Sir,

We are not constructing a diversion dam on works, other than to place a few rocks in the stream.

We put in a pump, which was stolen last year. I have now bought a portable pump which I can carry back & forth. With it I can water the yard on pump into the trailer house -

A small portable Homelite pump draws water through a 12' long, 1" suction hose and discharges water through a 3/4" garden hose. An unarmored stream near Arling Trail is the water source. Water is used for a lawn, less than 1/2 acre, or in a small trailer on the lot. A 35 gallon tank, 6' from the trailer, can be filled with the garden hose to provide irrigation water. 1/2" hose runs from tank to trailer intake (gravity feed).

Dear Mr. Newbry,

RE: Permit No. 65-12343

Enclosed is a copy of your approved Application for Permit. We direct your attention to the conditions of approval on the fourth page.

Please be advised that there is insufficient natural flow available in the unnamed stream and Payette River and tributaries to provide water for a new appropriation throughout the entire season of use. During the spring run-off each year, there may be a period of time in which the prior rights to the use of the natural flow and storage are filled leaving water available for your permit. As the natural flow diminishes, however, there may be no water available for your right unless you arrange for an additional source of water as a supplemental supply.

We have enclosed a form entitled "Making Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit into a license.

Sincerely,

DAVID R. TUTHILL, JR., P.E.
