Gentlemen:

Re: Permit No. 65-12692

This office acknowledges receipt of the partial assignment conveying this permit to both of you. The partial assignment has been entered into the department's records. A copy of the permit is enclosed for your records.

Also, this office acknowledges receipt of the statement of beneficial use submitted for the permit. Before a license can be issued, a field examination must be made by a representative of this department. We cannot tell just when this examination will be made, but our examiner will contact you to schedule the exam at a convenient time.

If you have any questions regarding the field examination, please contact our Western Regional office at 334-2190.

Sincerely,

RITA I. FLECK
Secretary/Records Manager

PROOF DUE NOTICE

RE: PERMIT NO. 65-12692

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before January 1, 1989. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

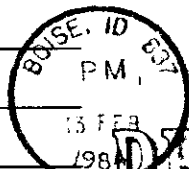

Rita Fleck
Secretary/Records Manager

Marc W. Anderson

McCall, ID 83638

Dear Mr. Anderson:

Enclosed is a copy of your approved Application for Permit. We direct your attention to the conditions of approval on the fourth page.

Please be advised that there is insufficient natural flow available in the spring and tributaries to provide water for a new appropriation throughout the entire season of use. During the spring run-off each year, there may be a period of time in which the prior rights to the use of the natural flow and storage are filled leaving water available for your permit. As the natural flow diminishes, however, there may be no water available for your right unless you arrange for an additional source of water as a supplemental supply.

The 1982 Idaho Legislature added a requirement ~~that~~ as a permit holder you must commence the excavation or construction of diverting works within one year of the date the permit was issued, and you must proceed diligently until the project is completed. The enclosed blue card must be completed and returned to this office as soon as you commence construction, no later than one year from the date the permit was approved.

We have enclosed instructions entitled "Making Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit into a license.

Sincerely,

JIM JOHNSON
Water Distribution Supervisor

Dear Mr. Anderson:

We are now processing your application, but before we can continue more information is needed.

In order to put .02 cubic feet per second for stockwater purposes there needs to be stock actually drinking from the spring or a small stream from the developed spring. If the spring is piped, flows or subs up into the pond with cattle drinking only from the pond, then storage for stockwater and stockwater from storage with an acre-foot amount needs to be shown.

Another problem is that the point of diversion shown on your map does not coincide with that listed on the application. The map shows the NESE, Sec. 27, and the front page of the application lists the NWSE, Sec. 27. Please check your legal description for the correct quarter-quarter and return the application to us with the description of your water system. Any necessary changes can then be made and the application processed.

If you have any questions, please do not hesitate to contact us.

Sincerely,

Jan Grover
