Re: Permit no. 65-12375
Letha Sewer District

We intend to use the water from the well to maintain the water level in the lagoons when evaporation becomes heavier than inflow.

We have valves to regulate the flow to one or the other when needed.

You will recall our lagoons are clay lined and require a minimum amount of water to avoid breaking the seal.

Dear Sirs,

RE: Permit No. 65-12375

The Department is in the final review of your application for a water permit to use water for water quality improvement.

Before we can approve this application, we feel more information is needed, describing how this water will be used in improving the water quality of the waste water.

Also, perhaps you could describe briefly how you plan to regulate the flow from the Artesian Well, in connection with the waste water treatment.

Your prompt reply will be appreciated.
