A spring and buried 2" pipe leading 50' to a trough compare this system. The spring and trough are in NW 1/4 S 9, approx. 250' E. of mid-section line. The permit described a ditch and trough in the right of way easement along unnamed stream in SW 1/4 S 9. However, this was not present and Mr. Marzani stated that such a system has never been in place. No diversion or impoundment structures are found at or near the stream. Use of trough is for 125 head of cattle during the runoff periods, usually 3/1-7/15.

Re: Permit No's. 65-12219 through 65-12222

Dear Mr. Marcum:

I am writing to respond to several items associated with field exams conducted on October 10, 1986 for the above stockwater rights. Of particular interest is Permit No. 65-12220. As you recall, the ditch and trough development in the right-of-way easement in the NE quarter of Section 9 is not in place. Diversion or impoundment structures were not found during the exam. Idaho Code 42-113 states that, "A permit... shall not be required for appropriation of water for the in-stream watering of livestock... in-stream watering of livestock means the drinking of water by livestock directly from a natural stream, without the use of any constructed physical diversion works."

With respect to the law and your best interests in a stockwater right, I believe that best procedure is as follows: Permit No. 65-12220 should be amended to change the point of diversion and place of use to the SW1/4 SE1/4 Section 9 to include the spring and trough at that point. The water right at the stream in the NE1/4 would be omitted. However, Idaho Code 42-113 provides stockwater use at that location. By this method you would gain legal use of water at two locations. The Department's State Office will contact you for the amendment.

You expressed an interest in the Nisula water rights downstream along Cherry Gulch in Section 15. Please refer to the enclosed copy of "Water Rights by Point of Diversion". Nisula rights 65-1882, 1883, and 1879 use surface water from Cherry Gulch Creek or unnamed streams tributary to the creek.

LAPSE NOTICE

You are hereby notified that under the provisions of Section 42-218a of the Idaho Code, Permit No. 65-12220 has lapsed. This office did not receive either an acceptable notice that you have completed the project (proof of beneficial use) by the date required on your permit or an acceptable request for an extension of time. You were provided the proper forms in our proof due notice to you dated February 28, 1984.

Either the completed postcard or the extension request must be received by this office within sixty days of the date of this lapse notice or the permit will no longer be of any force or effect.

A statement of beneficial use postcard and a request for extension of time form are again enclosed for your use. Please note that a fee of \$15.00 must accompany an extension of time request and that only one extension of time can be granted unless the project has not been completed because of lack of a necessary approval by a government agency or by litigation.

Gentlemen:

Enclosed are copies of your approved Applications for Permit. We direct your attention to the conditions of approval on the fourth page of the permits.

The exercise of these permits may also be affected by the court's determination of water rights in the case of Idaho Power Company v. State of Idaho, et al., Civil No. 62237, currently pending before the District Court of Ada County.

Idaho Power officials tell us that because of Case No. U-1006-124 filed before the Idaho Public Utilities Commission, Idaho Power Company is asking the District Court of Ada County to determine whether the Power Company's water rights on the Snake River are protected against subsequent upstream appropriations in the waters of the Snake River and surface and subterranean tributaries between Milner Dam and Hells Canyon.

Since the use of water under your permits may affect the flows in this reach of the Snake River, the final decision in Idaho Power Company v. State of Idaho, et al., (Ada County Civil No. 62237) may determine to what extent the exercise of your permits may be subject to the water rights of Idaho Power.

While the Ada County court is examining this question, Idaho Power Company has not filed a specific protest to your permits. However, the Department of Water Resources has been advised that the Power Company is not waiving any of its rights to contest or limit the exercise of your permits or a subsequent license or water right.

Also please be advised that there is insufficient natural flow available in the Payette River and tributaries to provide water for a new appropriation throughout the entire season of use.

During the spring run-off each year, there may be a period of time in which the

MICROFILMED

prior rights to the use of the natural flow and storage are filled leaving water available for your later-in-time permits. As the natural flow diminishes, however, there would be no water available for your rights unless you had arranged for an additional source of water as a supplemental supply.

This information is provided so that you will not be misled into thinking that these permits will provide sufficient water through the entire season of use. If you have any questions regarding this matter, please feel free to contact this office.

Sincerely,

DAVID R. TUTHILL, JR.
