Dear Sirs:

Enclosed is a copy of the water right license issued for the above referenced permit. Also enclosed is Receipt No. 16775 for \$20 covering the amendment filing fee.

Prior to licensing of this permit we received a letter from Delores A. Robbins and would like to answer her questions pertaining to this water right. On August 19, 1977, the above permit application was filed and consequently approved on November 17, 1977. As a permit is considered personal property, it is not the Department's responsibility to make corrections to any items originally applied for by the applicant, nor would the Department be aware of any errors made on the application until a field examination was conducted. A copy of the approved permit and transmittal letter were sent to Mr. Robbins and Mr. Nasker on November 18, 1977. On September 30, 1978, we forwarded a notice by certified mail to you that proof of beneficial use was due to which you responded by submitting the proof of beneficial use affidavit on November 30, 1978. Then on July 9, 1979 (a typographical error was made in our letter of 3/28/80), a field examination was conducted and it was then discovered that the point of diversion originally applied for was incorrect and had to be changed before a license could be issued correctly covering the water right.

I hope this has answered Mrs. Robbins questions, however, if not please do not hesitate to contact us.

Sincerely,

JAN GROVER

Re: Robbins/Nasker, Ident. No. 65-7943

ATTENTION: Jan Grover

Dear Ms. Grover:

Enclosed herein is completed Application for Amendment of a Permit, which is apparently being required of us "to change the point of diversion." In completing the original filings we requested and received from Valley County personnel the information that our lands and thus, point of diversion, was located in the $\frac{1}{2}$ as originally filed by us. Apparently, we were incorrectly informed of the location of our lands, and because of this error are required to file an application for amendment of permit. Why couldn't this correction have been made to our application prior to the issuance of permit, which we did not even know had been issued? This is the first communication we have had from your office since December 4, 1978, acknowledging receipt of our affidavit of proof of beneficial use.

I am enclosing a check in the sum of \$20.00, paid under protest. I might call to your attention that your letter of March 28, 1980, which indicates field examination was made on July 9, 1977; our original application for permit was filed in August, 1977, and filing of application approved in November, 1977.

Sincerely,

Delores A. Robbins

Dear Sirs,

A representative of this Department made an examination of the works covered by your Permit No. 65-7943 on July 9, 1977, and has found the following:

Amount of water that can be recognized as beneficially used under
Idaho law: 0.04 cfs Source: a spring

The maximum quantity diverted shall not exceed 1.2 acre feet
per year.

Point of diversion: SE $\frac{1}{4}$ NE $\frac{1}{4}$, Sec. 10, Twp. 11N, Rge. 3E, B.M.

Beneficial use: Domestic use for 2 homes within the SE $\frac{1}{4}$ NE $\frac{1}{4}$, Sec. 10,
Twp. 11N, Rge. 3E.

Priority date established: August 19, 1977

In order for the Department to issue the above license, it will be necessary for you to amend the permit to correspond with the findings of the field examiner. We are enclosing a partially completed amendment form for your use in this matter.

Please sign the amendment application and return it to this office along with a \$20.00 filing fee within 30 days in order that we might issue your license as set forth above. If you do not concur with these findings or have any questions, please contact us within the 30-day period.

was completed October, 1976, and consists of a large, storage cavity in the ground, lined
and filled with gravel; concrete tiles were stacked in the pit, and a pump lowered into
the tiles, and the whole covered over. People who have made installations of this nature
have told us that flow probably would increase by continuous use, and that is a characteristic
of the type of "water bar" we struck. Although use has been only on weekends, or an
occasional week, for vacation use, we have not "pumped it dry." The overflow pipe is
at the 6-foot level, and does not flow all the time. We do not have any idea of the
rate of flow.

The above information is a true statement of the extent to which the above numbered permit has been developed.

Gentlemen:

One of the conditions of approval of your water Permit No. 65-7943 (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before December 1, 1978. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. If you have been prevented from proceeding by a governmental agency or by litigation, more than one extension of time can be granted.

Either the beneficial use affidavit or a request for an extension of time must be received by this Department on or before the above mentioned date, otherwise, the permit will lapse and be of no further force or effect.

Gentlemen:

Enclosed is a copy of your approved Application for Permit No. 65-7943. We direct your attention to the conditions of approval as listed on the fourth page.

Please be advised that there is insufficient natural flow available in the Payette River and tributaries to provide water for a new appropriation throughout the entire irrigation season.

During the spring run-off each year, there may be a period of time in which the prior rights to the use of the natural flow and storage are filled leaving water available for your later-in-time permit. As the natural flow diminishes, however, there would be no water available for your right and unless you had arranged for an additional source of water to supplement the flow right, you may find that you have to cease irrigating in the middle of the season.

This information is provided so that you will not be misled into thinking that this permit will provide sufficient water thru the entire irrigation season.

If you have any questions regarding this matter, please feel free to contact this office.

Sincerely,
