Dear Ms. Balock:

Re: Permit No. 65-7790 - Richard Dowling

The department received your letter of March 23, 1987 in which you stated that you had talked with Kay Walker of this office concerning proof of beneficial use. In this letter I wish to explain a little more about water right processing.

Water law allows a person to divert water from a groundwater source to develop a single family domestic use with some stockwater use and up to one-half acre of irrigation without getting a water right permit to do so. The addition of more houses and/or irrigation would require the use be recorded by the application/permit/licensing process.

Permit No. 65-7790 is now at the stage where documentation of beneficial use (proof of beneficial use form) or a request for additional time is needed to maintain the permit record. If the proposed water right has not been developed or only partially developed, then proof should not be submitted and an extension of time should be sought. This permit, however, has already received one extension of time based on due diligence and unless there has been litigation, or delay by a governmental agency, I don't think the department would grant another extension. This would put the permit where it would lapse. But as mentioned above, if the water use is for a single family domestic use, a permit is not needed.

For your information, I've enclosed a copy of the permit along with the request for extension of time granted in 1982. The permit proposes the use of water for ten domestic uses. Note the handwritten part of the extension request. It states that a well has been installed and five parcels of land have been sold. I'm assuming that houses now exist on several, if not all, of the five parcels. This water right would cover those uses.

DEC 05 1988

Along with your letter, there was a proof of beneficial use form. The proof indicates that there are five domestic uses with a total diversion of 0.04 cfs. (Based on this rate of diversion, there is no examination fee required). This amount of water is equal to about 18 gpm. This appears to be a small amount of water for five households. If the well is producing more at the time of the field examination, Mr. Dowling will be given an opportunity to pay the difference in the fee for the rate of diversion actually being use so the license will reflect the actual water right.

The permit has lapsed; but contrary to your letter, I will accept the proof form and reinstate the permit with an advance in priority due to late submittal of proof. Then, I will notify the regional office that a field inspection is needed. Mr. Dowling will be notified of the department findings and recommendations for licensing. If this is not proper action to take, please advise.

In the future, if Mr. Dowling does decide to develop another well and supply water to a single family domestic residence, no water right permit will be needed. If the use is greater, then Idaho law requires him to apply for another water right permit. As of July 1, 1987, new legislation goes into effect that will make it necessary, however, to acquire what is known as a well permit. This permit is necessary for the drilling of the well and is required whether or not a water right permit is acquired.

If you have any questions concerning any of these matter, please feel free to contact this office.

Sincerely,

RITA I. FLECK

Dear Ms. Walker:

This is to confirm our telephone conversation of March 19, 1987 regarding permit number 65-7790 held by my client, Richard Dowling.

I was seeking information regarding your form entitled "Proof of Beneficial Use" to extend the permit referred to above. It is my understanding from your comments that a single residence built on a property does not require a permit. That if Mr. Dowling were to seek to extend this present permit, a pump and pipeline would need to be installed to show progress toward building and eventual water use. Also I understood you to say that if Mr. Dowling's building plans were to be more extensive, and the permit had lapsed, he would be able to apply for another permit.

This information being correct, Mr. Dowling will be allowing his permit to lapse since he expects to build a single family residence. If any of the above information is incorrect, or the situation changes, ie. a water permit moritorium is imposed in this area of the state, please notify Mr. Dowling.

Thank you for your assistance.

Sincerely,

Elaine M. Balok

Dear Mr. Dowling:

Thakk you for responding to our letter of November 30, 1981. Your extension of time request for Permit No. 65-7790 was received on December 8, 1982.

However, since it did not include the necessary filing fee of $15.00 I am returning it to you.

Tbb proof due date is February 1, 1982, therefore your prompt attention is necessary so that your date of priority for this right is not adversley affected. Please return the extension request with the $15.00 filing fee as soon as possible.

On February 1, 2982 your permit will officially lapse. It can be reinstated, however, provided you respond within 60 days of said date. One day of priority will be lost for each day after February 1, 2982,,that we don't hear from you.

If you have any questions on this matter, please call me at 334-4162.

Sincerely,
