RE: Pre-permit examination

On August 4, 1976, Mrs. Venita Bowers accompanied me on an inspection of her proposed diversion works. The source of water is an unnamed spring not tributary to a stream. The spring has been developed with a buried concrete box and piped from the box with 1½ inch steel pipe. The spring flowed from the pipe at a rate of 23 gallons per minute as measured with a gallon container and stop watch.

The water has not been piped to the place of use as yet. The spring (point of diversion) and the place of use are all contained on property owned by the applicant.
