ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Application for Permit to appropriate the public waters of the State of Idaho No. 65-12536, and said application is hereby APPROVED.

1. Approval of said application is subject to the following limitations and conditions:

a. SUBJECT TO ALL PRIOR WATER RIGHTS.

b. Proof of construction of works and application of water to beneficial use shall be submitted on or before September 1, 19 87.

c. The rate of diversion, if water is to be used for irrigation under this permit, when combined with all other water rights for the same land shall not exceed 0.02 cubic feet per second for each acre of land.

d. Other: Permit holder shall commence the excavation or construction of diverting works within one year of the date this permit is issued and shall proceed diligently until the project is complete.

Use of water under this permit is subject to control by the watermaster of State Water District No. 65, Payette River.

Witness my hand this 16th day of September, 1982.

A. Glen Saxton

RE: Water Right No. 65-12536

Dear Water Right Holder(s):

Department water right records show that you divert water from the Snake River or its tributaries under a water right that has a priority date later than December 29, 1976. This is the priority of the established minimum stream flow of the Snake River at the Weiser Gage (Weiser) in the amount of 4,750 cubic feet per second.

Because of the continuing drought conditions in the Snake River Basin, department hydrologists project that during 1992, there could be periods when the required minimum flow will not be satisfied due to low flows of the Snake River. The department urges you to not divert at a higher rate than authorized by your water right and to not use your right in any manner different than authorized. In addition, when the minimum flow will not be satisfied or is not being satisfied, you are required to cease diverting water under your water right, because your right is of later priority than the minimum stream flow at Weiser.

If the department determines the minimum flow will not be satisfied, the department will advise you and will provide as much lead time as possible in requiring that you temporarily cease your diversion of water. The greatest likelihood for this to occur is during a period from mid-June to late June.

While the department expects good cooperation from junior water right holders, water users should be aware that Section 42-352, Idaho Code, provides for penalties of up to \$100 per day for unauthorized diversions of water.

The department has contacted both the Idaho Power Company and the U.S. Bureau of Reclamation with respect to the timing of storage releases from upstream reservoirs for flow enhancement

purposes. This type of coordination could minimize the impact on existing water users and reduce the need to curtail diversions.

The department has scheduled public information meetings relative to this potential regulation as follows:

Mountain Home - June 4, 1992 - 10:00 a.m. - gymnasium at
North Elementary School, 290 E. 12th N.

Caldwell - June 4, 1992 - 7:00 p.m. - Ballroom in the
Student Union Building, Albertson College of Idaho,
2112 Cleveland

If you have questions concerning this letter or wish to provide the name of a different contact person or address to receive department correspondence, please contact the department.

Sincerely,

L. GLEN SAXTON
Chief, Water Allocation Bureau

MEMORANDUM

TO:FILE #65-12536

FROM:ROXANNE MCCARTHY

RE: ADDITIONAL BENEFICIAL USE

DATE: 9-MAR-1989

=====

The field examiner proposes the addition of a recreation component to this right. An amendment is referred to in the exam but is not in the file at this time. A change in the nature of use is acceptable if it can be shown that the change does not alter permitted rate, volume or consumptive use.

	Rate(cfs)	Acres	AFA	Consumptive Use
Permitted Use	0.12	4.0	12.0	9.6 AF
Use Found	0.04	2.7	8.1	6.8 AF
Remaining	0.04	N/A	3.9	2.8 AF
Proposed Use	0.01	N/A	0.1	N/A

It can easily be seen that the addition of a recreation component does not increase water use as permitted. I recommend that the addition be allowed.

TO
GARDENA
BRIDGE

System Description (continued)

3. Narrative: Description (As operating at time of measurement. Indicate pressure, number of sprinklers, etc.)

Three pumps and a headgate provide irrigation and recreation uses on this land. Pumps 1 & 2, located in pump house, provide water to south field, yard, and garden via 1" lines. Pump 3, somewhat larger and powered by a diesel tractor, employs a 3" line for the north field. The headgate and 8" culvert form the fourth diversion from Brownlee Creek. Two small ponds that begin 10' from creek are connected by an 8" culvert. Water is returned to the creek via another 8" culvert (15' long). Ponds are for recreation use. The creek usually dries up by late summer. Current measurements represent probable maximums. Surface water use under this permit compliments similar uses under license 65-12276, ☐ See Remarks on page 4 for continuation groundwater (generally, surface and groundwater uses are consecutive but not concurrent).

<i>Sprinkler gauge</i>					<i>100 psi</i>	
<i>5 gallon bucket/stopswatch</i>						

2. Measurements: NORMAL OPERATION is DESCRIBED:

Pump 1: 6 hrs. Best fit is Rainbird 14V-LA-TNT with 1/8" nozzle:

PSI = 18, 18, 18, 20, $\bar{x} = 18.5$, yield/hd = 2.14 gpm

Pump 2: 2 hrs. as above but psi = 44, 40, $\bar{x} = 42$, yield/hd = 2.93 gpm

plus 2 hrs. Rainbird 30W, 1/4" nozzle, psi = 44, 44, yield/hd = 3.80 gpm

Pump 3: 10 hrs. Rainbird 30W, 1/8" nozzle, psi = 36, 36, 38, $\bar{x} = 36.7$, yield/hd = 3.48 gpm

Ponds: 5 gals/14 secs, measured outflow in 8" pipe from pond #2.

*AREA irrigated: 400'x60' } TOTAL = 2
600'x100' } 116,900 ft.
150'x150' } = 2.7
160'x65' } ACRES*

E. FLOW CALCULATIONS

☐ Additional Computation Sheets Attached

1. Measured Method: *SPRINKLERS: (6x2.14) + (2x2.93) + (2x3.80) + (10x3.48) = 61.10 gpm = .14 cfs*

PONDS outflow: $\frac{60}{4} \times 5 = 75 \text{ gpm} = .17 \text{ cfs}$ (the only available pond-related flow measurement)

2. Alternate Method for Checking Purposes:

*Assume eff = .8 or .6
HP eqs. where Pump 1 - HP = 1.5, Z = 10, PSI = 18.5
Pump 2 - = 1.0, = 10, = 43.0
Pump 3 - = 30.0, = 12, = 36.7*

$$Q = \frac{(8.8 \times 8)(1.5)}{(2.31 \times 18.5) + 10} + \frac{(8.8 \times 8)(1.0)}{(2.31 \times 43) + 10} + \frac{(8.8)(1.6)(30)}{(2.31 \times 36.7) + 12}$$

$$Q = .20 + .06 + 1.64 = 1.90 \text{ cfs}$$

F. PUMP EFFICIENCY DATA (Optional) - N/A

Discharge Pressure: _____ psi x 2.31 = _____ ft (1); Dynamic pumping level: _____ ft (2)

Total Head: (1) + (2) = _____ (3)

Water HP: (3) x (4) ÷ 8.8 = _____ (5)

Meter Input KW: 3.6 x _____ KH x _____ CTR or _____ MULT x _____ PTR x _____ N/ _____ T = _____ (6) *NOTE: still greatly exceeds calculation.*

Meter Input HP: (6) x 1.34 = _____ (7)

Panel Input KW: _____ Ave PF x _____ Ave Volts x _____ Ave Amps x .001732 = _____ (6)

Panel Input HP: (6) x 1.34 = _____ (7) Efficiency: (5)/(7) x 100 = _____ %

G. VOLUME CALCULATIONS

1. Volume Calculations for Irrigation:

$$V_{I.R.} = (\text{Acres Irrigated}) \times (\text{Irrigation Requirement}) = (2.7)(3.0) = 8.1$$

$$V_{D.R.} = [\text{Diversion Rate (cfs)}] \times (\text{Days in Irrigation Season}) \times 1.9835 = (.08)(214)(1.9835) = 34.0$$

$$V = \text{Smaller of } V_{I.R.} \text{ and } V_{D.R.} = 8.1$$

2. Volume Calculations for Other Uses:

Two ponds, storage (NONCONSUMPTIVE)

$$\text{pond \#1 is } 10' \times 30' \times 2' = 600 \text{ ft}^3$$

$$\text{pond \#2 is } 8' \times 15' \times 3' = 360 \text{ ft}^3$$

$$\text{volume is } \frac{960}{43560} = .02 \text{ AF, round to nearest } \frac{1}{10} \text{ AF} \rightarrow 0.1 \text{ AF}$$

RECORDED

NOTE

MAY 15 1989

max rate for 2.7 ac is $2.7 \times .03 = .08 \text{ cfs}$

H. REMARKS AND OVERLAP REVIEW ANALYSIS

Reid amendment to include div. to storage & recreation storage for the small ponds. The creek's limited season of available water calls for thorough and accurate description of all water used (hopefully, this will avoid future problems if disputes arise). Storage use is nonconsumptive and duration is limited as creek flow recedes. A minimal diversion rate would be effective.

Overlap:

Except for 65-12276, all others are other diversions & uses on different property. 65-12276 describes a ~~small~~ well on Morgans' property that is used for domestic water and irrigation and pond replenishment. Generally, the well is used for non-domestic use when the surface water is low or unavailable. Lic condition: R29 except use .03 cfs/ac. instead of .02.

I. RECOMMENDATIONS

1. Recommended Amounts

Beneficial Use	Period of Use		Rate of Diversion Q (cfs)	Annual Volume V (afa)
	From	To		
Irrigation	4/1	11/1	.08	8.1
Diversion to storage	1/1	12/31	.01 (see Remarks)	—
Recreation storage	1/1	12/31	—	0.1
Totals:			.09	8.2

2. Recommended Amendments

- ☐ Change P.D. as reflected above
☐ Change P.U. as reflected above

- ☐ Add P.D. as reflected above
☐ Add P.U. as reflected above

- ☐ None
☒ Other

REPORT

MAY 15 1989

WATER RIGHT LICENSE

THIS IS TO CERTIFY, that Chuck &/or Connie S. Morgan
at Horseshoe Bend, Idaho, has complied with the terms and conditions of Permit
No. 65-12276 issued pursuant to Application for Permit dated September 5, 1979
and has submitted proof to the Department of Water Resources on January 5, 1983
that he has applied water to a beneficial use; an examination by the Department indicates that the works have a
capacity for the diversion of 0.04 cfs of water from a groundwater source
tributary to _____, and that the permit holder has applied to a beneficial use and
established a right to use water as follows:

Subject, however, to the condition that no more than 0.04 cfs of water be diverted at any one time; and that the amount of water so diverted and to which such right is entitled and confirmed is for the purpose aforesaid and is limited to the amount which can actually be beneficially used and shall not exceed 15.2 acre feet per year, said waters to be diverted within the NE1/4 Section 3, Twp 7N, Rge 2E in the County of Boise

Dear Applicant(s):

We acknowledge receipt of your statement submitted as proof as beneficial use for the above-referenced permit.

Before a license can be issued, a field examination must be made by a representative of this Department. A field examiner will contact you to arrange to examine your system.

If you have any questions regarding the field examination, please contact this office.

Sincerely,

Judy Pense
Secretary

PROOF DUE NOTICE

RE: Permit No. 65-12536

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before September 1, 1987. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a completed field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this Department on or before the above described proof due date, or the permit will no longer be of any force nor effect.

Sincerely,

RITA FLECK
Secretary/Records Manager

RE: PERMIT NO. 65-12536

DEAR PERMIT HOLDER:

ENCLOSED IS A COPY OF YOUR APPROVED APPLICATION FOR PERMIT. WE DIRECT YOUR ATTENTION TO THE CONDITIONS OF APPROVAL ON THE FOURTH PAGE.

THE 1982 IDAHO LEGISLATURE ADDED A REQUIREMENT THAT THE EXCAVATION OR CONSTRUCTION OF DIVERTING WORKS MUST BE STARTED WITHIN ONE YEAR OF THE DATE THE PERMIT WAS ISSUED. THE PROJECT MUST THEN BE DILIGENTLY CONSTRUCTED UNTIL COMPLETED. TO MAINTAIN THE PERMIT IN A VALID STATUS YOU MUST COMPLETE AND RETURN THE ENCLOSED POSTCARD WHEN CONSTRUCTION IS COMMENCED, NO LATER THAN ONE YEAR FROM THE DATE OF APPROVAL OF THE PERMIT.

PLEASE BE ADVISED THAT THERE IS INSUFFICIENT NATURAL FLOW AVAILABLE IN THE BROWNLEE CREEK AND TRIBUTARIES TO PROVIDE WATER FOR A NEW APPROPRIATION THROUGHOUT THE ENTIRE SEASON OF USE. DURING THE SPRING RUN-OFF EACH YEAR, THERE MAY BE A PERIOD OF TIME IN WHICH THE PRIOR RIGHTS TO THE USE OF THE NATURAL FLOW AND STORAGE ARE FILLED LEAVING WATER AVAILABLE FOR YOUR PERMIT. AS THE NATURAL FLOW DIMINISHES, HOWEVER, THERE MAY BE NO WATER AVAILABLE FOR YOUR RIGHT UNLESS YOU ARRANGE FOR AN ADDITIONAL SOURCE OF WATER AS A SUPPLEMENTAL SUPPLY.

MICROFILMED

Idaho City, ID 83631

Gentlemen:

Enclosed you will find a legal notice which we wish to have published on the dates indicated (once a week for two consecutive weekly issues) in your newspaper. If you cannot publish the notice on the proposed dates, please contact us immediately.

An affidavit of publication must be submitted to the Department along with the publication bill. Your cooperation is appreciated.

Please send the affidavit of publication and publication billings to this office before AUGUST 16, 1982.

Yours truly,

HELEN L. HARRINGTON
Secretary

Encl.

ENCLOSURE

NOTICE OF APPLICATION FOR WATER RIGHT

Notice is hereby given that the following application(s) have been submitted for permit to appropriate the public waters of the State of Idaho:
