License of Water Right No. 65-7953 Priority September 1, 1977 Amount .08 cfs

THIS IS TO CERTIFY, that JEAN R. LICK &/or CATHERINE H. GANN

of Horseshoe Bend, Idaho, has complied with the terms and conditions of Permit No. 65-7953 issued pursuant to Application for Permit dated September 1, 1977, and has submitted proof to the Department of Water Resources on November 30, 1978, that he has applied water to a beneficial use, an examination by the Department indicates that the works have a capacity for the diversion of .20 cfs of water from the Payette River, tributary to the Snake River, and that the permit holder has applied to a beneficial use and established a right to use water as follows:

Beneficial Use	Period of Use	Rate of Diversion	Annual Volume
Irrigation	from April 1 to November 1	at .06 cfs and	10.5 acre feet
stockwater	from January 1 to December	02 cfs and	.4 acre feet
	from	at cfs and	

(month date inclusive)

Subject, however, to the condition that no more than .08 cfs of water be diverted at any one time, and that the amount of water so diverted and to which such right is entitled and confirmed for the purpose aforementioned and is limited to the amount which can actually be beneficially used and shall not exceed 10.9 acre feet per year, said waters to be diverted within the (Govt. TO: **Files 65-07953/09015**

FROM: **Sharla**

DATE: **December 9, 1992**

RE: **Transfer Review (No. 4032)**

The above referenced transfer application proposes to add a point of diversion under these rights.

Advertising was completed correctly. Because this transfer is a point of diversion additional only, the standard condition regarding one year completion will not be imposed.

The transfer can be approved with the following conditions:

T09 Approval of this transfer does not preclude the opportunity for review of the validity of the water right(s) in the ongoing Snake River Basin Adjudication.

T08 Failure to comply with the conditions of this transfer is cause for the director to issue an order to show cause why the approval of the transfer should not be rescinded.

R32 This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.5 afa per acre for the lands above.

R04 Use of water under this water right will be regulated by the watermaster of State Water District No. 65.

Measuring devices and lockable controlling works of a type acceptable to the Department shall be permanently installed and maintained as part of the diverting works.

NOTICE OF PROPOSED CHANGE OF WATER RIGHT

NO. 65-07953, A65-07953, 65-09015, A65-09015

Notice is hereby given that Jean R. Lick of Emmett has applied to the Department of Water Resources for a change of Point of diversion of the water of Payette River. The right sought to be changed is evidenced by decree, license, and adjudication claims and is recorded as follows:

No. 65-07953, A65-07953
Amount: .08 cfs Priority: 9/01/1977
Point(s) of Diversion: Lot 1 (NENW) Sec. 32 T07N R02E, Boise County. The water is used for irrigation and stockwater purposes in Lot 1 (NENW) Sec. 32 T07N R02E for 3 acres.

No. 65-09015, A65-09015
Amount: .10 cfs Priority: 6/01/1910
Point(s) of Diversion: Lot 5 (SWSW) Sec. 26 T07N R02E, Boise County. The water is used for irrigation purposes in Lot 1 (NENW) Sec. 32 T07N R02E for 5 acres.

TO BE CHANGED AS FOLLOWS

No. 65-07953, A65-07953, 65-09015, A65-09015
Amount: .18 cfs
Point(s) of Diversion: Lot 5 (SWSW) Sec. 26, Lot 1 (NENW) Sec. 32 T07N R02E. The water will be used for irrigation and stockwater purposes for the same acres previously described (no change in place of use), 8 acres total.

Any protest against approval of the proposed change of water right application must be filed with the Department of Water Resources, Western Region, 2735 Airport Way, Boise, Idaho 83705 on or before November 23, 1992.

SUBJECT: REINSTATEMENT OF CLAIM

****

Claim A65-07953 in the name of Jean R. Lick was withdrawn on 4/16/1990 by the claimant due to "non-usage" as stated on the withdrawal. The claimant visited the office today regarding a transfer application to change the point of diversion of rights nos. 65-07953 and 65-09015 (Payette River). She clarified the situation to reveal that the withdrawal was made in error. She intended to show by the withdrawal that water was not used on the three acres in license no. 65-07953 for several years due to personal problems. Irrigation did not occur from sometime in 1986 until sometime in 1989. Forfeiture or abandonment did not occur since less than five years of non-use had occurred.

Therefore, by virtue of this statement, the claimant Jean R. Lick of Horseshoe Bend requests that claim no. A65-07953 be reinstated. The 1990 withdrawal was a misunderstanding and did not accurately reflect the facts in question. A fee is not required since the original claim was fee-exempt.

Re: Application for Transfer of Right Nos. 65-07953 and 65-09015

Dear Applicant:

A fax copy of an application for transfer to change the point of diversion of the above-referenced rights was received at this office on 5/7/92. The copy was sent by Mr. Orlin Clements of Horseshoe Bend Hydroelectric Company of Salt Lake City, Utah. I sent him a letter dated 6/11/92 requesting an application fee and the original application as well as additional information. A copy of the letter was mailed to you and to Catherine Gann.

Subsequently, Mr. David Hirschi of the same company sent a paper copy of the application. He stated that you have the original application. Therefore, I am writing to you today. A $30 application fee, the original application with a notarized signature, and additional information explained in my previous letter (copy attached) is required before the application can be processed.

Please respond by writing to me or contacting me for an appointment at my office within 30 days. I recommend an office visit due to complications in the water right process that are difficult to clarify by repeated letters. My telephone number is 334-2190. Without a timely response, the application must be considered void. If you have any questions, don't hesitate to contact me.

Sincerely,

Steve Lester

Re: Application for Transfer for Right Nos. 65-09015 and 65-07953

Dear Mr. Clements:

I am responding for Dave Tuthill to your fax copy of the transfer application to change the points of diversion of the above rights located in or near Horseshoe Bend. The following points need to be addressed before the application can be advertised and processed.

1. The original application and $30 fee are needed. The application should be signed by the owner of the land described in the place of use of the right(s). However, you may sign the application if you include proof of ownership of the place of use (such as a tax notice or deed) and written permission of the owner to change the right(s). Please work with the owner to settle this item.

2. An acceptable map showing the new diversion point should be included. The enclosed application and map can be used. Will the new diversion be directly from the river or will it be from a spot along the canal? If the latter is true, will the canal have a new diversion point from the river?

3. Should right no. 65-07953 be included in the transfer? According to records at this office, a Snake River Adjudication Claim, no. A65-07953, was filed to protect license no. 65-07953. However, the claim was subsequently withdrawn due to non-use as stated by the claimant, Catherine H. Gann (see attached copy of claim proof report). Therefore, it appears that the license is no longer valid (forfeiture or abandonment) and should not be included in the transfer.

4. If no. 65-07953 is included in the transfer, a valid adjudication claim must also be filed. Please be aware that the burden of proof to show that the right is still valid is assumed by the owner if 65-07953 is included in the transfer. The question must be resolved in the transfer process if the license is included. If excluded, no. 65-07953 will be assumed to be forfeited or abandoned and will be recommended as such in the adjudication process if future information does not contradict this conclusion.

MURDOCH MED

DEC 15 1992

5. The owner of the property described in 65-07953 must file an adjudication claim and submit evidence documenting use within the last five years if you wish to include the license in the transfer. Please indicate your intent.

A copy of this letter will be sent to Gene (Jean?) Lick and C. Gann.

Return the completed application, map, and fee to me as soon as possible. Let me know if you have any questions or need additional information.

Sincerely,

Steve Lester

RE: Water Right 65-7953 .08 CFS License
Water Right 65-9015 .10 CFS Decreed

Dear Mr. Tuthill:

Pursuant to our telephone conversation, we would like to request a temporary permit to change the point of diversion of the above mentioned permits from their current locations to Lot 5, Section 32, Township 7 North, Range 2 East of the Boise Meridian, Boise County, Idaho.

Our contractor had anticipated providing these water rights by pumping from an existing well located near the existing power canal. Due to the power canal reconstruction, the power canal cannot be used for water conveyance, and the lack of water in the canal has directly affected the quantity of available water in the well. To provide said water, with your concurrence, we would propose to temporarily move the points of diversion, as described above, to provide a dependable source of water.

We would appreciate your expeditious review of this matter. If you have any questions regarding this or any other matter, please contact me at (208) 736-8270.

RE: Water Right No. 65-07953

Dear Water Right Holder(s):

Department water right records show that you divert water from the Snake River or its tributaries under a water right that has a priority date later than December 29, 1976. This is the priority of the established minimum stream flow of the Snake River at the Weiser Gage (Weiser) in the amount of 4,750 cubic feet per second.

Because of the continuing drought conditions in the Snake River Basin, department hydrologists project that during 1992, there could be periods when the required minimum flow will not be satisfied due to low flows of the Snake River. The department urges you to not divert at a higher rate than authorized by your water right and to not use your right in any manner different than authorized. In addition, when the minimum flow will not be satisfied or is not being satisfied, you are required to cease diverting water under your water right, because your right is of later priority than the minimum stream flow at Weiser.

If the department determines the minimum flow will not be satisfied, the department will advise you and will provide as much lead time as possible in requiring that you temporarily cease your diversion of water. The greatest likelihood for this to occur is during a period from mid-June to late June.

While the department expects good cooperation from junior water right holders, water users should be aware that Section 42-352, Idaho Code, provides for penalties of up to $100 per day for unauthorized diversions of water.

The department has contacted both the Idaho Power Company and the U.S. Bureau of Reclamation with respect to the timing of storage releases from upstream reservoirs for flow enhancement purposes. This type of coordination could minimize the impact on existing water users and reduce the need to curtail diversions.

Dear Ms. Lick & Ms. Gann:

Re: Permit No. 65-7953

We acknowledge receipt of the affidavit submitted as proof of beneficial use for the above referenced permit.

Before a license can be issued, a field examination must be made by a representative of this Department. We cannot tell just when this examination will be made, but our examiner will try to contact you at the time he makes the examination so that you may show him the system.

If you have any questions regarding the field examination, please contact our regional office in Boise.

Sincerely,

Ladies:

One of the conditions of approval of your water Permit No. 65-7953 (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before January 1, 1979. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. If you have been prevented from proceeding by a governmental agency or by litigation, more than one extension of time can be granted.

Either the beneficial use affidavit or a request for an extension of time must be received by this Department on or before the above mentioned date, otherwise, the permit will lapse and be of no further force or effect.

Dear Ladies:

Enclosed is a copy of your approved Application for Permit No. 65-7953. We direct your attention to the conditions of approval as listed on the fourth page.

Please be advised that there is insufficient natural flow available in the Payette River and tributaries to provide water for a new appropriation throughout the entire irrigation season.

During the spring run-off each year, there may be a period of time in which the prior rights to the use of the natural flow and storage are filled leaving water available for your later-in-time permit. As the natural flow diminishes, however, there would be no water available for your right and unless you had arranged for an additional source of water to supplement the flow right, you may find that you have to cease irrigating in the middle of the season.

This information is provided so that you will not be mislead into thinking that this permit will provide sufficient water thru the entire irrigation season.

If you have any questions regarding this matter, please feel free to contact this office.

Sincerely,

BOBBY D. FLEENOR
