Dear Mr. Hait;

Enclosed is a copy of an Order which removes the measuring device requirement from this permit.

We acknowledge receipt of the affidavit submitted as proof of beneficial use for the above referenced permit.

Before a license can be issued, a field examination must be made by a representative of this Department. We cannot tell just when this examination will be made, but our examiner will try to contact you at the time he makes the examination so that you may show him the system.

If you have any questions regarding the field examination, please contact our Regional Office in Boise.

Due to what would appear to be impractical at the present time and under present circumstances, I am requesting that the requirement for a measuring device in connection with Permit No. 65-7535 be waived.

Thank you for your attention to this matter. I will look forward to hearing from you.

Dear Mr. Hait:

This office acknowledges receipt of proof of beneficial use for the above referenced permit.

In view of the remarks on the proof it appears it may not be practical at this time to install the measuring device. The Department would probably waive the measuring device requirement if you were to make a written request to that effect. I also should advise that even though the measuring device requirement may be waived, it could be required sometime in the future after the rights on the Payette River are adjudicated and there is a need for the orderly distribution of water by priority.

Please advise me of your intentions in this matter.

Dear Mr. Hait:

One of the conditions of approval of your water Permit No. 65-7535 (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before June 1, 1978. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. If you have been prevented from proceeding by a governmental agency or by litigation, more than one extension of time can be granted.

Either the beneficial use affidavit or a request for an extension of time must be received by this Department on or before the above mentioned date, otherwise the permit will lapse and be of no further force or effect.

Enclosed is a copy of Permit No. 65-7535. This application has been advertised without any protests being filed and is ready for approval. A minor change must be made on the original application form however, ~~before~~ approval can be made. The amount of 15 A.F. under item (4) should be changed to read 20 A.F. for storage for irrigation. This change is necessary so that item (4) and (5) will correspond. Dear Sir:

Thank you for your February 5 letter enclosing the Certificate of Approval for the Hait Dam, Section 2, Township 17N, Range 2E, Valley County.

I note your suggestion that the material washed from the spillway area be channeled to provide the complete drainage of the toe area. This I will take care of as soon as possible after the early spring runoff when it will be possible to operate a tractor in that area.

Concerning your question about the newly constructed dam downstream from this dam, this is to advise that I am the owner, the height is 13', the storage capacity is approximately 20 acre feet. I constructed this dam in the fall of '73 for the purpose of increasing slightly the available water for irrigation. The dam was constructed by Mr. Arthur Fairchild of Midvale, Idaho, and the information I had from the Soil Conservation Service indicated that this small size dam would not have to have Reclamation approval.

If there are any further questions, I will be glad to answer them.

Yours very truly,
