CONDITIONS/REMARKS:

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount which can actually be beneficially used. The maximum diversion volume may be adjusted to reflect cropping patterns or acceptable standards of water delivery efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.

This license is issued pursuant to the provisions of Section 42-219, Idaho Code. Witness the seal and signature of the Director, affixed at Boise, this 8th day of FEBRUARY, 1990.

Re: Water Right Permit 65-12659

Dear Mr. Dingee:

I am writing in answer to your letter of February 18, 1987 to Bishop David G. Smith regarding the above referenced matter.

Mr. Lester was given some erroneous information while conducting the field examination. Water from the well is used for irrigation purposes only, and not for domestic purposes. The domestic water for the church building comes from city water. Therefore, as I understand it, there is no need to file an additional water right application. If anything further is needed, please advise.

Very truly yours,

Re: Permit No. 65-12659

Gentlemen:

I telephoned your offices today and discussed the above-referenced matter with Mr. Brad Dingee. He advised me to send a completed Examination Fee Information sheet to your office, but that since the application on this permit is for only .03 cfs, no fee is required. Therefore, on the basis of that conversation, I am enclosing herewith the completed Examination Fee Information sheet, but no fee, in the above-referenced matter.

If you have questions or anything further must be done, please advise.

Very truly yours,

CERTIFIED MAIL

EXAMINATION FEE NOTICE

Dear Permit Holder:

Department records show that proof of beneficial use has been submitted for the above-referenced permit, but that a field examination has not yet been conducted to determine the extent of beneficial use of the water for licensing purposes.

House Bill 671 (effective April 4, 1986) enacted by the 1986 Idaho Legislature requires the payment of a fee before this department can conduct the field examination needed to issue a license confirming use of water under the permit. This letter is notification that the license examination fee is due within sixty (60) days of the date of this letter. The examination fee information sheet (enclosed) must be returned with the fee.

As an alternative to submitting the fee, the department will accept a field examination report completed by a certified water right examiner from the private sector. If you choose to have the examination done by a certified water right examiner, you need not submit the license examination fee to the department, but you must within sixty (60) days of the date of this letter return to the department, the examination fee information sheet showing appropriate information together with a statement from the certified examiner to verify that you have retained a certified examiner to conduct the field examination. If you choose this alternative, a completed field examination report must be submitted within one year of the date of this letter. You cannot later change your decision to use this alternative and submit the fee for the department to conduct the field examination, but you may change to another certified examiner.

FEB 27 1990

Certified water right examiners are licensed engineers, geologists, or land surveyors certified by the department to conduct water right examinations. The procedure for certifying examiners results from the recently enacted HB 671 and is being developed at this time. A listing

of certified water right examiners will be available from this department when examiners have been certified.

If your permitted use, in fact, has already been examined by the department and you have not asked to have the examination repeated, the fee requirement is not applicable to your permit. If you believe this is the case, please contact the department.

The license examination fee is to be based on the amount of water you indicate you have developed, as listed in item 6 on the examination fee information sheet. The amount of water on which the examination fee is based can be less than the permitted amount, if less water has been diverted and beneficially used. The licensed amount of water, however, will not exceed the amount you claim on the examination fee information sheet. The enclosed license examination fee schedule shows a listing of applicable fees.

FAILURE TO SUBMIT WITHIN THE SIXTY (60) DAY PERIOD, THE FEE OR THE STATEMENT THAT A CERTIFIED EXAMINER HAS BEEN RETAINED TO MAKE THE FIELD EXAMINATION, WILL BE CAUSE TO ADVANCE THE PRIORITY OF THE PERMIT ONE DAY FOR EACH DAY THAT THE FEE SUBMITTAL IS LATE.

FAILURE TO SUBMIT THE FEE OR THE COMPLETED FIELD EXAMINATION REPORT WITHIN A YEAR WILL BE CAUSE TO CONSIDER THE PROOF OF BENEFICIAL USE TO BE INCOMPLETE AND TO LAPSE THE PERMIT.

The attached examination fee information sheet and the fee may be submitted to the following department offices.

Re: Permit No. 65-12659

This office acknowledges receipt of the statement of beneficial use postcard submitted for this permit.

Before a license can be issued, a field examination must be made by a representative of this department. We cannot tell just when this examination will be made, but our examiner will try to contact you at the time he makes the examination so that you or a representative may show him the system.

If you have any questions regarding the field examination, please contact our Western Regional office at 334-2190.

Rt. 1, Box 1339

Dear Mr. Christensen:

In the final review of your application for permit, a question was brought up concerning the amount of water you have filed on.

For 1 acre of irrigation we normally allow 0.03 cubic feet per second which is $1\frac{1}{2}$ inches of water per acre. The 0.10 cfs amount you have filed on is in excess of this amount. This is the same as 5 inches of water per acre or enough water for 5 acres of irrigation. Therefore, unless you have some justification for the 0.10 cfs amount, we can only process the permit for 0.03 cfs.

If we do not hear from you on the matter within two weeks, the application will be processed with 0.03 cubic feet per second. Don't hesitate to contact us if you have any questions.

Sincerely,

Jan Grover
