This matter having come before the Idaho Department of Water Resources (Department) the Department finds as follows:

FINDINGS OF FACT

1. On November 20, 1981, the Director of the Department of Water Resources issued Permit No. 65-12464 with a condition of approval that proof of construction of works and application of water to beneficial use be submitted on or before November 1, 1986.

2. On August 31, 1986 the Department sent a proof due notice to the permit holder.

3. On November 21, 1986 the Department sent a lapse notice to the permit holder since neither proof of beneficial use nor a request for extension of time had been received from the permit holder.

4. On August 6, 1987 Proof of Beneficial Use was received by the Department from the permit holder.

5. Section 42-218a, Idaho Code, authorizes the Department to reinstate a lapsed permit, with the priority date advanced to the date that proof of beneficial use was received, upon submittal of evidence clearly establishing the extent of beneficial use prior to the proof due date and a showing of reasonable cause why the proof was submitted late.

CONCLUSIONS OF LAW

1. The permit holder has submitted proof of beneficial use along with supporting evidence which establish that water was in fact beneficially used.

2. The permit holder has shown sufficient cause why the proof of beneficial use was not submitted in a timely manner.

3. The permit can be reinstated with the date of priority advanced to the date proof of beneficial use was received by the Department.

ORDER

IT IS HEREBY ORDERED that Permit No. 65-12464 is reinstated.

RE: Water Right Licenses 65-12464 and 67-08039A through 67-08039F

Dear Mr. Stringer:

On October 22, 1999, IDWR issued seven water right licenses to you for stockwater use from springs in Payette and Washington Counties. While routinely inspecting our work, we noted that typographical errors were made on each of the licenses. Specifically, in approval condition no. 1 each license refers to water rights 57-07969A through 57-07969F when the proper reference is 67-08039A through 67-08039F. Rule 760 of IDWR's Rules of Procedure (IDAPA 37.01.01.760.) allows IDWR to modify a preliminary order within fourteen days of its issuance by simply withdrawing the initial order and substituting a replacement order. Since your licenses were issued as preliminary orders, IDWR has corrected the typographical errors on your licenses in accordance with Rule 760 by withdrawing the licenses issued on October 22, 1999, and substituting licenses issued November 4, 1999.

The licenses issued November 4, 1999, are amended preliminary orders of IDWR pursuant to §67-5243, *Idaho Code*. They can and will become final orders without further action of IDWR unless a party petitions for reconsideration or files exceptions or briefs as described in the enclosed information sheet.

If you have any questions, please contact me at 208-327-7946.

Respectfully,

Shelley Walter Keen

Responding to Preliminary Orders Issued by the Idaho Department of Water Resources

The Idaho Department of Water Resources (Department) issues water right permits, licenses, and transfers as preliminary orders pursuant to section 67-5243, Idaho Code. A preliminary order can and will become a final order without further action of the department unless a party petitions for reconsideration or files an exception and/or brief as further described below:

PETITION FOR RECONSIDERATION

Any party may file a petition for reconsideration of a preliminary order with the Department within fourteen (14) days of the service date of the order. The Department will act on a petition for reconsideration within twenty-one (21) days of its receipt, or the petition will be considered denied by operation of law. See section 67-5243(3), Idaho Code.

EXCEPTIONS AND BRIEFS

Within twenty-one (21) days after (a) the service date of a preliminary order, (b) the service date of a denial of a petition for reconsideration from this preliminary order, or (c) the failure within twenty-one (21) days to grant or deny a petition for reconsideration from a preliminary order, any party may in writing support or take exceptions to any part of a preliminary order and may file briefs in support of the party's position on any issue in the proceeding. Otherwise, a preliminary order will become a final order of the Department.

If any party appeals or takes exceptions to a preliminary order, opposing parties shall have twenty-one (21) days to respond to any party's appeal. Written briefs in support of or taking exceptions to the preliminary order shall be filed with the Department. The Department retains the right to review the preliminary order on its own motion.

ORAL ARGUMENT

If the Department grants a petition to review a preliminary order, the Department shall allow all parties an opportunity to file briefs in support of or taking exceptions to the preliminary order and may schedule oral argument in the matter before issuing a final order. If oral arguments are to be heard, the Department will within a reasonable time period notify each party of the place, date and hour for the argument of the case. Unless the Department orders otherwise, all oral arguments will be heard in Boise, Idaho.

MICROFILMED

DEC 10 1999

CERTIFICATE OF SERVICE

All exceptions, briefs, requests for oral argument and any other matters filed with the Department in connection with a preliminary order shall be served on all other parties to the proceedings in accordance with Rules of Procedure 302 and 303.

FINAL ORDER

The Department will issue a final order within fifty-six (56) days of receipt of the written briefs, oral argument or response to briefs, whichever is later, unless waived by the parties or for good cause shown. The Department may remand the matter for further evidentiary hearings if further factual development of the record is necessary before issuing a final order. The department will serve a copy of the final order on all parties of record.

Section 67-5246(5), Idaho Code, provides as follows:

Unless a different date is stated in a final order, the order is effective fourteen (14) days after its issuance if a party has not filed a petition for reconsideration. If a party has filed a petition for reconsideration with the agency head, the final order becomes effective when:

- (a) the petition for reconsideration is disposed of; or
- (b) the petition is deemed denied because the agency head did not dispose of the petition within twenty-one (21) days.

APPEAL OF FINAL ORDER TO DISTRICT COURT

Pursuant to sections 67-5270 and 67-5272, Idaho Code, if this preliminary order becomes final, any party aggrieved by the final order or orders previously issued in this case may appeal the final order and all previously issued orders in this case to district court by filing a petition in the district court of the county in which:

- i. A hearing was held,
- ii. The final agency action was taken,
- iii. The party seeking review of the order resides, or
- iv. The real property or personal property that was the subject of the agency action is located.

The appeal must be filed within twenty-eight (28) days of this preliminary order becoming final. See section 67-5273, Idaho Code. The filing of an appeal to district court does not itself stay the effectiveness or enforcement of the order under appeal.

RE: WATER RIGHT NO. 65-12464

Dear Water Right Holder(s):

The Department of Water Resources (the Department) has issued the enclosed license confirming that a water right has been established in accordance with the permit referenced above. The license is a preliminary order issued by the Department pursuant to section 67-5243, Idaho Code. It can and will become a final order without further action of the Department unless a party petitions for reconsideration or files an exception and/or brief as described in the enclosed information sheet.

For your records I have also enclosed a copy of your Application for Amendment of Permit, which was approved.

Also, please note that water right owners are required to report any change of water right ownership and/or change of mailing address to the department within 120 days of the change. Failure to report these changes could result in a \$100 late filing fee. Contact any office of the department or visit the department's homepage on the Internet to obtain the proper reporting form.

If you have any questions, please call me at 208-327-7946.

Dear Mr. Dyer:

I previously forwarded to you an Application for Amendment so that you could amend your permits to depict your water rights as they have actually been developed.

As of this date, I have not received these amendments. If I do not receive the amendments within 14 days, Water Right Licenses will be issued for less than could have been allowed. RE: WATER RIGHTS 67-08039C/67-08039E/65-12464

Dear Mr. Dyer:

I am writing to you about Water Right Permits 67-08039C, 67-08039E & 65-12464, which were issued to C. John Stringer. The permits are being reviewed for licensing. Before water right licenses can be issued, however, the permits must be amended to depict the water right as it has actually been developed. I have sent Application for Amendment forms to Mr. Stringer, but they have been returned by the postoffice. Because the field examiner indicated that you may now own the property on which the water development occurred, I am writing to give you the opportunity to complete the process necessary to obtain water right licenses.

The enclosed Applications for Amendment contain information that will be included on the licenses when they are issued. Please review the amendment forms carefully. If you concur with the information presented, sign the form and return it with the \$150.00 filing fee (\$50.00 each) as soon as possible.

Because water appropriation permits are considered personal property, in order for the department to issue the water right license in your name Mr. Stringer must assign the permit to you. I have enclosed Assignment of Permit forms to help you obtain the required information and signatures. The fee for filing an assignment is \$25.00 each.

If you do not obtain the assignments from C. John Stringer, the department may still issue a license if you submit the Applications for Amendment and fees. The licenses will be issued in the name of C. John Stringer. However, once the license is issued, the water right becomes appurtenant to the land regardless of the name listed on the document.

If you have any questions about this information, please contact me at 208-327-7946.

RE: WATER RIGHTS 67-08039C/67-08039E/65-12464

Dear Mr. Stringer:

The Department of Water Resources is reviewing the permits referenced above prior to issuing water right licenses. By issuing licenses, the Department confirms that water rights have been established in compliance with the terms of the permits. The examiner who verified your water use reported that the point(s) of diversion and place(s) of use developed are in locations other than what was described on your permits. Therefore, before licenses can be issued, your permits must be amended to depict your water rights as they were actually developed.

The enclosed Application for Amendment forms depict the point(s) of diversion and place(s) of use and other information as they will appear on the licenses when they are issued. Please review the amendment forms carefully. If you concur with the information presented, please sign the forms and return them with the \$150.00 (\$50.00 each) filing fee within 14 days.

Also, please note that some of the proposed conditions of approval and remarks may be modified upon further administrative review.

If you do not concur, or if you have any questions about this information, please contact me as soon as possible. My telephone number is 208-327-7946.

Permit 65-12464
C. John Stringer

Government lots: T10N, R3W, S31 Lot 3 and T10N, R4W S36, Lot 7.

September 3, 1998 I was accompanied by John E. Dyer, manager of OX Ranch, the new owner of the property. The source for the stockwater tanks is springs that sink. The current owner runnings approximately 1000 head of cattle.

Multiple points of use were developed under this permit and the numbering system for the stockwater tanks listed were for identification only. The numbers refer to the order that I visited the tanks. A correlation between the numbers on the permit and the exam are listed in an attached table. Stock tank number 7 is located in basin #65. Stock tanks number 1-6 are located in basin #67. Tanks 1, 2, 3, and 6 are located in Washington County. Tanks 4, 5, and 7 are located in Payette County.

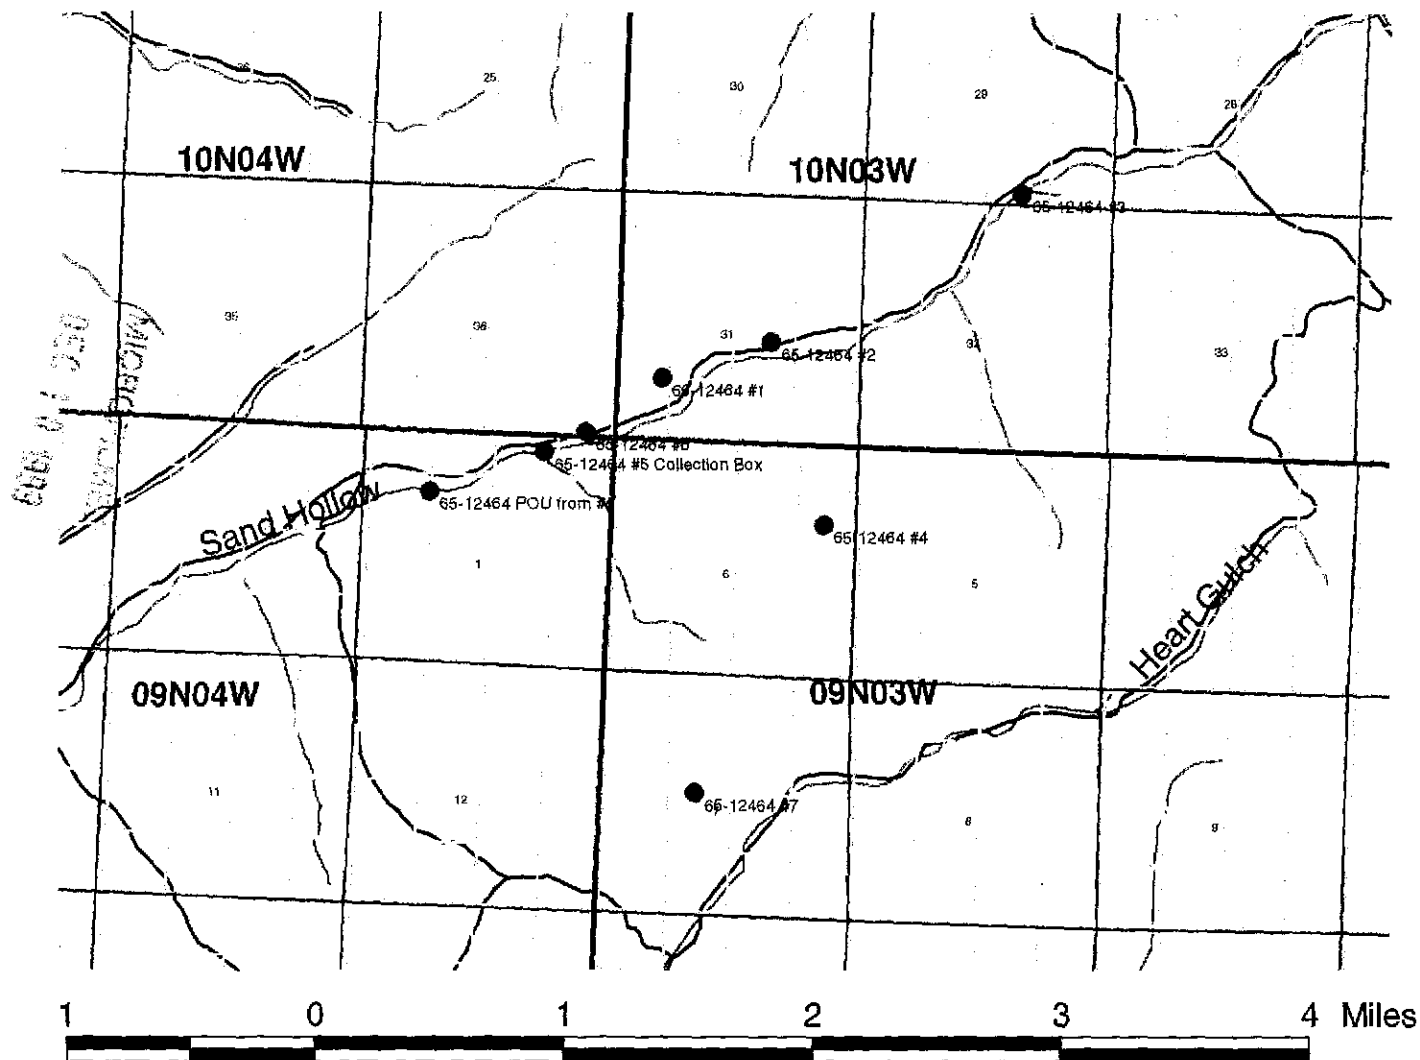

Since the source sinks, the points of diversion were not visible by inspection. The pipes were buried and surfaced at the place of use only. Therefore, the points of diversions are based on the place of use, except for #5. Number 5 has a collect box, with a 2 and 3 inch PVC pipe coming in and a 3" PVC pipe that gravity feeds to the 500 gallon stockwater tank. The GPS was used on verify the place of use of the individual points. Each place of use is a seperate system but because of the age of this filing and that it was filed as one system I recommend they leave it as one system.

An assignment of permit was left during the field examination with John Dyer.

RE: Water Right Permit No. 65-12464

Dear Mr. Dyer:

A field examination of the above-referenced permit must be conducted by the Department of Water Resources (IDWR). The purpose of the exam is to verify the water use in order to issue a water right license.

I telephoned you on May 28, 1998 to discuss a field exam with you. At that time the ground was too wet to visit all of the springs listed in the permit. Since the weather has been dryer this past month the ground should be dry enough to conduct the field exam.

Please contact me at this office by August 14th, 1998, to schedule a field exam. A voice mail message can be left at my telephone number 24 hours a day.

Thank you for your assistance in this matter. I look forward to hearing from you at your earliest convenience.

Sincerely,

Maria Minicucci

I did not submit proof of beneficial use when this proof became due. The reason for this is because I was in a Chapter 11 Bankruptcy, reorganization. I gave the paper work to my attorney, but nothing was done.

I realize this is not much of an excuse, but things have been pretty hectic in the paper work department.

I respectfully submit to have this permit reinstated for these reasons with no advance in priority.

Thank you for your consideration in this matter.

Rosanna Ford

being first duly sworn, deposes and says:

The following is a detailed description, to the best of my memory, as to what procedures were used in the development of various free flowing underground springs on the C. John Stringer property, known to us as a Sand Hollow Ranch.

My deceased husband, Donald R. Ford, and I, Rosanna Ford, doing business as Ford Construction, were contracted in 198 to locate and develop springs for livestock watering purposes on said properties.

Each spring was excavated to natural flow level, left to flow for a few days to determine if amount of flow was adequate before proceeding with the development. Upon determining this, the following procedures were performed: Each site was packed with 1½" washed rock, according to required amounts, which varied with each site; then the placement of P.V.C. perforated pipe to proper grade; then rock filled with additional rock placed to completely cover pipes with an additional 3" of rock. Upon completion of this phase, the entire bed was covered with Murphy Paper, a product designed especially for this purpose so as to insure proper water flow without restriction. After this phase was done, the complete site was backfilled with original soil from excavation and restored to match existing terrain, then reseeded to pasture.

At some such sites the spring water always being allowed to free flow was piped with two various sizes of pipe - 1½" P.V.C. solid going either to existing or newly-set livestock watering troughs. Excess water, at this point, was then piped away from the watering area into open trenches, and always to flow.

The above description of development is, to the best of my knowledge, a true and accurate statement.

The quality of materials used in doing so was the best available for these projects.

My duties as an employee of Ford Construction on C.J. Stringer Sand Hollow Ranch were as a general person - doing whatever the daily schedule called for in the development of free flow underground springs:

- I assisted in the trucking - hauling of various materials to the sites
- the excavation of each site
- the rock bedding and placement of various size pipes
- the placement of paper upon the completed beds
- backfilling, setting of water tanks, trenching excess water away from sites
- replacing terrain to match existing, and reseeding sites upon completion of each

With each site, these duties varied but always, to the best of my memory, the workmanship and materials were of the highest quality.
