CONDITIONS/REMARKS:

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount that can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. A measuring device and lockable controlling works of a type acceptable to the Department shall be permanently installed and maintained as part of the diverting works.
6. Use of water under this water right will be regulated by the watermaster of State Water District No. 65K.
7. This right when combined with Rights 65-02602 and 65-03334 shall provide no more than .02 cfs per acre nor more than 3.0 afa per for the lands above.

To provide additional time in which to submit proof
of beneficial use for a water right permit

Department of Water Resources

The Idaho Department of Water Resources will consider this form as a request that the permit holder(s) be granted an additional period of time in which to complete development of a water right under the provisions of Section 42-204, Idaho Code.

Permit No. 65-12811

Name(s) of Permit Holder: Lester D. Scheline

headgate and pump.

Costing \$ 4,000

The permit holder(s) has been unable to complete the remainder of the work for the following reasons:

Lack of time. Only one year for development was given by the permit approval. Weather
turned bad before the project was complete. This is in a wooded area. There was a wind
storm that blow down a great deal of timber. That needed to be cleaned out before a backhoe
could work on the buried pipeline.

Permit holder(s) request an extension to December, 19 89. Lester D. Scheline

POWER OF ATTORNEY MUST BE SUPPLIED.

ACTION OF THE DEPARTMENT OF WATER RESOURCES

IT IS HEREBY ORDERED that the above request for extension of time be APPROVED and the time within which to submit proof of beneficial use is extended to December 1, 1989.

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Application for Permit to appropriate the public waters of the State of Idaho No. 55-12811, and said application is hereby APPROVED

1 Approval of said application is subject to the following limitations and conditions

a. SUBJECT TO ALL PRIOR WATER RIGHTS.

b. Proof of construction of works and application of water to beneficial use shall be submitted on or before December 1, 19 88

c. The rate of diversion, if water is to be used for irrigation under this permit, when combined with all other water rights for the same land shall not exceed 0.02 cubic feet per second for each acre of land

d. The water right acquired under this permit if for hydropower purposes shall be junior and subordinate to all rights to the use of water, other than hydropower, within the State of Idaho that are initiated later in time than the priority of this permit and shall not give rise to any right or claim against any future rights to the use of water, other than hydropower, within the State of Idaho initiated later in time than the priority of this permit

e. Other

The issuance of this permit in no way grants any right-of-way or easement across the land of another.

A measuring device and lockable controlling works of a type acceptable to the Department shall be permanently installed and maintained as part of the diverting works.

Use of water under this permit is subject to control by the watermaster of State Water District No. 65K, Lake Fork Creek.

PROOF ACKNOWLEDGMENT LETTER

RE: PERMIT NO. 65-12811

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit. The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water.

If you have questions concerning this matter, please feel free to contact the WESTERN Regional Office in Boise at (208)334-2190.

Sincerely,

Rita Fleck
Secretary/Records Manager

as of November 29, 1989 This project,
permit # A 65-12811 is completed,
however since the headgate and
pump are located below water level
of the unnamed stream or source
of supply, they are removed during
winter months. No need for them
submerged under water and rusting

PROOF DUE NOTICE

RE: PERMIT NO. 65-12811

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before December 1, 1989. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

Rita Fleck

To: Dave Tuthill *DT*
From: Brad Dingee
Date: December 8, 1987
Subject: Pre-permit Exam, Application No. 65-12811

On December 3, 1987, I met with Lester Scheline at his property near Donnelly to clarify his water use. I have prepared the attached topographic map which shows the location of Mr. Scheline's property, points of diversion and major ditches.

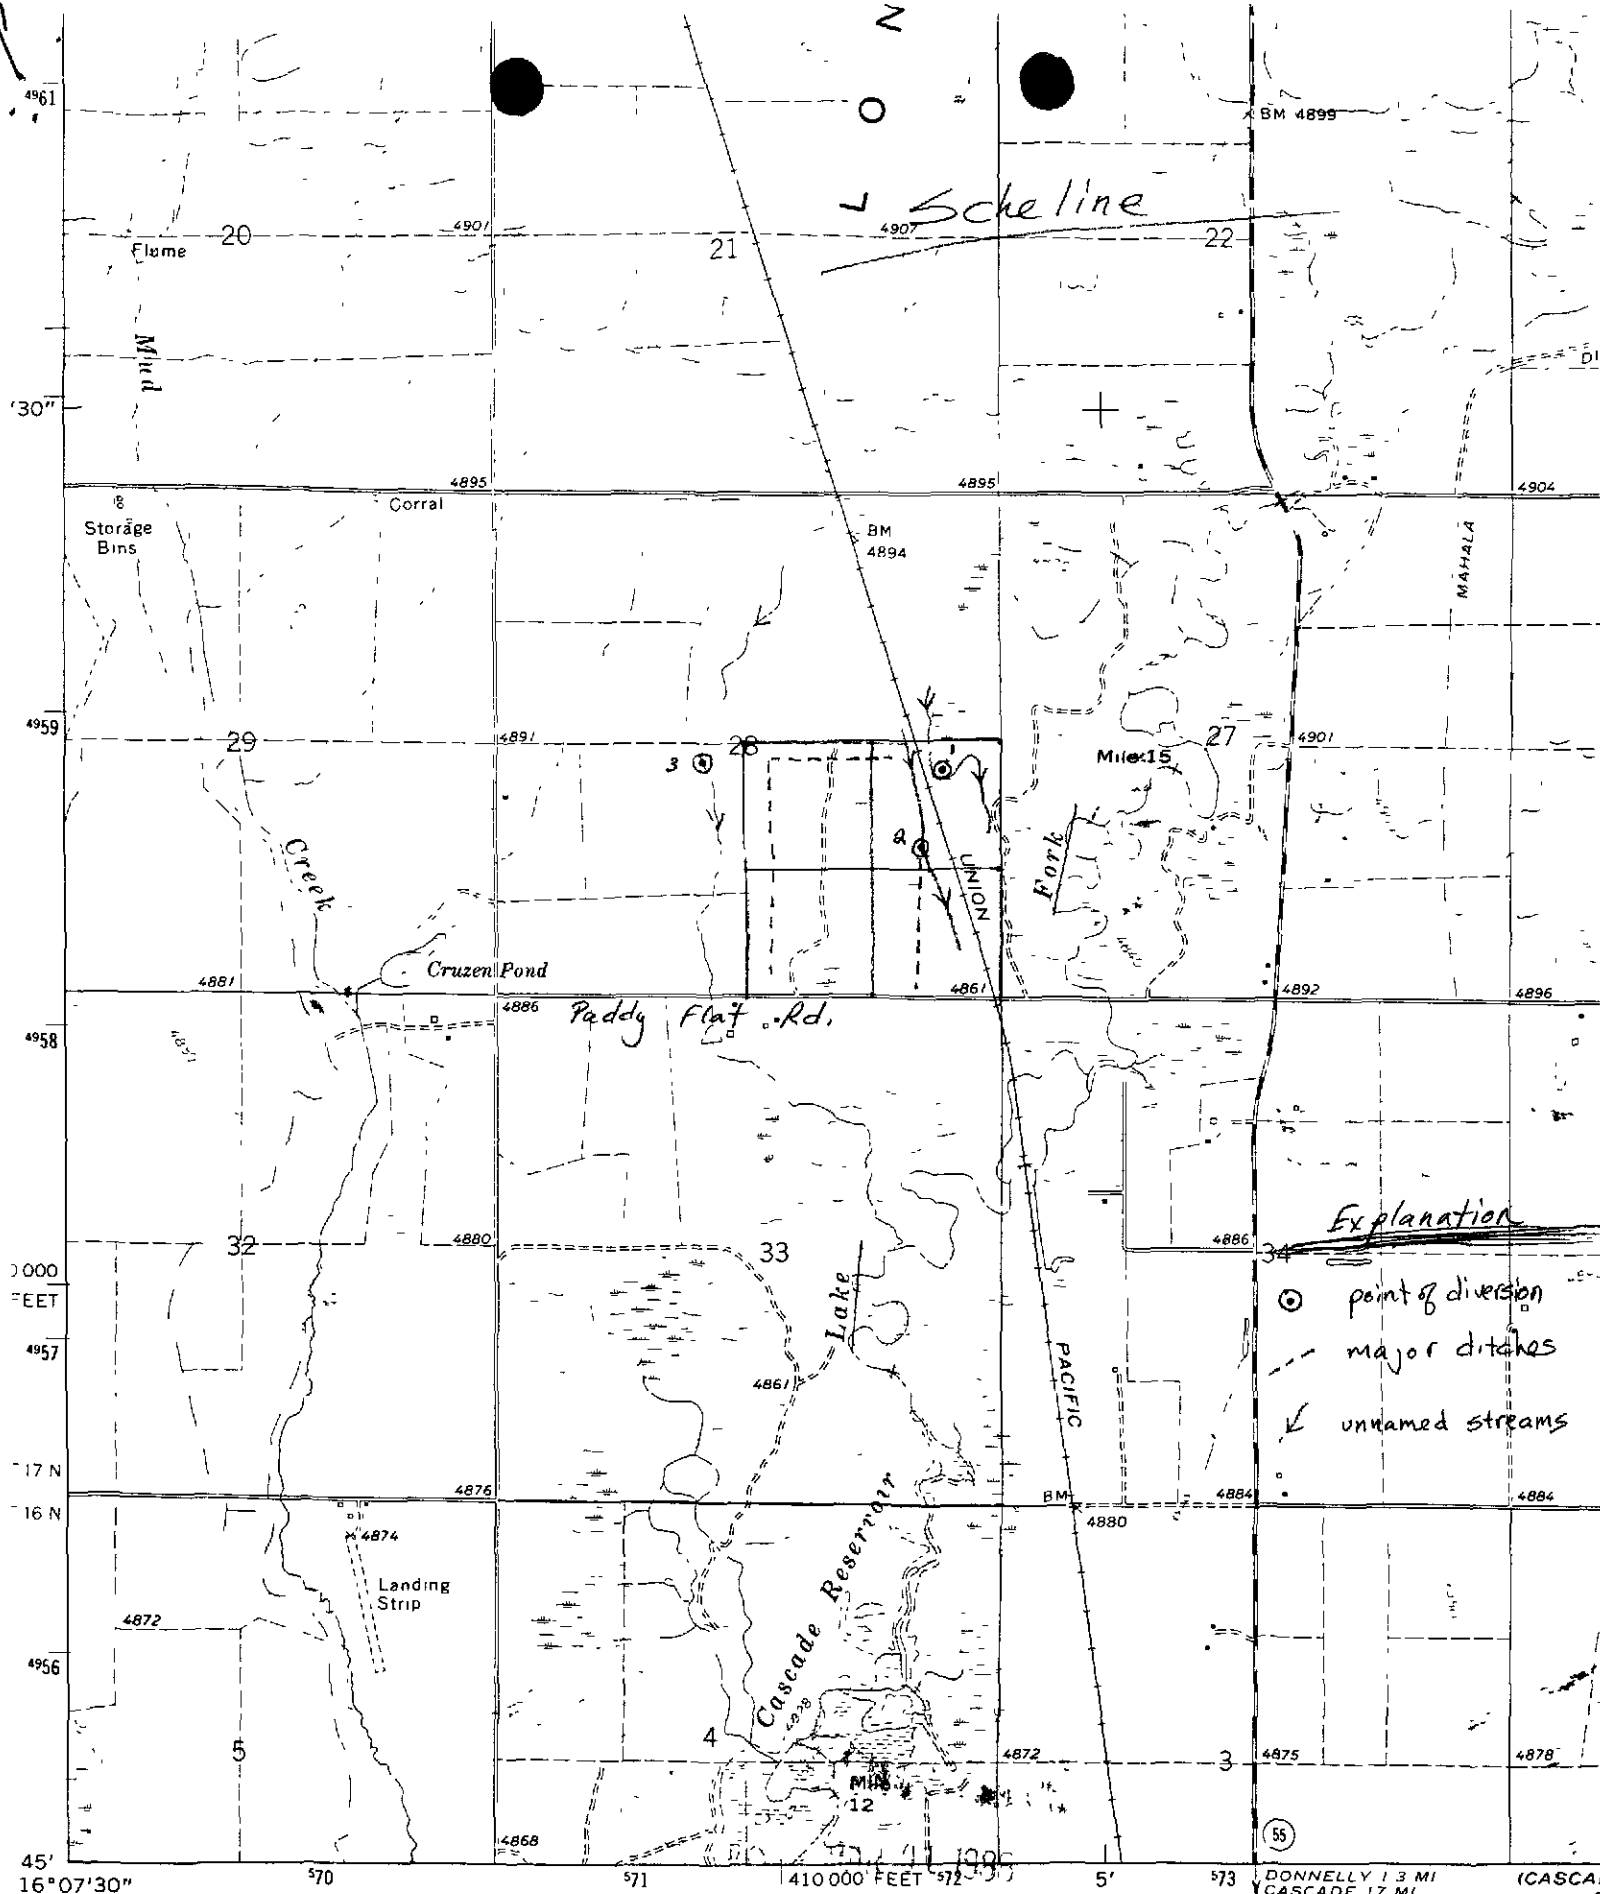

Two decreed water rights with unnamed stream sources are appurtenant to this land. Points of diversion 1 and 2 on the attached map are the diversion points for decreed rights 65-2602 and 65-3334, respectively. These unnamed streams contain irrigation waste water from land to the north as well as natural runoff. Water is pumped from these diversions and distributed on the property via ditches.

Point of diversion No. 3 is the diversion location for Application No. 65-12811. Mr. Scheline stated that irrigation practices to the north of his property control whether waste water flows within the streams he has previously filed upon (i.e. rights 65-2602 and 65-3334). In the past, this waste water has been completely diverted into the stream in which he proposes to locate the diversion for 65-12811, with no water available for his decreed rights. Thus, this new application has been filed so that water is available to his property regardless of irrigation practices to the north.

After my contact with Mr. Scheline, I spoke with Art Bollar (Watermaster, District 65-K). Mr. Bollar stated that his only concern with this application is that there are senior users downstream from the proposed diversion. During my inspection, Mr. Scheline said that he has spoken with these senior water users and agreed to divert water only when there is sufficient water remaining for downstream senior users. He understands that his permit, if approved, will be junior to these downstream rights.
