Dear Mr. & Mrs. Peterson,

RE: Permit No. 65-12371

Enclosed is a copy of your approved Application for Permit. We direct your attention to the conditions of approval as listed on the fourth page.

Please be advised that there is insufficient natural flow available in the Payette River and tributaries to provide water for a new appropriation throughout the entire season of use.

During the spring run-off each year, there may be a period of time in which the prior rights to the use of the natural flow and storage are filled leaving water available for your later-in-time permit. As the natural flow diminishes, however, there would be no water available for your right unless you had arranged for an additional source of water as a supplemental supply.

This information is provided so that you will not be mislead into thinking that this permit will provide sufficient water through the entire season of use. If you have any questions regarding this matter, please feel free to contact this office.

Sincerely,

DAVID R. TUTHILL, JR.
