Dear Mr. Gardner:

Re: Permit No. 65-12560

Returned is the Proof of Beneficial Use form along with your check No. 1038 (92-9/1241) in the amount of \$50.00. Both of these documents were submitted to this office on November 13, 1987.

There is a discrepancy between the source of the water indicated on the permit, groundwater (well), and the source of the water indicated on the proof, spring. Has a well been drilled as proposed by this permit? If so, also indicate the amount of water being diverted and when the water was first diverted and put to a beneficial use. Correct the proof form and return it and the fee as soon as possible. The permit lapsed and is losing a day of priority for every day an unacceptable form is not received.

If this well has not been drilled, you may wish to submit a request for an extension of time. Assuming that an extension could be granted based on the provisions of Sec. 42-204, Idaho Code, an additional period of time would be granted to complete this project. Enclosed for your convenience is an extension form and instruction sheet. Again, this permit lapsed and a response should be returned immediately.

If you have any questions concerning this matter, please feel free to contact me.

Sincerely,

RITA I. FLECK
Secretary/Records Manager

LAPSE NOTICE

RE: Permit No. 65-12560

Dear Permit Holder:

You are hereby notified that under the provisions of Section 42-218a, Idaho Code, the above referenced water permit has lapsed. This office did not receive either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time. You were provided the proper forms in our proof due notice to you dated July 31, 1987.

Your permit cannot be reinstated unless you submit proof of beneficial use or submit an extension of time request showing reasonable cause for delay. Either the completed proof of beneficial use submittal (including the examination fee or a completed field examination report) or the extension request form together with the \$15 fee must be received by this Department within sixty days of the date of mailing of this lapse notice.

A proof of beneficial use form and a request for extension of time form are again enclosed for your use. Please note that only one extension of time can be granted unless the project has not been completed because of lack of a necessary approval by a governmental agency or by litigation which might bring title to the water in question.

Sincerely,

L. GLEN SAXTON
Chief, Operations Bureau

PROOF DUE NOTICE

RE: Permit No. 65-12560

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before October 1, 1987. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a completed field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this Department on or before the above described proof due date, or the permit will no longer be of any force nor effect.

Sincerely,

RITA FLECK

DEAR PERMIT HOLDER:

ENCLOSED IS A COPY OF YOUR APPROVED APPLICATION FOR PERMIT. WE DIRECT YOUR ATTENTION TO THE CONDITIONS OF APPROVAL ON THE FOURTH PAGE.

65-11403 is for water from a spring for dom. & 10 acres of irrigation. However, Don Stoff has stated the spring barely produces .00 cfs of water & is used for very little irrigation. 65-11409 is for an old well that is no longer used. The new well is a replacement well, however, irrigation was added to the right.
