the priority of this permit.

e. Other:

This permit is subject to the agreement dated 8/15/88 between permit holder and protestant(s) to the extent such agreement covers matters within the jurisdiction of the Department of Water Resources.

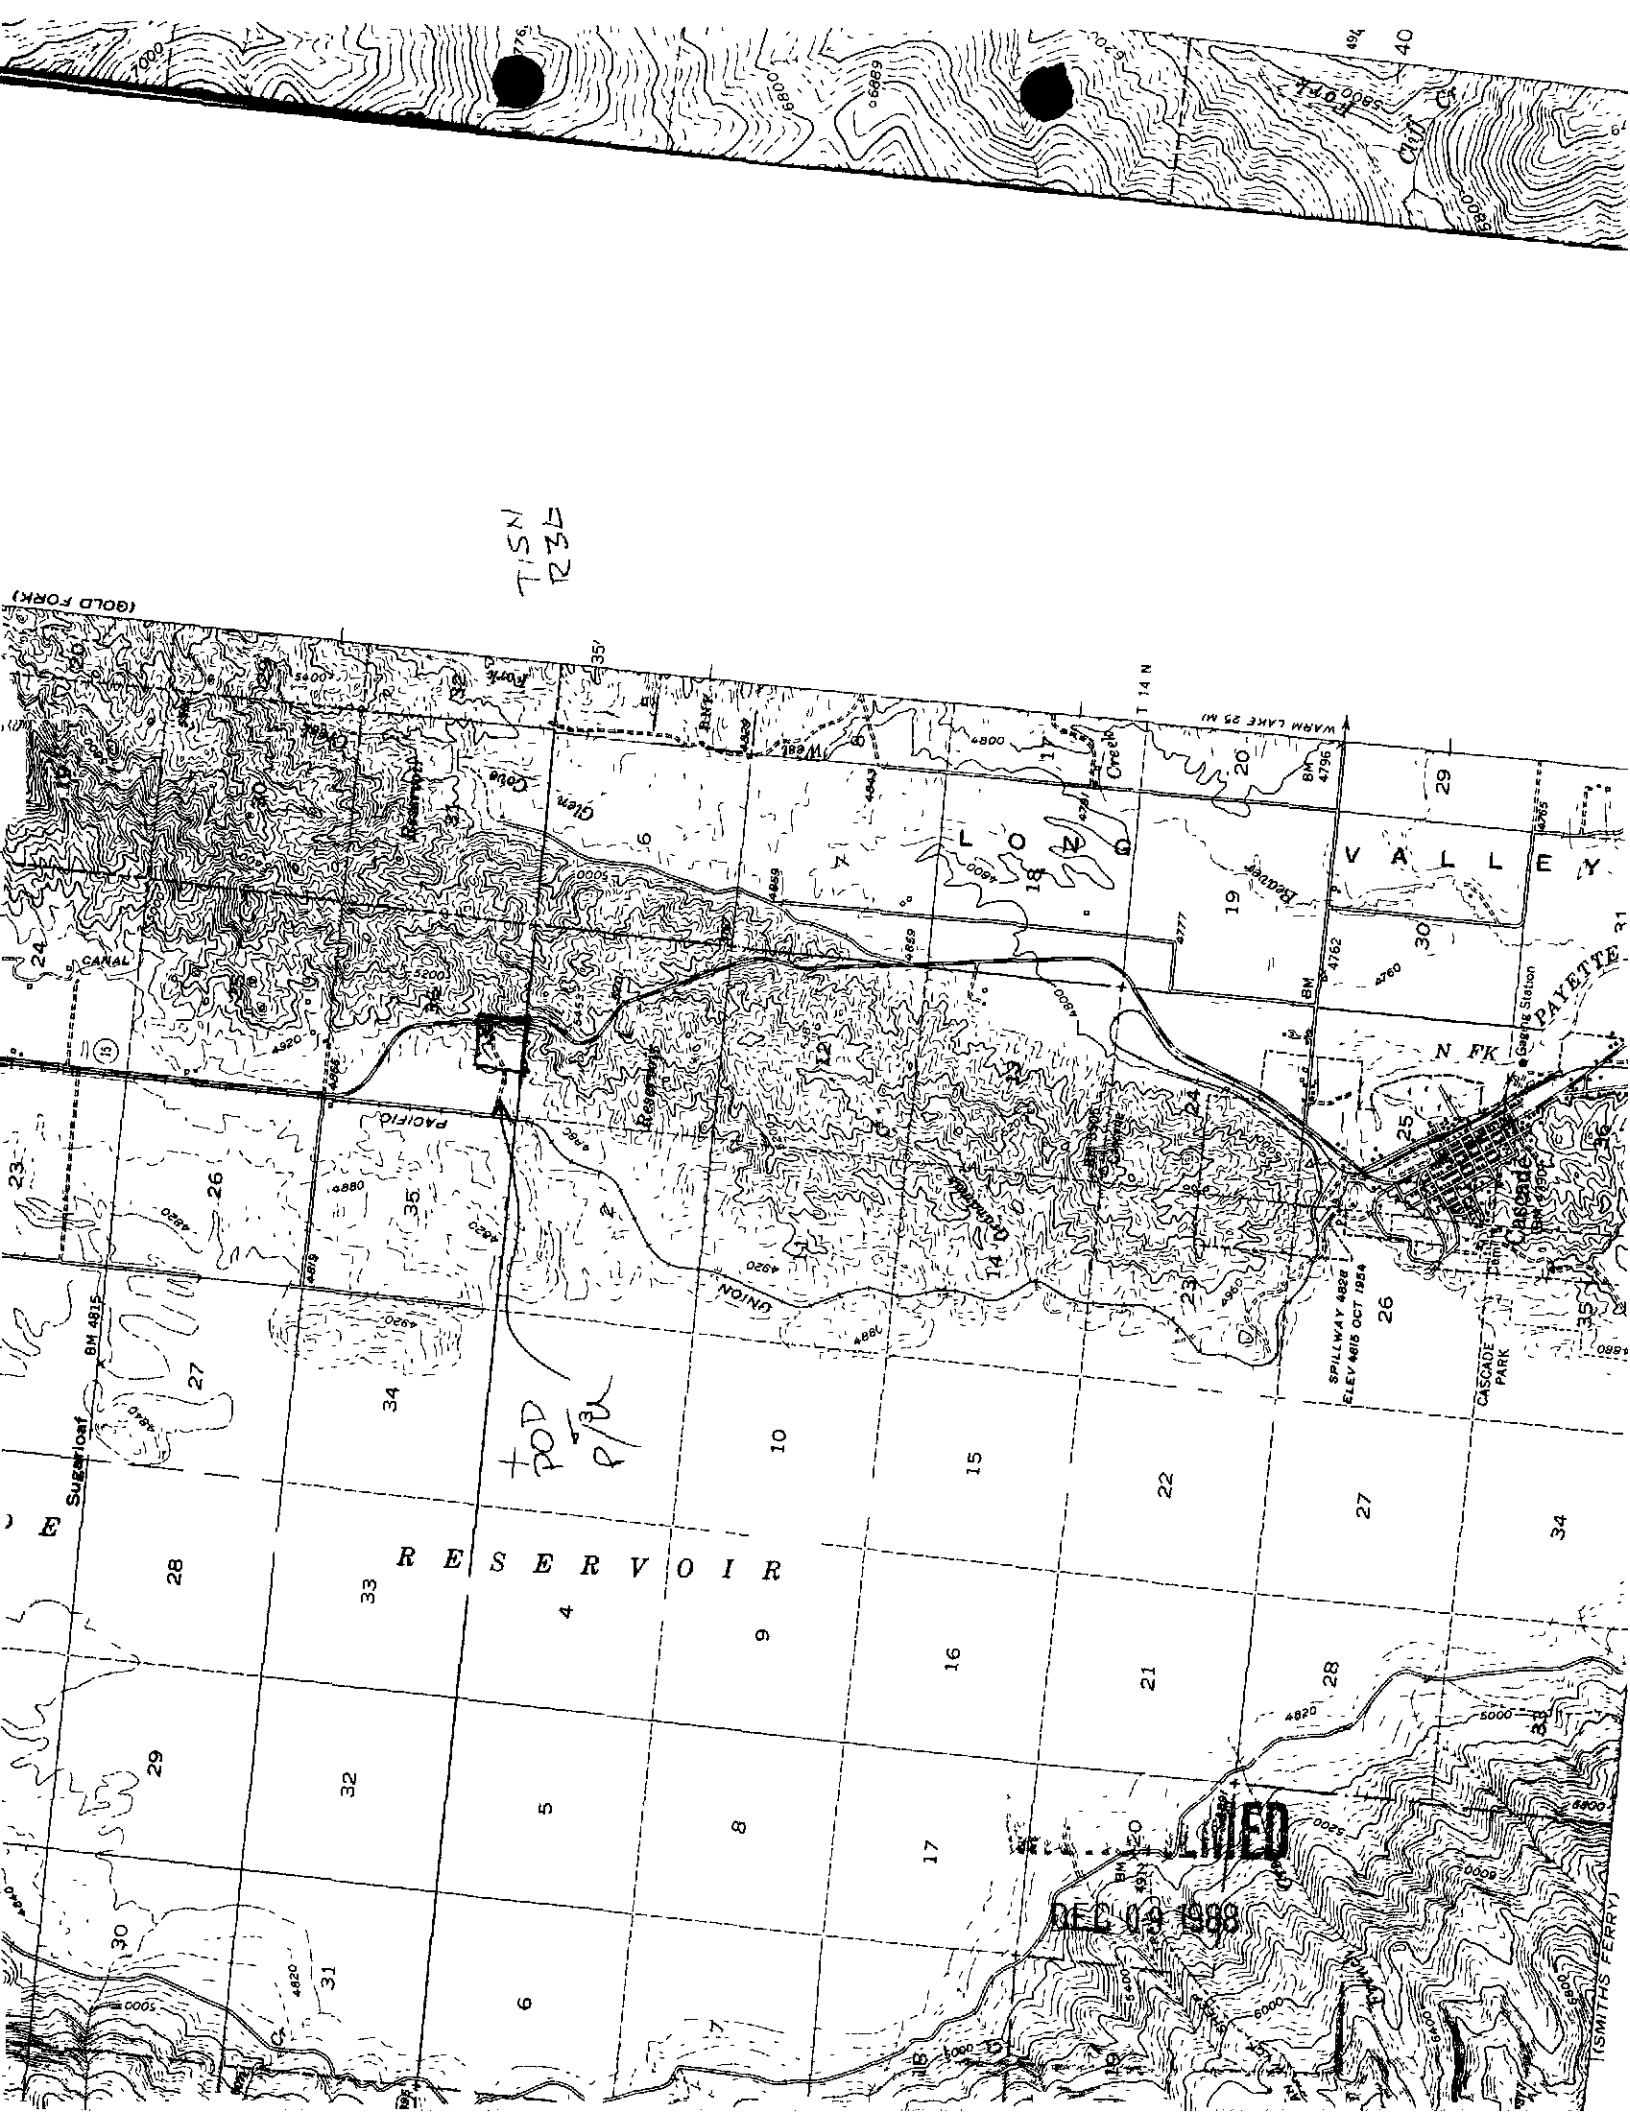

Use of water under this permit is subject to control by the watermaster of State Water District No. 65, Payette River.

The system consists of a pond that holds approx. 65 AF and receives overflow water from a neighbors pond through an 8" buried pipe. The source of the neighbors water is an unnamed stream and seepage spring water. Water is released from the pond through a headgate to a ditch and from the ditch for irrigation by placing boards in a check box. A second ditch joins the main ditch and also contains a check box. The second ditch also flows from the neighbors property and receives spring seepage and

G. VOLUME CALCULATIONS

1. Volume Calculations for Irrigation:

$V_{IR} = (\text{Acres Irrigated}) \times (\text{Irrigation Requirement}) = 3.7 \text{ acres} \times 3.0 = 11.1 \text{ AF}$

$V_{DR} = [\text{Diversion Rate (cfs)}] \times (\text{Days in Irrigation Season}) \times 1.9835 = .17 \times 183 \times 1.9835 = 61.7 \text{ AF}$

$V = \text{Smaller of } V_{IR} \text{ and } V_{DR} = 11.1$

2. Volume Calculations for Other Uses:

4 head of horses & cattle: $4 \times 12 \times 365 = 17,520 \div 325,850 = .05 \text{ AF}$

80 head range cows for 7 days: $80 \times 12 \times 7 = 6,720 \div 325,850 = .02 \text{ AF}$

.07 AF

H. REMARKS AND OVERLAP REVIEW ANALYSIS

and runoff irrigation water. The method of irrigation is gravity flow but the owner indicated he can place a 3Hp pump in the pond and sprinkle irrigate high spots if necessary. The pump was not in place during the exam. An average of 4 head of livestock is maintained year around and 80-100 range cows for 7 days each year.

The overlapping rights affect this permit because this permit only receives water if there is overflow from the Hall property that lays East of this property. The 5 gallon bucket flow measurement was made below the county road on the West because all sources were combined at that point to give the most accurate amount available for this permit.

PROOF DUE NOTICE

RE: PERMIT NO. 65-12849

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before September 1, 1989. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

Rita Fleck
Secretary/Records Manager

Re: Application for Permit No. 65-12849

Dear Mr. & Mrs. Winkle:

Enclosed is a copy of a protest(s) filed against the issuance of a permit pursuant to your Application No. 65-12849. The Department suggests you contact the protest(s) and to attempt to resolve the protest(s) and to attempt to resolve the protest(s).

If this office has not been advised within twenty (20) days that the protest(s) has been resolved, the matter will be scheduled for conference and/or hearing. At such a conference and/or hearing, the following are the principle items the Department can consider in either approving or denying the application for permit (Section 42-203, Idaho Code):

1. Will the proposed use reduce the quantity of water under existing water rights?
2. Is the proposed water supply insufficient for the purposes intended?
3. Is the application made in good faith or for delay or speculative purposes?
4. Has the applicant sufficient financial resources which to complete the project?
5. Will the proposed use under this permit conflict with the local public interest?

If this office can be of further assistance, please contact us.

Sincerely,

DAVID R. TUTHILL, JR., P.E.
