CERTIFIED MAIL

EXAMINATION FEE NOTICE

Dear Permit Holder:

Department records show that proof of beneficial use has been submitted for the above-referenced permit, but that a field examination has not yet been conducted to determine the extent of beneficial use of the water for licensing purposes.

House Bill 671 (effective April 4, 1986) enacted by the 1986 Idaho Legislature requires the payment of a fee before this department can conduct the field examination needed to issue a license confirming use of water under the permit. This letter is notification that the license examination fee is due within sixty (60) days of the date of this letter. The examination fee information sheet (enclosed) must be returned with the fee.

As an alternative to submitting the fee, the department will accept a field examination report completed by a certified water right examiner from the private sector. If you choose to have the examination done by a certified water right examiner, you need not submit the license examination fee to the department, but you must within sixty (60) days of the date of this letter return to the department, the examination fee information sheet showing appropriate information together with a statement from the certified examiner to verify that you have retained a certified examiner to conduct the field examination. If you choose this alternative, a completed field examination report must be submitted within one year of the date of this letter. You cannot later change your decision to use this alternative and submit the fee needed for the department to conduct the field examination, but you may change to another certified examiner.

Certified water right examiners are licensed engineers, geologists, or land surveyors certified by the department to conduct water right examinations. The procedure for certifying examiners results from the recently enacted HB 671 and is being developed at this time. A listing

MICROFILMED

of certified water right examiners will be available from this department when examiners have been certified.

If your permitted use, in fact, has already been examined by the department and you have not asked to have the examination repeated, the fee requirement is not applicable to your permit. If you believe this is the case, please contact the department.

The license examination fee is to be based on the amount of water you indicate you have developed, as listed in item 6 on the examination fee information sheet. The amount of water on which the examination fee is based can be less than the permitted amount, if less water has been diverted and beneficially used. The licensed amount of water, however, will not exceed the amount you claim on the examination fee information sheet. The enclosed license examination fee schedule shows a listing of applicable fees.

FAILURE TO SUBMIT WITHIN THE SIXTY (60) DAY PERIOD, THE FEE OR THE STATEMENT THAT A CERTIFIED EXAMINER HAS BEEN RETAINED TO MAKE THE FIELD EXAMINATION, WILL BE CAUSE TO ADVANCE THE PRIORITY OF THE PERMIT ONE DAY FOR EACH DAY THAT THE FEE SUBMITTAL IS LATE.

FAILURE TO SUBMIT THE FEE OR THE COMPLETED FIELD EXAMINATION REPORT WITHIN A YEAR WILL BE CAUSE TO CONSIDER THE PROOF OF BENEFICIAL USE TO BE INCOMPLETE AND TO LAPSE THE PERMIT.

The attached examination fee information sheet and the fee may be submitted to the following department offices.

RE: 65-12351
MJB&B File No. 12-43R

Dear Woody:

In reply to your letter of March 11, 1986, the water right permit referenced was not a part of the proposed findings for the Payette River Basin Adjudication. The report of the department included those water rights or permits initiated on or before October 18, 1977. Water rights initiated and/or completed after that date are confirmed by the process set out in Title 42, Idaho Code.

Mr. Wilson will receive acknowledgment of the Proof of Beneficial submitted and information about scheduling a field examination under separate cover.

If I can be of further assistance, please contact me again.

Regards,

Dear Sirs,

RE: Permit No. 65-12351

Enclosed is a copy of your approved Application for Permit. We direct your attention to the conditions of approval on the fourth page.

Please be advised that there is insufficient natural flow available in the ~~throughout~~ ^{and tributaries} to provide water for a new appropriation ~~throughout~~ ^{springs} the entire season of use. During the spring run-off each year, there may be a period of time in which the prior rights to the use of the natural flow and storage are filled leaving water available for your permit. As the natural flow diminishes, however, there may be no water available for your right unless you arrange for an additional source of water as a supplemental supply.

The exercise of this permit may also be affected by the Supreme Court's review of the case of Idaho Power Company vs. State of Idaho, et al., Ada County Civil No. 62237, currently being appealed to the Supreme Court of Idaho. Since the use of water under your permit may affect the flows in the Snake River between Milner Dam and Hells Canyon, the final decision in this case may determine to what extent the exercise of your permit is subject to water rights of Idaho Power. While the Supreme Court is reviewing this case, Idaho Power Company has not filed a specific protest to your permit. However, the Department of Water Resources has been advised that the Power Company is not waiving any of its rights to contest or limit the exercise of your permit or subsequent license.

We have enclosed a form entitled "Making Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit into a license.

Sincerely,

DAVID R. TUTHILL, JR., P.E.
Supervisor, Water Allocation Section

RE: Application
Nos. 65-12348

Gentlemen:

This office acknowledges receipt of your protest to the issuance of a permit pursuant to the above referenced application. The Department suggests you contact the applicant(s) directly in an effort to determine what is proposed by the application and to attempt to resolve the protest.

If this office has not been advised within twenty (20) days that the protest has been resolved, the matter will be scheduled for conference and/or hearing. At such a conference and/or hearing, the following are the principle items the Department can consider in either approving or denying an application for permit (Section 42-203, Idaho Code):

1. Will the proposed use reduce the quantity of water under existing water rights?
2. Is the proposed water supply insufficient for the purposes intended?
3. Is the application made in good faith or for delay or speculative purposes?
4. Has the applicant sufficient financial resources with which to complete the project?
5. Will the proposed use under this permit conflict with the local public interest?

If this office can be of further assistance, please contact us.

Dear Sir:

I have been instructed to submit a protest against the granting of the permit to appropriate .04 cu Ft. per sec. of water from Payette Lake, pursuant to the notice of application for water permit published in connection with said application.

It is realized the application is "subject to all prior water rights" but Lake Reservoir is concerned about the question of priority use and Complication that might possibly arise from the numerous pumps and pipes in Payette Lake,
