NOTICE OF APPLICATION
FOR WATER PERMIT

Notice is hereby given that ELD RANCHES, INC. Route 1, McCall, ID has on April 27, 1978 submitted Application No. 65-12120 for a permit to appropriate 34 acre feet per annum of water from Laffinwell Creek trib. Gold Fork River by means of raising an existing dam, pumps and irrigation system within the NW $\frac{1}{4}$ NW $\frac{1}{4}$ Sec 29 T16N-R4E B.M., Valley County to be used from May 1 to Nov 1 for irrigation of 160 acres from storage within the NE $\frac{1}{4}$ NW $\frac{1}{4}$ Sec 29; SW $\frac{1}{4}$ SW $\frac{1}{4}$ Sec 20; S $\frac{1}{2}$ SE $\frac{1}{4}$ Sec 19 T16N-R4E B.M. The applicant proposes to store water from Nov 1 to May 1.

If issued, this permit will be subject to all prior water rights. Protests against the granting of the permit must be filed with the Director of the Idaho Department of Water Resources, 92 South Cole Road, Boise, Idaho 83705 on or before May 29, 1978.

IN THE MATTER OF CHANGING THE FLOW)
MEASUREMENT DEVICE CONDITION OF)
APPROVAL FOR PERMIT NO. 65-12120 IN)
THE NAME OF ELD RANCHES, INC.)
_____)

ORDER

WHEREAS, the Department of Water Resources (department) has issued the above captioned water right permit with a condition of approval requiring the permit holder to install and maintain measuring devices at points above and below the reservoir; and

WHEREAS, the permit holder has submitted a request for removal of the measuring device requirement; and,

WHEREAS, the department has determined that the permanent installation of measuring devices is not necessary at this time; and

WHEREAS, the department has determined that in the future it may require the right holder to measure and report diversions made under this right;

IT IS THEREFORE, HEREBY ORDERED that the condition of approval requiring the installation of measuring devices above and below the reservoir is changed to read as follows:

Upon specific notification by the Department the right holder shall install a lockable device of a type acceptable to the Department in a manner that will provide the watermaster suitable control of the diversion.

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Application for Permit to appropriate the public waters of the State of Idaho No. 65-12120, and said application is hereby APPROVED.

1. Approval of said application is subject to the following limitations and conditions:

- a. SUBJECT TO ALL PRIOR WATER RIGHTS.
- b. Proof of construction of works and application of water to beneficial use shall be submitted on or before June 1, 19 83.
- c. The rate of diversion, if water is to be used for irrigation under this permit, when combined with all other water rights for the same land shall not exceed 0.02 cubic feet per second for each acre of land.
- d. Other: Measuring devices of a type approved by this Department shall be installed and maintained at points above and below the reservoir.

Use of water under this permit is subject to the control of watermaster of State Water District No. 65, Payette River.

Witness my hand this 19TH day of June, 19 78.

RE: WATER RIGHT NO. 65-12120

Dear Water Right Holder(s):

The Department of Water Resources (the Department) has issued the enclosed license confirming that a water right has been established in accordance with the permit referenced above. The license is a preliminary order issued by the Department pursuant to section 67-5243, Idaho Code. It can and will become a final order without further action of the Department unless a party petitions for reconsideration or files an exception and/or brief as described in the enclosed information sheet.

For your records I have also enclosed a copy of your Application for Amendment of Permit, which was approved.

Also, please note that water right owners are required to report any change of water right ownership and/or change of mailing address to the department within 120 days of the change. Failure to report these changes could result in a \$100 late filing fee. Contact any office of the department or visit the department's homepage on the Internet to obtain the proper reporting form.

If you have any questions, please call me at 208-327-7946.

Sincerely,

A handwritten signature in cursive script that reads "Shelley W. Keen".

OCT 15 1999

Responding to Preliminary Orders Issued by the Idaho Department of Water Resources

The Idaho Department of Water Resources (Department) issues water right permits, licenses, and transfers as preliminary orders pursuant to section 67-5243, Idaho Code. A preliminary order can and will become a final order without further action of the department unless a party petitions for reconsideration or files an exception and/or brief as further described below:

PETITION FOR RECONSIDERATION

Any party may file a petition for reconsideration of a preliminary order with the Department within fourteen (14) days of the service date of the order. The Department will act on a petition for reconsideration within twenty-one (21) days of its receipt, or the petition will be considered denied by operation of law. See section 67-5243(3), Idaho Code.

EXCEPTIONS AND BRIEFS

Within twenty-one (21) days after (a) the service date of a preliminary order, (b) the service date of a denial of a petition for reconsideration from this preliminary order, or (c) the failure within twenty-one (21) days to grant or deny a petition for reconsideration from a preliminary order, any party may in writing support or take exceptions to any part of a preliminary order and may file briefs in support of the party's position on any issue in the proceeding. Otherwise, a preliminary order will become a final order of the Department.

If any party appeals or takes exceptions to a preliminary order, opposing parties shall have twenty-one (21) days to respond to any party's appeal. Written briefs in support of or taking exceptions to the preliminary order shall be filed with the Department. The Department retains the right to review the preliminary order on its own motion.

ORAL ARGUMENT

If the Department grants a petition to review a preliminary order, the Department shall allow all parties an opportunity to file briefs in support of or taking exceptions to the preliminary order and may schedule oral argument in the matter before issuing a final order. If oral arguments are to be heard, the Department will within a reasonable time period notify each party of the place, date and hour for the argument of the case. Unless the Department orders otherwise, all oral arguments will be heard in Boise, Idaho.

MICROFILMED

OCT 15 1999

CERTIFICATE OF SERVICE

All exceptions, briefs, requests for oral argument and any other matters filed with the Department in connection with a preliminary order shall be served on all other parties to the proceedings in accordance with Rules of Procedure 302 and 303.

FINAL ORDER

The Department will issue a final order within fifty-six (56) days of receipt of the written briefs, oral argument or response to briefs, whichever is later, unless waived by the parties or for good cause shown. The Department may remand the matter for further evidentiary hearings if further factual development of the record is necessary before issuing a final order. The department will serve a copy of the final order on all parties of record.

Section 67-5246(5), Idaho Code, provides as follows:

Unless a different date is stated in a final order, the order is effective fourteen (14) days after its issuance if a party has not filed a petition for reconsideration. If a party has filed a petition for reconsideration with the agency head, the final order becomes effective when:

- (a) the petition for reconsideration is disposed of; or
- (b) the petition is deemed denied because the agency head did not dispose of the petition within twenty-one (21) days.

APPEAL OF FINAL ORDER TO DISTRICT COURT

Pursuant to sections 67-5270 and 67-5272, Idaho Code, if this preliminary order becomes final, any party aggrieved by the final order or orders previously issued in this case may appeal the final order and all previously issued orders in this case to district court by filing a petition in the district court of the county in which:

- i. A hearing was held,
- ii. The final agency action was taken,
- iii. The party seeking review of the order resides, or
- iv. The real property or personal property that was the subject of the agency action is located.

The appeal must be filed within twenty-eight (28) days of this preliminary order becoming final. See section 67-5273, Idaho Code. The filing of an appeal to district court does not itself stay the effectiveness or enforcement of the order under appeal.

From: Kay Walker 

Date: 09/27/99

Re: Licensing Recommendations

.....
.....
In reviewing these rights for licensing, I noticed that the measuring device condition had been removed from Rights 65-07200 & 65-07516 during the permit period. There is a request to remove the measuring device condition from 65-12120 while being licensed.

I discussed this with Tim Luke since he works closely with the water district on the Payette and he stated that the watermaster is not currently measuring any diversions in the area of the North Fork of the Payette. Since no water rights are currently being measured in this area, I recommend we license these rights with condition 01P – "Upon specific notification by the Dept., the right holder shall install a lockable device of a type acceptable to the Dept. in a manner that will provide the watermaster suitable control of the diversion." This will allow IDWR to request installation in the future if it is determined necessary.

DEPARTMENT OF WATER RESOURCES

REQUEST TO REMOVE MEASURING DEVICE

REQUIREMENT FOR PERMIT NO. 65-12120

The water right owner requests that the measuring device requirement for this right be waived at this time. This action will match this permit with two similar rights using the same system, rights 65-07200 and 65-07516.

The measuring device requirements for those earlier rights were removed by IDWR Order issued on March 13, 1985.

Please complete this request while licensing all of the above referenced permits.

REVISED FIELD EXAM RECOMMENDATIONS

ELD RESERVOIR RIGHTS

65-07200, 65-07516 AND 65-12120

Steve Lester, August 12, 1999

Joe Eld visited the office yesterday in response to my letter of June 16, 1999. This memo summarizes the results of our meeting and serves as the revised license recommendations for the three rights for Eld Reservoir.

Combine the rights into a 227 acre permissible place of use (PPOU) shown in *Exhibit 1*. Use the current standard season of April 15 through October 15 for irrigation and irrigation from storage uses. Allow the following periods to store water based on the current irrigation season and the intent in each permit: 65-07200 during the irrigation season, 65-07516 all year, and 65-12120 outside of the irrigation season. The standard diversion volume of 3 afa/acre is provided (2 afa/acre consumptive use). Show the correct tributary name, Gold Fork River.

Recognize all 130 af of storage. Note that 65-07200 was originally filed to provide .02 cfs (1") per acre plus up to 60 af of storage (see *Exhibit 2*). I mistakenly overlooked this storage intent in 65-07200 until Mr. Eld pointed it out yesterday. Therefore, a new right is not needed to cover the "missing 60 af of storage" previously mentioned in my 1988-1999 letters to the owners. The Dam Safety file identified as D65-7200 supports this "storage intent." Note that the reservoir was last certified by IDWR on October 27, 1997.

The required volume for 227 acres is 681 afa (227 x 3). Right 65-07200 provides most of that water via 600 afa from natural flow and 60 afa from storage. The total volume for 65-07200 is 660 afa since the original application listed 3.2 cfs and two reservoirs at 30 af each. When combined, all three rights provide up to 730 afa from natural flow (600 afa) plus storage (130 afa). It is not clear if the combined rights should be limited to 681 afa or not. Traditionally, natural flow and storage from the same source have been considered as "different sources" due to the timing of when each type of water is normally provided – natural flow in the irrigation season and storage in the off-season. In this case, most of the irrigation and irrigation storage water occurs from 4/15 to 10/15 in 65-07200.

The key point is that the 227 acres are covered with full volume under these rights. In this case, I think that the combined rights include 730 afa instead of 681 afa due to the natural flow and storage factors. Of that total, 600 afa derives from natural flow in 65-07200 and 130 afa comes from storage via all three rights.

Mr. Eld is filing SRBA claims to reflect these revised license recommendations. Once the completed claims have been received at Western Region, SRBA staff will prepare a shape file that can be used in licensing and adjudication processes. In this manner the rights can be licensed and fully recommended to the adjudication court in an identical manner. The shape file will be forwarded to the State Office as soon as possible (about two weeks, I imagine).

See the maps in 65-07200 for the points of diversion and place of use for these rights. Table 1 on the next page outlines the revised license recommendations for the 227 acre PPOU.

Note that the licensing amendments are handled via the attached *Applications for Amendments of Permits*. This method was used to save time and effort in securing the owner's completion of the license amendment steps. These amendments will not be published in the local newspaper.

Table Notes

Season of use should reflect current standards:

65-07200 is 4/15 to 10/15 for all uses

65-07516 and 65-12120 are 4/15 to 10/15 irrigation from storage but for irrigation storage: all year for former and 10/15 to 4/15 (non-irrig. season) for latter

Acreage limitations:

65-07200 limited to 200 acres per irrigation season in PPOU

65-07516 limited to 200 acres per irrigation season in PPOU

65-12120 limited to 160 acres per irrigation season in PPOU

MEMORANDUM

TO: FILES

FROM: STEVE LESTER

DATE: AUGUST 11, 1989

RE: FIELD EXAM REPORTS FOR 65-07200, 65-07516, AND 65-12120

The Eld Ranch, Inc. acres covered by the above rights were last irrigated in 1985 via Eld Reservoir (D65-7200) and Laffinwell Creek. Field exams were conducted in October, 1987. Complications and delays in processing the reports were finally resolved, and the reports are forwarded for licensing.

Joe Eld recently called me to discuss a transfer for some portion of these rights. He requested that licensing be expedited for that reason. The main problem that occurs to me concerns the pump information. Joe could not produce any documentation for the pumps and could not identify the purchaser of the two pumps.

The rights provided direct flow and storage coverage for 227 acres. The following summary describes the acres and license recommendations.

Section	Tract	Acres: 65-07200	65-07516	65-12120	Total Ac.
19	SWSE	0	17	17	17
	SESE	30	40	40	40
20	NESW	30	20	0	30
	NWSW	39	22	2	39
	SWSW	36	36	36	36
	SESW	24	24	24	24
	NWSE	7	7	7	7
	SWSE	8	8	8	8
29	NENW	<u>26</u>	<u>26</u>	<u>26</u>	<u>26</u>
	TOTAL:	200	200	160	227

Note the exam fee paid for the rights (JJ memo of 8/15/86). A \$175 fee was paid for all three rights instead of the usual amounts for separate rights (\$175, \$100, and \$100 for 3.2cfs, 36 af, and 34 af). No objections to this were found during the report process.

The 130 ac-ft reservoir is not fully covered by valid rights. My letter of 2/1/88 in file 65-07200 addresses the discrepancy. Additional thoughts are offered here. 65-07516 allows 36 ac-ft for use from 5/1-10/1 and storage from 1/1-12/31. 65-12120 provides an additional 34 ac-ft for use from 5/1-10/1 but to be stored between 11/1-5/1. The combined 70 ac-ft can be stored during 11/1-5/1. However, only 36 ac-ft may be stored in the remainder of the year 5/2-10/31.

MICROFILMED

OCT 15 1999

Memo of 8/11/89 to 65-07200, 65-07516, 65-12120
Page 2

Therefore, to provide complete water right protection to the 130 ac-ft Eld Reservoir, a new water right application should be filed for Irrigation Storage. The application should provide 60 ac-ft from 11/1-5/1 ($60+70=130$) and 94 ac-ft from 5/2-10/31 ($94+36=130$), for a total not to exceed 94 ac-ft. The issue of Irrigation from Storage may present problems. Can a new appropriation be approved for a use that did occur but will not continue to occur due to CRP factors? Filing an adjudication claim in the SRBA to cover the additional storage is not an option due to the priority dates of the storage rights.

However, Joe Eld never responded to my 2/1/88 letter other than to indicate little interest in a new right during a telephone conversation earlier this year. He may change his mind if the three rights are licensed and available for transfer but do not provide adequate water for a proposed transfer. It is probably best to let the matter rest and keep this information in the files for reference if needed.

Re: Permits 65-7200, 7516, 12120 ✓

Dear Joe:

After our telephone conversation on 1/28/88, I spoke with Dave Tuthill, Regional Manager for this area. In order to license the above permits for the land enrolled in the CRP, it appears that more information is required despite my optimism during the call. We need as much information as possible concerning the pumps used beside the reservoir. The minimum acceptable information is the pump horsepower. Also, please provide the name and address of the buyer of the pumps.

The maximum capacity of the reservoir is 130 acre-feet. From the ASCS photos one finds 227 acres covered by the three permits. The acres are shown in the attached list. With a full reservoir and crops being irrigated, the equivalent of pumping directly from the creek occurred. Permit 65-7200, a direct flow right, covers this. The other two permits provide 70 acre-feet of storage in the 130 ac.-ft. system. Just under half of the storage is not covered by any water right, and you need to file a new Application for Permit (attached forms) for 60 ac.-ft. for the 227 acres to avoid illegal water storage. Developing a new right for CRP acres should be allowed using the same logic that accommodates licensing these acres.

Using this logic, your application would be submitted and, if approved in the usual eight-week time frame, will cover the storage water right deficit. The application should refer to the existing storage permits (7516 and 12120) and note that development already occurred for land now in the CRP. When you receive the approved permit, you could contact the department and request the Proof of Beneficial Use form, which would then be submitted with the appropriate exam fee to facilitate licensing. This office could then complete the "field" exam from the data collected last fall. By this method you will obtain a license for the remainder of the reservoir very quickly.

MICROFILMED

OCT 15 1999

I urge you to act swiftly in this matter to protect your property and water rights. Also, please submit the requested pump information by 2/19/88 to avoid any water right penalties. We will provide whatever help you desire.

Sincerely,

Steve Lester
Water Resource Agent

McCall, ID. 83638

Dec. 23, 1987

Re: Permits 65-7200, 7516, 12120, 7610, 7361

Dear Joe:

After meeting with you in late October, gathering field data, and reviewing the above water right files, I realize that additional information is needed to facilitate licensing of the permits. We discussed the details that you could provide to complete the water use picture. This letter serves to refresh your memory in the matter.

The three permits covering storage and use of irrigation water at and around Eld Reservoir are 65-7200, 7516, and 12120. These rights involve the land enrolled in the CRP. I have information about the sprinkler pipes, number of lines and heads per line, pressure readings, and nozzle sizes. Additional data is desired for pump details and sprinkler models. Pump information includes horse-power, brands, serial numbers, pump curves, pump test records, or anything else describing pumping capacity. What sprinkler models were used (for example, Rainbird 30B, Nelson F33, etc.) ? I need any of this data that is available to finish the licensing reports.

Permit 65-7610 is the Gold Fork River pumping plant. A partial exam was conducted on this system. Please consult your records to provide the horse-power of the large diesel engine. Sprinkler head measurements of water use will be made in the next irrigation season to complete the field work on this permit.

The last permit is 65-7361, diverting Boulder Creek to irrigate 120 acres in sections 1 and 12 as follows:

Section 1- NWSW 20 ac., SWSW 20 ac., SESW 40 ac.;
Section 12- NENW 40 ac..

The 120 acres may be irrigated as above or shifted to other tracts as long as the number of acres does not exceed the permit limit. You wondered if rights other than the Roseberry Irrigation District allocation covered the area shown above. No other rights are found on those portions of sections 1 and 12. There are two decreed Eld irrigation rights in the general vicinity. 65-2515 uses Boulder Creek to irrigate 67 acres in the NESE and SESE, sec. 2 and 77 acres in the NENE and SENE, sec. 13. 65-4033 uses the same source for 35 acres in SWNW and 10 acres in NWSW, all within sec. 12. A partial exam was conducted on

NOV 15 1987

permit 65-7361 and can be finished during the next irrigation season. Please remember that a measuring device should be installed in the Boulder Creek diversion ditch.

Concerning assignments of the permits, 65-7200 is the only one in your father's name (William Eld). The other four show "Eld Ranches, Inc.", except 65-12120 which lists "William Eld, President, Eld Ranches, Inc." as the owner. If you want to change any of these names, refer to the enclosed Assignment of Permit forms. Multiple permits may be included on one form. Also attached are the necessary forms to complete applications for transfers of water rights.

Please submit the requested information for the Eld Reservoir permits and the horse-power of the Gold Fork pump engine within 30 days to avoid jeopardizing your water rights in any way. This will allow the licensing process to continue. I'll be glad to help in any way possible.

Sincerely,

Steve Lester
Water Resource Agent

Department of Water Resources

RE: PERMIT NOS. 65-07200, 65-07516 AND 65-12120

Dear Joe and Vicki:

This letter concerns water right coverage for Eld Reservoir and land irrigated from the reservoir under the above referenced water right permits. As you recall, I did the field exams for the permits in October of 1987. I sent you a letter in early 1988 requesting additional information and recommending that you file another water right to cover part of the reservoir not already protected by these rights.

You provided the additional data. Another water right was not secured to cover the rest of the storage referenced in my 1988 letter. Also, the Snake River Basin Adjudication (SRBA) adds another layer of complexity to the situation.

SRBA recommendations by this agency will be made to the court in the next few months for your area. This provides the opportunity to complete the licensing of the three permits plus protect the rights in the SRBA. The final outcome, after the permits are licensed, will be decreed rights from the SRBA court. Decreed rights offer the ultimate water right protection under Idaho law.

The following steps can be used to accomplish the task. Please see the enclosed information to assist you in these steps.

1. Each permit must be amended to reflect development that occurred that is somewhat different than as permitted. Permit amendments in the licensing process are \$50 each (total \$150).

2. A new permit application must be filed to cover 60 acre-feet of storage not covered by the existing rights. See the mostly completed application form for details. Securing a new right will protect the balance of water used by this system. This protection becomes more important every year with respect to competing issues such as "fish flushing water." It is unlikely that the department can license the three permits while some of the storage water lacks

MICROFILMED

JUN 18 1999

June 16, 1999
Page 2

a water right (illegal diversion re I.C. § 42-351). The application fee is \$100.

3. SRBA claims must be filed to cover the three permits. Otherwise, the odd circumstance could occur in which licenses are issued but the rights are subsequently lost because they are not protected in the adjudication.

You can file the claims in one of two ways. One, file claims to reflect the 1987 license recommendations (see attachment). That method lists specific acres per right, all within the combined 227 acre place of use. Two, file claims to describe a 227 acre permissible place of use (PPOU). This means that all the rights are attached to all the acres where each right is limited to its authorized cap within the total area. This technique provides greater flexibility in using the rights.

I recommend the second choice. If you do that, the license recommendations will be adjusted to match the claims. Also, the new right will list the same 227 acres. Either SRBA option includes a filing fee of \$377, which itemizes as \$50 per claim plus \$1 per acre (only pay acre fee once, no charge for overlapping acres). Attached are three claim forms to complete and a sample PPOU page to help you with the claims.

Completion of these three steps will provide the required water right protection for the Laffinwell Creek system. The total cost to file these documents is \$627 as follows:

1) permit amendments	\$150
2) application for permit	\$100
3) SRBA claims	\$377

Steps one and three do not require this office to publish legal notices, but step two will include such publication. The publication time table will not adversely affect the other water right and SRBA processes discussed in this letter.

In order to meet the tight adjudication deadline, the filings should be made within 30 days, preferably as soon as possible. Please give me a call at 208-334-2190 if you have any questions or need any help in completing any of these things.

Sincerely,

Steve Lester
Water Rights Supervisor

TO: File 65-12120

FROM: Sharla

DATE: February 20, 1991

RE: Returned Field Exam

On this date, the field exam report for the above referenced file was returned to the region. According to the date proof of beneficial use was filed for this right, an adjudication claim is needed and has not yet been filed.

The region will solicit the claim and based upon response, either the field exam will be returned with the claim after being reviewed by the region for discrepancies, or the right will be disallowed in the Director's Report for failure of the holder to submit the claim.

Dear Permit Holder:

We are planning to conduct water right field examinations in the vicinity of your water right permit (the permit number is listed above your name) during the weeks of August 3 and August 10, 1987. A field examination is needed to verify your water use so that a water right license can be issued. In order to conduct your exam as efficiently as possible, please call this office to schedule a day and time during the above referenced weeks that is convenient for you. Please note that your system should be operating under normal conditions during the examination.

If there is a problem with scheduling or conducting the examination at this time, please call us and other arrangements can be made.

Sincerely,

Richard Gemperle

October 9, 1986

EXAMINATION FEE REMINDER

Dear Permit Holder:

Earlier this year you were mailed a certified letter by our state office, which described a new law related to your water right permit. The water right permit to which this law applies is identified by the number at the top of the mailing label above. The purpose of this letter is to act as a reminder of the new law and to warn you that your permit is now losing priority daily.

As described in the certified letter, House Bill 671 enacted by the 1986 Idaho Legislature requires payment of a fee before this Department can conduct the field examination needed to issue a license confirming use of water under the permit. As an alternative to submitting the fee, the Department will accept a field examination report completed by a certified water right examiner from the private sector. The certified letter described the procedure for selecting the latter alternative, whereby you initially notify us regarding which water right examiner you have selected, and provide a statement from the examiner as verification.

The date of priority of your water right permit is now being delayed one day for each day the response is late. Also, if the fee or completed field examination report are not submitted within a year from the sixty-first day after the certified letter was mailed, the permit may be lapsed and rendered invalid. The fee, or notice that a private field examination will be conducted, should be submitted as soon as possible if you wish to maintain your permit in a valid status.

Enclosed please find an Examination Fee Information Sheet, with the License Examination Fee Schedule printed on the back. This sheet should be submitted if either the fee payment option or the private examination option is selected. If you have questions or desire assistance in this matter, please feel free to contact this office.

Sincerely,

David R. Tuthill Jr.

DATE 8/15/86

TO Dave Turnill

SUBJECT FIELD EXAMINATION FEE for 65-12120, 65-7516 & 65-7200

I took one fee for three permits because two of the permits were for storage. I discussed this w/ Bob Flanagan and we concluded that if the storage had been included on the natural flow permit the dept. would have only charged for the rate of flow.

If you have any questions please let me know.

CERTIFIED MAIL

EXAMINATION FEE NOTICE

Dear Permit Holder:

Department records show that proof of beneficial use has been submitted for the above-referenced permit, but that a field examination has not yet been conducted to determine the extent of beneficial use of the water for licensing purposes.

House Bill 671 (effective April 4, 1986) enacted by the 1986 Idaho Legislature requires the payment of a fee before this department can conduct the field examination needed to issue a license confirming use of water under the permit. This letter is notification that the license examination fee is due within sixty (60) days of the date of this letter. The examination fee information sheet (enclosed) must be returned with the fee.

As an alternative to submitting the fee, the department will accept a field examination report completed by a certified water right examiner from the private sector. If you choose to have the examination done by a certified water right examiner, you need not submit the license examination fee to the department, but you must within sixty (60) days of the date of this letter return to the department, the examination fee information sheet showing appropriate information together with a statement from the certified examiner to verify that you have retained a certified examiner to conduct the field examination. If you choose this alternative, a completed field examination report must be submitted within one year of the date of this letter. You cannot later change your decision to use this alternative and submit the fee needed for the department to conduct the field examination, but you may change to another certified examiner.

Certified water right examiners are licensed engineers, geologists, or land surveyors certified by the department to conduct water right examinations. The procedure for certifying examiners results from the recently enacted HB 671 and is being developed at this time. A listing

MICROFILMED

OCT 15 1999

of certified water right examiners will be available from this department when examiners have been certified.

If your permitted use, in fact, has already been examined by the department and you have not asked to have the examination repeated, the fee requirement is not applicable to your permit. If you believe this is the case, please contact the department.

The license examination fee is to be based on the amount of water you indicate you have developed, as listed in item 6 on the examination fee information sheet. The amount of water on which the examination fee is based can be less than the permitted amount, if less water has been diverted and beneficially used. The licensed amount of water, however, will not exceed the amount you claim on the examination fee information sheet. The enclosed license examination fee schedule shows a listing of applicable fees.

FAILURE TO SUBMIT WITHIN THE SIXTY (60) DAY PERIOD, THE FEE OR THE STATEMENT THAT A CERTIFIED EXAMINER HAS BEEN RETAINED TO MAKE THE FIELD EXAMINATION, WILL BE CAUSE TO ADVANCE THE PRIORITY OF THE PERMIT ONE DAY FOR EACH DAY THAT THE FEE SUBMITTAL IS LATE.

FAILURE TO SUBMIT THE FEE OR THE COMPLETED FIELD EXAMINATION REPORT WITHIN A YEAR WILL BE CAUSE TO CONSIDER THE PROOF OF BENEFICIAL USE TO BE INCOMPLETE AND TO LAPSE THE PERMIT.

The attached examination fee information sheet and the fee may be submitted to the following department offices.

Re: Permit No. 65-12120

William Eld, President
Eld Ranches, Inc.
Route #1
McCall, ID 83638

Dear Mr. Eld:

Your approved copy of Application for Permit No. 65-12120 is enclosed and we direct your attention to the conditions of approval on the fourth page.

Please note that a special condition requiring you to install and maintain a measuring device at your point of diversion has been placed upon your permit. Enclosed is a letter describing the different types of measuring devices accepted by this Department.

The exercise of this permit may also be affected by the court's determination of water rights in the case of Idaho Power Company v. State of Idaho, et al., Civil No. 62237, currently pending before the District Court of Ada County.

Idaho Power officials tell us that because of Case No. U-1006-124 filed before the Idaho Public Utilities Commission, Idaho Power Company is asking the District Court of Ada County to determine whether the Power Company's water rights on the Snake River are protected against subsequent upstream appropriations in the waters of the Snake River and surface and subterranean tributaries between Milner Dam and Hells Canyon.

Since the use of water under your permit may affect the flows in this reach of the Snake River, the final decision in Idaho Power Company v. State of Idaho, et al. (Ada County Civil No. 62237) may determine to what extent the exercise of your permit may be subject to the water rights of Idaho Power.

While the Ada County court is examining this question, Idaho Power Company has not filed a specific protest to your permit.

MICROFILMED

However, the Department of Water Resources has been advised that the Power Company is not waiving any of its rights to contest or limit the exercise of your permit or a subsequent license or water right.

If you have any questions, please let us know.

Sincerely,

L. GLEN SAXTON
Chief, Operations Bureau
