A submersible pump was located in the south fork of the Fayette River. A 1 1/4" line directed the water approx. 80' in altitude to the place of use. The line was attached to a valve from which 4 3/4" hoses with sprinklers were also attached. When the valves to all four hoses were closed, a pressure gauge measured 70 psi. The water was used in a lawn and ornamental grasses. Total acreage = $180' \times 140' / 43560 = .6$ acres. A well is used for internal domestic purposes.
