Re: Permit No. 65-7235

L. D. S. Church (Payette Ward)
Payette,
Idaho 83661

Gentlemen:

One of the conditions of approval of your water Permit No. 65-7235 (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before November 1, 1973. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. If you have been prevented from proceeding by a governmental agency or by litigation, more than one extension of time can be granted.

Either the beneficial use affidavit or a request for an extension of time must be received by this Department on or before the above mentioned date, otherwise the permit will lapse and be of no further force or effect.

Gentlemen:

Enclosed you will find a legal notice which we wish to have published once a week for two consecutive weekly issues of your newspaper. We have inserted the publication dates allowing ample time for you to submit us a galley proof for our review before publication.

After sending us a galley proof, proceed with the publication on the dates we have inserted assuming the notice is correct. If we have any corrections, we will notify you before the first publication date. If you cannot publish the notice on the proposed dates please contact us immediately.

An affidavit of publication must be submitted to the Department along with the publication bill. In order to receive payment, the following certification must appear on the bill:

"I hereby certify that the foregoing account is just and correct, that the amount claimed is legally due, after allowing all just credits, and that no part of the same has been paid."

(signature of claimant)

Very truly yours,

Donald W. McEldowney

ATTENTION: Robert A. Michie, 1st Counselor

Dear Mr. Michie:

We are returning your application for permit as there are several questions that need clarification before we could process it.

Item #3a of the application should list the location of the well as to the nearest 40 acre subdivision, section, township and range that it lies within. Item #4 should list a nature of use for the water. Item #8a should also describe the place of use for the water as to the nearest 40 acre subdivision, section, township and range that it would incur within. Under item #8b, you have indicated that the water will be used for the irrigation of three acres. Under normal conditions, the Department would consider one miners inch or 0.02 cubic feet per second of water to be a sufficient quantity of water for each irrigated acre. This amount should also be included under item #4 of the application. You should also include a map on page three, showing the location of your well and the place of use.

The filing fee for this application is based on the quantity of water that you are intending to appropriate. This fee can be determined from page three of the enclosed instructions.

If we may be of any further assistance in this matter, please advise.

Very truly yours,

Dorian Clay
Appropriation Examiner

ATTENTION: Robert A. Michie

Dear Mr. Michie:

We are returning your application for permit which we have taken the liberty to type.

We are missing some additional information that makes the application acceptable under Idaho's statutes. Please insert the additional information and return it with the filing fee for processing.

The legal description you have submitted will not be efficient for use by the Department and its records. We, therefore, request that you contact the County Assessor's office with your description and find out what 40-acre tract of the Government survey system in Section 34 is properly located in. It would be a description something like the NW¹/₄, Sec. 34.

We will also need a filing fee based on the quantity of water to be appropriated. The filing fee for 50 gallons per minute or approximately .1 of a cubic foot per second would be a \$10.00 fee.

Your assistance in this matter is greatly appreciated.

Very truly yours,

Donald W. McEldowney

Dear Mr. Clay.

I am re-applying for permit to drill well for the new Church bldg. which is currently under construction. I believe everything is complete with the exception of the map on page 3. As construction is still underway and plans are not specific as to exact location of well this has not been included. It will be in the north west section of the 3 acre tract. Enclosed is also a copy of the legal description of the tract of land to be irrigated by the well.

Thank you
