

IN THE MATTER OF THE GENERAL DETERMINATION OF RIGHTS TO THE USE OF PAYETTE RIVER DRAINAGE BASIN. NOTICE OF CLAIM TO A IDENT. NO. 65-7200 MAP NO. 65-7200

Notice is hereby given that William Eld (Name of Claimant) Route #1, Box #63, McCall, ID 83638, claims a right to the diversion

and beneficial use of the surface or groundwater, of or tributary to Payette River; The extent and nature of said claim is as follows:

(1) Date of priority: (When was the water first applied to a beneficial use, or date that permit was issued) 6/11/71

(2) Describe the source of water: (Name of stream, lake, spring, etc., or groundwater) Laffinwell Creek

(3) Describe the purpose for which the water has been used and the time during the year when you have used the right claimed:

Quantity 3.2 cfs Use irrigation Period of Use From May 15 To Oct. 15 (CFS, GPD, AF.) (Domestic, irrigation, stock, etc.) (Mo., Day) (Mo., Day) (Both Dates Inclusive)

Quantity (CFS, GPD, AF.) Use (Domestic, irrigation, stock, etc.) Period of Use From (Mo., Day) (Mo., Day) (Both Dates Inclusive)

Quantity (CFS, GPD, AF.) Use (Domestic, irrigation, stock, etc.) Period of Use From (Mo., Day) (Mo., Day) (Both Dates Inclusive)

(4) 3.2 cfs TOTAL QUANTITY CLAIMED. (CFS, GPD, AF.)

(5) A) Point of Diversion: Give location of point where water is diverted from its source NE 1/4 NW 1/4, Sec. 29, Twp. 16N, Rge. 4E, B.M.; additional points: NE 1/4 SW 1/4, Sec. 20, T. 16N, R. 4E.

B) Describe means of diversion of water: (Pump and pipeline, well, diversion dam, reservoir, length of ditch and field, etc.) Give sizes and capacities; be as specific as possible. two earth fill dams each 20' high with reservoirs storing 30 AF each. water will sprinkle and flood irrigate.

(6) A) Describe location of use by listing number of irrigated acres within each 40-acre tract in appropriate box. If use is not for irrigation, place an "X" in appropriate box to show location.

T	R	SEC	NE 1/4				NW 1/4				SW 1/4				SE 1/4				TOTAL
			NE 1/4	NW 1/4	SW 1/4	SE 1/4	NE 1/4	NW 1/4	SW 1/4	SE 1/4	NE 1/4	NW 1/4	SW 1/4	SE 1/4	NE 1/4	NW 1/4	SW 1/4	SE 1/4	
16N	4E	20									40	40	40	40					160
		29					40												40

Total No. of acres 200

B) If water is used for other than irrigation, fully describe that use, being as specific as possible:

(7) Effluent, sewage waste, or return water from this use is discharged into

(8) If you are claiming water as a member of an organization, list name of organization.

(9) Remarks

(10) Basis of claim (Check one) ☐ A) Right based on diversion and beneficial use. ☐ B) Right decreed by court, cite title of case.

☒ C) Right based on application, permit, license, or claim filed with the Idaho Department of Water Administration. Permit # 65-7200

Be it known that the undersigned, after being duly sworn on oath, depose(s) and say(s) that all statements included herein are true and accurate to the best of (his, her, their) knowledge.

IN THE MATTER OF PERMIT NO. 65-7200)
IN THE NAME OF WILLIAM ELD)

ORDER OF REINSTATEMENT

WHEREAS, on May 19, 1971, William Eld filed with the Department of Water Resources (formerly the Department of Water Administration) an application for permit to appropriate 3.20 cubic feet per second of water from Laffinwell Creek to be diverted within the NE $\frac{1}{4}$ NW $\frac{1}{4}$, Sec. 29; NE $\frac{1}{4}$ SW $\frac{1}{4}$, Sec. 20; Twp. 16N, Rge. 4E, B.M., Valley County, to be used for irrigation purposes; and,

WHEREAS, on August 15, 1972, the Department approved said application and issued Permit No. 65-7200 with the condition that proof of construction of works and application of water to beneficial use be submitted to the Department on or before August 1, 1977; and,

WHEREAS, on May 31, 1977, the Department notified the permit holder that proof of beneficial use was due and instructed the permit holder as to the steps to be taken to make said proof; and,

WHEREAS, on August 11, 1977, the Department notified the permit holder that Permit No. 65-7200 had lapsed for failure to submit proof of beneficial use; and,

WHEREAS, on August 24, 1977, the Department received the required proof of beneficial use of water; and,

WHEREAS, Section 42-218a of the Idaho Code provides that a permit may be reinstated upon a showing of reasonable cause within 60 days from the date of the notice of lapsing; and,

WHEREAS, the permit holder has provided a reasonable showing as to why said permit should be reinstated;

IT IS, THEREFORE, HEREBY ORDERED that Permit No. 65-7200 be REINSTATED and the priority advanced to June 11, 1971.

FILED

JUN 17 1971

Dear Sir.

65 7200

Department of Water Administration

I would like to file a protest against an application for a water permit applied for by William Eld of Donnelly.

As the only good water that runs in this creek is during the spring run-off, and then dries up until it only is barely enough for stock water. We have the adjoining property directly below Mr. Eld and feel that this would create a problem to even get stock water. I understand the people that owned ~~this~~ ^{our} property before we owned it, had in mind to build a

small dam and irrigate from it and
found the fall of the ground was too
steep to make it possible to store any
amount of water.

Thank you,

Sincerely

Laurel Hansen

RE: WATER RIGHT NO. 65-07200

Dear Water Right Holder(s):

The Department of Water Resources (the Department) has issued the enclosed license confirming that a water right has been established in accordance with the permit referenced above. The license is a preliminary order issued by the Department pursuant to section 67-5243, Idaho Code. It can and will become a final order without further action of the Department unless a party petitions for reconsideration or files an exception and/or brief as described in the enclosed information sheet.

For your records I have also enclosed a copy of your Application for Amendment of Permit, which was approved.

Also, please note that water right owners are required to report any change of water right ownership and/or change of mailing address to the department within 120 days of the change. Failure to report these changes could result in a \$100 late filing fee. Contact any office of the department or visit the department's homepage on the Internet to obtain the proper reporting form.

If you have any questions, please call me at 208-327-7946.

Sincerely,

Shelley W. Keen
Water Rights Supervisor

Responding to Preliminary Orders Issued by the Idaho Department of Water Resources

The Idaho Department of Water Resources (Department) issues water right permits, licenses, and transfers as preliminary orders pursuant to section 67-5243, Idaho Code. A preliminary order can and will become a final order without further action of the department unless a party petitions for reconsideration or files an exception and/or brief as further described below:

PETITION FOR RECONSIDERATION

Any party may file a petition for reconsideration of a preliminary order with the Department within fourteen (14) days of the service date of the order. The Department will act on a petition for reconsideration within twenty-one (21) days of its receipt, or the petition will be considered denied by operation of law. See section 67-5243(3), Idaho Code.

EXCEPTIONS AND BRIEFS

Within twenty-one (21) days after (a) the service date of a preliminary order, (b) the service date of a denial of a petition for reconsideration from this preliminary order, or (c) the failure within twenty-one (21) days to grant or deny a petition for reconsideration from a preliminary order, any party may in writing support or take exceptions to any part of a preliminary order and may file briefs in support of the party's position on any issue in the proceeding. Otherwise, a preliminary order will become a final order of the Department.

If any party appeals or takes exceptions to a preliminary order, opposing parties shall have twenty-one (21) days to respond to any party's appeal. Written briefs in support of or taking exceptions to the preliminary order shall be filed with the Department. The Department retains the right to review the preliminary order on its own motion.

ORAL ARGUMENT

If the Department grants a petition to review a preliminary order, the Department shall allow all parties an opportunity to file briefs in support of or taking exceptions to the preliminary order and may schedule oral argument in the matter before issuing a final order. If oral arguments are to be heard, the Department will within a reasonable time period notify each party of the place, date and hour for the argument of the case. Unless the Department orders otherwise, all oral arguments will be heard in Boise, Idaho.

MICROFILMED

OCT 15 1999

CERTIFICATE OF SERVICE

All exceptions, briefs, requests for oral argument and any other matters filed with the Department in connection with a preliminary order shall be served on all other parties to the proceedings in accordance with Rules of Procedure 302 and 303.

FINAL ORDER

The Department will issue a final order within fifty-six (56) days of receipt of the written briefs, oral argument or response to briefs, whichever is later, unless waived by the parties or for good cause shown. The Department may remand the matter for further evidentiary hearings if further factual development of the record is necessary before issuing a final order. The department will serve a copy of the final order on all parties of record.

Section 67-5246(5), Idaho Code, provides as follows:

Unless a different date is stated in a final order, the order is effective fourteen (14) days after its issuance if a party has not filed a petition for reconsideration. If a party has filed a petition for reconsideration with the agency head, the final order becomes effective when:

- (a) the petition for reconsideration is disposed of; or
- (b) the petition is deemed denied because the agency head did not dispose of the petition within twenty-one (21) days.

APPEAL OF FINAL ORDER TO DISTRICT COURT

Pursuant to sections 67-5270 and 67-5272, Idaho Code, if this preliminary order becomes final, any party aggrieved by the final order or orders previously issued in this case may appeal the final order and all previously issued orders in this case to district court by filing a petition in the district court of the county in which:

- i. A hearing was held,
- ii. The final agency action was taken,
- iii. The party seeking review of the order resides, or
- iv. The real property or personal property that was the subject of the agency action is located.

The appeal must be filed within twenty-eight (28) days of this preliminary order becoming final. See section 67-5273, Idaho Code. The filing of an appeal to district court does not itself stay the effectiveness or enforcement of the order under appeal.

Re: Licensing Recommendations
.....

In review of this permit, I found the reason for an advanced priority date was due to proof being submitted late. The exam fee for this right was submitted in a timely manner but we had sent an exam fee reminder notice to the right holder in error.

Steve found during his exam that Mr. Eld has a 130 acre foot reservoir from Laffinwell Creek. Permit 65-07516 covers 36 acre feet of storage water and Permit 65-12120 covers 34 acre feet of storage. The remaining 60 acre feet of storage water have been recommended under this right since the original application for permit does describe two dams approximately 30 acre feet each. The permit holder can store water and divert live flow from Laffinwell Creek when water is available. See Steve's memo of August 12, 1999, for further explanation of this system.

Re: Licensing Recommendations

.....
.....
In reviewing these rights for licensing, I noticed that the measuring device condition had been removed from Rights 65-07200 & 65-07516 during the permit period. There is a request to remove the measuring device condition from 65-12120 while being licensed.

I discussed this with Tim Luke since he works closely with the water district on the Payette and he stated that the watermaster is not currently measuring any diversions in the area of the North Fork of the Payette. Since no water rights are currently being measured in this area, I recommend we license these rights with condition 01P – "Upon specific notification by the Dept., the right holder shall install a lockable device of a type acceptable to the Dept. in a manner that will provide the watermaster suitable control of the diversion." This will allow IDWR to request installation in the future if it is determined necessary.

REVISED FIELD EXAM RECOMMENDATIONS

ELD RESERVOIR RIGHTS

65-07200, 65-07516 AND 65-12120

Steve Lester, August 12, 1999

Joe Eld visited the office yesterday in response to my letter of June 16, 1999. This memo summarizes the results of our meeting and serves as the revised license recommendations for the three rights for Eld Reservoir.

Combine the rights into a 227 acre permissible place of use (PPOU) shown in *Exhibit 1*. Use the current standard season of April 15 through October 15 for irrigation and irrigation from storage uses. Allow the following periods to store water based on the current irrigation season and the intent in each permit: 65-07200 during the irrigation season, 65-07516 all year, and 65-12120 outside of the irrigation season. The standard diversion volume of 3 afa/acre is provided (2 afa/acre consumptive use). Show the correct tributary name, Gold Fork River.

Recognize all 130 af of storage. Note that 65-07200 was originally filed to provide .02 cfs (1") per acre plus up to 60 af of storage (see *Exhibit 2*). I mistakenly overlooked this storage intent in 65-07200 until Mr. Eld pointed it out yesterday. Therefore, a new right is not needed to cover the "missing 60 af of storage" previously mentioned in my 1988-1999 letters to the owners. The Dam Safety file identified as D65-7200 supports this "storage intent." Note that the reservoir was last certified by IDWR on October 27, 1997.

The required volume for 227 acres is 681 afa (227 x 3). Right 65-07200 provides most of that water via 600 afa from natural flow and 60 afa from storage. The total volume for 65-07200 is 660 afa since the original application listed 3.2 cfs and two reservoirs at 30 af each. When combined, all three rights provide up to 730 afa from natural flow (600 afa) plus storage (130 afa). It is not clear if the combined rights should be limited to 681 afa or not. Traditionally, natural flow and storage from the same source have been considered as "different sources" due to the timing of when each type of water is normally provided – natural flow in the irrigation season and storage in the off-season. In this case, most of the irrigation and irrigation storage water occurs from 4/15 to 10/15 in 65-07200.

The key point is that the 227 acres are covered with full volume under these rights. In this case, I think that the combined rights include 730 afa instead of 681 afa due to the natural flow and storage factors. Of that total, 600 afa derives from natural flow in 65-07200 and 130 afa comes from storage via all three rights.

Mr. Eld is filing SRBA claims to reflect these revised license recommendations. Once the completed claims have been received at Western Region, SRBA staff will prepare a shape file that can be used in licensing and adjudication processes. In this manner the rights can be licensed and fully recommended to the adjudication court in an identical manner. The shape file will be forwarded to the State Office as soon as possible (about two weeks, I imagine).

See the maps in 65-07200 for the points of diversion and place of use for these rights. Table 1 on the next page outlines the revised license recommendations for the 227 acre PPOU.

Note that the licensing amendments are handled via the attached *Applications for Amendments of Permits*. This method was used to save time and effort in securing the owner's completion of the license amendment steps. These amendments will not be published in the local newspaper.

	Irrigation from storage	---	34
	Subtotal	---	34
Total for all rights		3.2	600 natural flow volume 130 storage volume 730 total volume

Table Notes

Season of use should reflect current standards:

65-07200 is 4/15 to 10/15 for all uses

65-07516 and 65-12120 are 4/15 to 10/15 irrigation from storage but for irrigation storage: all year for former and 10/15 to 4/15 (non-irrig. season) for latter

Acreage limitations:

65-07200 limited to 200 acres per irrigation season in PPOU

65-07516 limited to 200 acres per irrigation season in PPOU

65-12120 limited to 160 acres per irrigation season in PPOU

To complete Eld Reservoir licensing of 3 Rights

- ✓ ① Pay \$150 licensing amendment fees.
- ✓ ② Sign & return mesa device waiver request for 65-12120.
Can't license without 1 & 2 completed.
- ✓ ③ Sign & return 3 SPBA claims to protect Rights Claims prepared based on revised license recommendation.
Need (a) notarized signature
 - ✓ (b) \$377 fee : \$1 per acre for 227 ppm plus \$50/claim. The additional \$150 late fee for claims is waived.
 - ✓ (c) Send originals but keep yellow copies.
- ✓ ④ No new Right needed to cover GO AF for Reservoir - As Joe correctly pointed out yesterday. Turn & my error on that point!
- ✓ ⑤ Copies of some info provided for your Records.

Your prompt reply will allow IDWR to issue license & then recommend license to SPBA court ... and result will be cleared (the best type of) water Rights Tight court schedule ~~as~~ soonest is best.

Call me at 334.2190 if any questions

Thanks for your efforts

RE: PERMIT NOS. 65-07200, 65-07516 AND 65-12120

Dear Joe and Vicki:

This letter concerns water right coverage for Eld Reservoir and land irrigated from the reservoir under the above referenced water right permits. As you recall, I did the field exams for the permits in October of 1987. I sent you a letter in early 1988 requesting additional information and recommending that you file another water right to cover part of the reservoir not already protected by these rights.

You provided the additional data. Another water right was not secured to cover the rest of the storage referenced in my 1988 letter. Also, the Snake River Basin Adjudication (SRBA) adds another layer of complexity to the situation.

SRBA recommendations by this agency will be made to the court in the next few months for your area. This provides the opportunity to complete the licensing of the three permits plus protect the rights in the SRBA. The final outcome, after the permits are licensed, will be decreed rights from the SRBA court. Decreed rights offer the ultimate water right protection under Idaho law.

The following steps can be used to accomplish the task. Please see the enclosed information to assist you in these steps.

1. Each permit must be amended to reflect development that occurred that is somewhat different than as permitted. Permit amendments in the licensing process are \$50 each (total \$150).

2. A new permit application must be filed to cover 60 acre-feet of storage not covered by the existing rights. See the mostly completed application form for details. Securing a new right will protect the balance of water used by this system. This protection becomes more important every year with respect to competing issues such as "fish flushing water." It is unlikely that the department can license the three permits while some of the storage water lacks

Page 2

a water right (illegal diversion re I.C. § 42-351). The application fee is \$100.

3. SRBA claims must be filed to cover the three permits. Otherwise, the odd circumstance could occur in which licenses are issued but the rights are subsequently lost because they are not protected in the adjudication.

You can file the claims in one of two ways. One, file claims to reflect the 1987 license recommendations (see attachment). That method lists specific acres per right, all within the combined 227 acre place of use. Two, file claims to describe a 227 acre permissible place of use (PPOU). This means that all the rights are attached to all the acres where each right is limited to its authorized cap within the total area. This technique provides greater flexibility in using the rights.

I recommend the second choice. If you do that, the license recommendations will be adjusted to match the claims. Also, the new right will list the same 227 acres. Either SRBA option includes a filing fee of \$377, which itemizes as \$50 per claim plus \$1 per acre (only pay acre fee once, no charge for overlapping acres). Attached are three claim forms to complete and a sample PPOU page to help you with the claims.

Completion of these three steps will provide the required water right protection for the Laffinwell Creek system. The total cost to file these documents is \$627 as follows:

✓ 1) permit amendments	✓ \$150
~~2) application for permit~~	~~\$100~~
✓ 3) SRBA claims	\$377

Steps one and three do not require this office to publish legal notices, but step two will include such publication. The publication time table will not adversely affect the other water right and SRBA processes discussed in this letter.

In order to meet the tight adjudication deadline, the filings should be made within 30 days, preferably as soon as possible. Please give me a call at 208-334-2190 if you have any questions or need any help in completing any of these things.

Sincerely,

Steve Lester
Water Rights Supervisor

3. Narrative: Description (As operating at time of measurement. Indicate pressure, number of sprinklers, etc.)

This permit is the direct flow component related to the Eld Reservoir Irrigation water covered by 65-7516 & 12120. The maximum 130 AF on-stream storage occurs via a 14' high earth dam with rock riprap crest. Last irrigated in 1985, the land is now enrolled in the C.R.P. ~~Direct~~ Diversion from the full reservoir was the equivalent of a direct flow from Lat-finnell Creek and occurred through two diesel pumps, one on each side of reservoir. Six-inch mainlines were used. Pump #1 (west side) supplied 6 lines of 33 heads each, while pump #2 (east side) supplied 4 lines of 33 heads each. The 10 lines operated simultaneously. Rainbird and Nelson sprinklers were used. Pressure at the heads was 45 psi. Pumps were sold and are no longer on premises.

MEMORANDUM

TO: FILES

FROM: STEVE LESTER

DATE: AUGUST 11, 1989

RE: FIELD EXAM REPORTS FOR 65-07200, 65-07516, AND 65-12120

The Eld Ranch, Inc. acres covered by the above rights were last irrigated in 1985 via Eld Reservoir (D65-7200) and Laffinwell Creek. Field exams were conducted in October, 1987. Complications and delays in processing the reports were finally resolved, and the reports are forwarded for licensing.

Joe Eld recently called me to discuss a transfer for some portion of these rights. He requested that licensing be expedited for that reason. The main problem that occurs to me concerns the pump information. Joe could not produce any documentation for the pumps and could not identify the purchaser of the two pumps.

The rights provided direct flow and storage coverage for 227 acres. The following summary describes the acres and license recommendations.

Section	Tract	Acres: 65-07200	65-07516	65-12120	Total Ac.
19	SWSE	0	17	17	17
	SESE	30	40	40	40
20	NESW	30	20	0	30
	NWSW	39	22	2	39
	SWSW	36	36	36	36
	SESW	24	24	24	24
	NWSE	7	7	7	7
	SWSE	8	8	8	8
29	NENW	<u>26</u>	<u>26</u>	<u>26</u>	<u>26</u>
	TOTAL:	200	200	160	227

Note the exam fee paid for the rights (JJ memo of 8/15/86). A \$175 fee was paid for all three rights instead of the usual amounts for separate rights (\$175, \$100, and \$100 for 3.2cfs, 36 af, and 34 af). No objections to this were found during the report process.

The 130 ac-ft reservoir is not fully covered by valid rights. My letter of 2/1/88 in file 65-07200 addresses the discrepancy. Additional thoughts are offered here. 65-07516 allows 36 ac-ft for use from 5/1-10/1 and storage from 1/1-12/31. 65-12120 provides an additional 34 ac-ft for use from 5/1-10/1 but to be stored between 11/1-5/1. The combined 70 ac-ft can be stored during 11/1-5/1. However, only 36 ac-ft may be stored in the remainder 5/2-10/31.

747 1 7 1993

Memo of 8/11/89 to 65-07200, 65-07516, 65-12120

Page 2

Therefore, to provide complete water right protection to the 130 ac-ft Eld Reservoir, a new water right application should be filed for Irrigation Storage. The application should provide 60 ac-ft from 11/1-5/1 ($60+70=130$) and 94 ac-ft from 5/2-10/31 ($94+36=130$), for a total not to exceed 94 ac-ft. The issue of Irrigation from Storage may present problems. Can a new appropriation be approved for a use that did occur but will not continue to occur due to CRP factors? Filing an adjudication claim in the SRBA to cover the additional storage is not an option due to the priority dates of the storage rights.

However, Joe Eld never responded to my 2/1/88 letter other than to indicate little interest in a new right during a telephone conversation earlier this year. He may change his mind if the three rights are licensed and available for transfer but do not provide adequate water for a proposed transfer. It is probably best to let the matter rest and keep this information in the files for reference if needed.

Re: Permits 65-7200, 7516, 12120

Dear Joe:

After our telephone conversation on 1/28/88, I spoke with Dave Tuthill, Regional Manager for this area. In order to license the above permits for the land enrolled in the CRP, it appears that more information is required despite my optimism during the call. We need as much information as possible concerning the pumps used beside the reservoir. The minimum acceptable information is the pump horsepower. Also, please provide the name and address of the buyer of the pumps.

The maximum capacity of the reservoir is 130 acre-feet. From the ASCS photos one finds 227 acres covered by the three permits. The acres are shown in the attached list. With a full reservoir and crops being irrigated, the equivalent of pumping directly from the creek occurred. Permit 65-7200, a direct flow right, covers this. The other two permits provide 70 acre-feet of storage in the 130 ac.-ft. system. Just under half of the storage is not covered by any water right, and you need to file a new Application for Permit (attached forms) for 60 ac.-ft. for the 227 acres to avoid illegal water storage. Developing a new right for CRP acres should be allowed using the same logic that accommodates licensing these acres.

Using this logic, your application would be submitted and, if approved in the usual eight-week time frame, will cover the storage water right deficit. The application should refer to the existing storage permits (7516 and 12120) and note that development already occurred for land now in the CRP. When you receive the approved permit, you could contact the department and request the Proof of Beneficial Use form, which would then be submitted with the appropriate exam fee to facilitate licensing. This office could then complete the "field" exam from the data collected last fall. By this method you will obtain a license for the remainder of the reservoir very quickly.

MICROFILMED

1988 FEB 1

I urge you to act swiftly in this matter to protect your property and water rights. Also, please submit the requested pump information by 2/19/88 to avoid any water right penalties. We will provide whatever help you desire.

Sincerely,

Steve Lester
Water Resource Agent

Re: Permits 65-7200, 7516, 12120, 7610, 7361

Dear Joe:

After meeting with you in late October, gathering field data, and reviewing the above water right files, I realize that additional information is needed to facilitate licensing of the permits. We discussed the details that you could provide to complete the water use picture. This letter serves to refresh your memory in the matter.

The three permits covering storage and use of irrigation water at and around Eld Reservoir are 65-7200, 7516, and 12120. These rights involve the land enrolled in the CRP. I have information about the sprinkler pipes, number of lines and heads per line, pressure readings, and nozzle sizes. Additional data is desired for pump details and sprinkler models. Pump information includes horse-power, brands, serial numbers, pump curves, pump test records, or anything else describing pumping capacity. What sprinkler models were used (for example, Rainbird 30B, Nelson F33, etc.)? I need any of this data that is available to finish the licensing reports.

Permit 65-7610 is the Gold Fork River pumping plant. A partial exam was conducted on this system. Please consult your records to provide the horse-power of the large diesel engine. Sprinkler head measurements of water use will be made in the next irrigation season to complete the field work on this permit.

The last permit is 65-7361, diverting Boulder Creek to irrigate 120 acres in sections 1 and 12 as follows:

Section 1- NWSW 20 ac., SWSW 20 ac., SESW 40 ac.;
Section 12- NENE 40 ac..

The 120 acres may be irrigated as above or shifted to other tracts as long as the number of acres does not exceed the permit limit. You wondered if rights other than the Roseberry Irrigation District allocation covered the area shown above. No other rights are found on those portions of sections 1 and 12. There are two decreed Eld irrigation rights in the general vicinity. 65-2515 uses Boulder Creek to irrigate 67 acres in the NESE and SESE, sec. 2 and 77 acres in the NENE and SENE, sec. 13. 65-4033 uses the same source for 35 acres in SWNW and 10 acres in NWSW, all within sec. 12. A partial exam was conducted on

* Roseberry Irr. Dist.

65-2515	5.00 cfs

- 3115	12.07 AFA
- 3116	48.72 cfs

MICROFILMED

1988

permit 65-7361 and can be finished during the next irrigation season. Please remember that a measuring device should be installed in the Boulder Creek diversion ditch.

Concerning assignments of the permits, 65-7200 is the only one in your father's name (William Eld). The other four show "Eld Ranches, Inc.", except 65-12120 which lists "William Eld, President, Eld Ranches, Inc." as the owner. If you want to change any of these names, refer to the enclosed Assignment of Permit forms. Multiple permits may be included on one form. Also attached are the necessary forms to complete applications for transfers of water rights.

Please submit the requested information for the Eld Reservoir permits and the horse-power of the Gold Fork pump engine within 30 days to avoid jeopardizing your water rights in any way. This will allow the licensing process to continue. I'll be glad to help in any way possible.

Sincerely,

Steve Lester
Water Resource Agent

RE: PERMIT NOS. 65-07200, 65-07516 AND 65-12120

Dear Joe and Vicki:

This letter concerns water right coverage for Eld Reservoir and land irrigated from the reservoir under the above referenced water right permits. As you recall, I did the field exams for the permits in October of 1987. I sent you a letter in early 1988 requesting additional information and recommending that you file another water right to cover part of the reservoir not already protected by these rights.

You provided the additional data. Another water right was not secured to cover the rest of the storage referenced in my 1988 letter. Also, the Snake River Basin Adjudication (SRBA) adds another layer of complexity to the situation.

SRBA recommendations by this agency will be made to the court in the next few months for your area. This provides the opportunity to complete the licensing of the three permits plus protect the rights in the SRBA. The final outcome, after the permits are licensed, will be decreed rights from the SRBA court. Decreed rights offer the ultimate water right protection under Idaho law.

The following steps can be used to accomplish the task. Please see the enclosed information to assist you in these steps.

1. Each permit must be amended to reflect development that occurred that is somewhat different than as permitted. Permit amendments in the licensing process are \$50 each (total \$150).

2. A new permit application must be filed to cover 60 acre-feet of storage not covered by the existing rights. See the mostly completed application form for details. Securing a new right will protect the balance of water used by this system. This protection becomes more important every year with respect to competing issues such as "fish flushing water." It is unlikely that the department can license the three permits while some of the storage water lacks

MICROFILMED

JUN 18 1999

June 16, 1999
Page 2

a water right (illegal diversion re I.C. § 42-351). The application fee is \$100.

3. SRBA claims must be filed to cover the three permits. Otherwise, the odd circumstance could occur in which licenses are issued but the rights are subsequently lost because they are not protected in the adjudication.

You can file the claims in one of two ways. One, file claims to reflect the 1987 license recommendations (see attachment). That method lists specific acres per right, all within the combined 227 acre place of use. Two, file claims to describe a 227 acre permissible place of use (PPOU). This means that all the rights are attached to all the acres where each right is limited to its authorized cap within the total area. This technique provides greater flexibility in using the rights.

I recommend the second choice. If you do that, the license recommendations will be adjusted to match the claims. Also, the new right will list the same 227 acres. Either SRBA option includes a filing fee of \$377, which itemizes as \$50 per claim plus \$1 per acre (only pay acre fee once, no charge for overlapping acres). Attached are three claim forms to complete and a sample PPOU page to help you with the claims.

Completion of these three steps will provide the required water right protection for the Laffinwell Creek system. The total cost to file these documents is \$627 as follows:

1) permit amendments	\$150
2) application for permit	\$100
3) SRBA claims	\$377

Steps one and three do not require this office to publish legal notices, but step two will include such publication. The publication time table will not adversely affect the other water right and SRBA processes discussed in this letter.

In order to meet the tight adjudication deadline, the filings should be made within 30 days, preferably as soon as possible. Please give me a call at 208-334-2190 if you have any questions or need any help in completing any of these things.

Sincerely,

Steve Lester
Water Rights Supervisor

MEMORANDUM

TO: File 65-7200

FROM: Sharla

DATE: February 20, 1991

RE: Returned Field Exam

On this date, the field exam report for the above referenced file was returned to the region. According to the date proof of beneficial use was filed for this right, an adjudication claim is needed and has not yet been filed.

The region will solicit the claim and based upon response, either the field exam will be returned with the claim after being reviewed by the region for discrepancies, or the right will be disallowed in the Director's Report for failure of the holder to submit the claim.

EXAMINATION FEE REMINDER

*fee sheet
below -
sent in
error - kw*

Dear Permit Holder:

Earlier this year you were mailed a certified letter by our state office, which described a new law related to your water right permit. The water right permit to which this law applies is identified by the number at the top of the mailing label above. The purpose of this letter is to act as a reminder of the new law and to warn you that your permit is now losing priority daily.

As described in the certified letter, House Bill 671 enacted by the 1986 Idaho Legislature requires payment of a fee before this Department can conduct the field examination needed to issue a license confirming use of water under the permit. As an alternative to submitting the fee, the Department will accept a field examination report completed by a certified water right examiner from the private sector. The certified letter described the procedure for selecting the latter alternative, whereby you initially notify us regarding which water right examiner you have selected, and provide a statement from the examiner as verification.

The date of priority of your water right permit is now being delayed one day for each day the response is late. Also, if the fee or completed field examination report are not submitted within a year from the sixty-first day after the certified letter was mailed, the permit may be lapsed and rendered invalid. The fee, or notice that a private field examination will be conducted, should be submitted as soon as possible if you wish to maintain your permit in a valid status.

Enclosed please find an Examination Fee Information Sheet, with the License Examination Fee Schedule printed on the back. This sheet should be submitted if either the fee payment option or the private examination option is selected. If you have questions or desire assistance in this matter, please feel free to contact this office.

Sincerely,

David R. Tuthill, Jr.

SUBJECT FIELD EXAMINATION FEE for 65-12120, 65-7516 & 65-7200

I took one fee for three permits because two of the permits were for storage. I discussed this w/ Bob Flen^{or} and we concluded that if the storage had been included on the natural flow permit the dept. would have only charged for the rate of flow.

If you have any questions please let me know.

CERTIFIED MAIL

EXAMINATION FEE NOTICE

Dear Permit Holder:

Department records show that proof of beneficial use has been submitted for the above-referenced permit, but that a field examination has not yet been conducted to determine the extent of beneficial use of the water for licensing purposes.

House Bill 671 (effective April 4, 1986) enacted by the 1986 Idaho Legislature requires the payment of a fee before this department can conduct the field examination needed to issue a license confirming use of water under the permit. This letter is notification that the license examination fee is due within sixty (60) days of the date of this letter. The examination fee information sheet (enclosed) must be returned with the fee.

As an alternative to submitting the fee, the department will accept a field examination report completed by a certified water right examiner from the private sector. If you choose to have the examination done by a certified water right examiner, you need not submit the license examination fee to the department, but you must within sixty (60) days of the date of this letter return to the department, the examination fee information sheet showing appropriate information together with a statement from the certified examiner to verify that you have retained a certified examiner to conduct the field examination. If you choose this alternative, a completed field examination report must be submitted within one year of the date of this letter. You cannot later change your decision to use this alternative and submit the fee needed for the department to conduct the field examination, but you may change to another certified examiner.

Certified water right examiners are licensed engineers, geologists, or land surveyors certified by the department to conduct water right examinations. The procedure for certifying examiners results from the recently enacted HB 671 and is being developed at this time. A listing

MICROFILMED

JUL 15 1993

of certified water right examiners will be available from this department when examiners have been certified.

If your permitted use, in fact, has already been examined by the department and you have not asked to have the examination repeated, the fee requirement is not applicable to your permit. If you believe this is the case, please contact the department.

The license examination fee is to be based on the amount of water you indicate you have developed, as listed in item 6 on the examination fee information sheet. The amount of water on which the examination fee is based can be less than the permitted amount, if less water has been diverted and beneficially used. The licensed amount of water, however, will not exceed the amount you claim on the examination fee information sheet. The enclosed license examination fee schedule shows a listing of applicable fees.

FAILURE TO SUBMIT WITHIN THE SIXTY (60) DAY PERIOD, THE FEE OR THE STATEMENT THAT A CERTIFIED EXAMINER HAS BEEN RETAINED TO MAKE THE FIELD EXAMINATION, WILL BE CAUSE TO ADVANCE THE PRIORITY OF THE PERMIT ONE DAY FOR EACH DAY THAT THE FEE SUBMITTAL IS LATE.

FAILURE TO SUBMIT THE FEE OR THE COMPLETED FIELD EXAMINATION REPORT WITHIN A YEAR WILL BE CAUSE TO CONSIDER THE PROOF OF BENEFICIAL USE TO BE INCOMPLETE AND TO LAPSE THE PERMIT.

The attached examination fee information sheet and the fee may be submitted to the following department offices.

McCall, Idaho 83638

Dear Mr. Eld:

We acknowledge receipt of the affidavit submitted as proof of beneficial use on the above referenced permit. Enclosed is an Order of Reinstatement; please note that priority has been advanced to June 11, 1971.

Before a license can be issued, a field examination must be made by a representative of this Department. We cannot tell during which part of the irrigation season this exam will be made but our examiner will try to contact you at the time he makes the exam so that you may show him the system.

We note that in reviewing this proof affidavit, you indicate that you have not yet installed a measuring device as required by the conditions of approval of your permit. This measuring device must be installed by the time our examiner makes the exam or your water rights cannot be confirmed by the issuance of a license. We are enclosing a list of the types of measuring devices approved by this office. Please note that in lieu of installing the measuring device a measurement may be made by a certified professional engineer when the system is operating in a normal manner. This measurement should be submitted to us as soon as possible.

If you have any questions regarding the field exam or the measuring device, please contact our Regional Office in Boise.

Sincerely,

BOBBY D. FLEENOR

McCall, Idaho 83638

Dear Mr. Eld:

One of the conditions of approval of your water Permit No. 65-7200 (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before August 1, 1977. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. If you have been prevented from proceeding by a governmental agency or by litigation, more than one extension of time can be granted.

Either the beneficial use affidavit or a request for an extension of time must be received by this Department on or before the above mentioned date, otherwise the permit will lapse and be of no further force or effect.

Boise, ID 83705

RE: 865-7200

Dear Mr. Gray:

Thank you for your letter of March 12, 1975. The Department has reviewed the revised plans for Eld Dam and has the following comments.

1. There is no objection to the present proposal to construct the spillway -- including the one-foot high plug -- as designed. However, if posts are used to catch ice and debris in front of the four-foot flume, I suggest that they be located away from the entrance enough to prevent frequent obstruction of the flume. Also, what will be used to construct the flume? Please note that if erosion along the spillway becomes a problem, riprap on the side toward the dam may be required in the future.
2. The spillway rating curve should reflect reservoir level versus flow and the elevations need to be labeled on the vertical axis of the curve. The curve as shown indicates flow depth and needs to include velocity head and other losses to accurately indicate the reservoir level.
3. The gate stem for the outlet system needs to be provided with grease seals at the ends of the protective sleeve and an oil filling port near the crest. The sleeve should be filled with lubricant to facilitate operation. Also, no intermediate supports for the stem and sleeve and the vent pipe are provided and some would appear desirable.
4. The Type I core fill material does not appear to be a material highly resistant to piping. For this reason, it would seem desirable, to specify the more freely draining Type II material in the downstream zone of the dam rather than also allowing Type I or III material -- especially since no other provisions for drainage of the fill are provided.
5. The plans indicate that O. Hansen owns a small piece of property that the dam will be constructed on. Please note that any approval from this Department for the dam or water right does not constitute an easement or right to encroach on this property.

MICROFILMED

Mr. Elwood H. Gray, P.E.

re: Application for Permit #65-7200

Dear Sir:

I would like to file a protest to the proceedings of the meeting held in Donnelly, Idaho on April 14, 1972. In regard to the protest filed by Laurel Hansen June 16, 1971, he made no statement as to having any prior usage right except for stock water.

After making an inspection of the field with a witness it was determined that the ditches were made last summer. I also have witnesses who rode over the ground after cattle in the summer of 1970, who say there were no ditches on the place at that time.

If Mr. Hansen would have been using the water before June 16, 1971 I am sure he would have mentioned it in his letter of protest.

Thank you for any consideration given.

Sincerely,

William Eld

65 7200

We, the undersigned, hereby agree to the following conditions in connection with Application for Permit No. 65-7200:

- 1) That the applicant will install measuring devices on Laffinwell Creek above and below the reservoirs, and also at Mr. Hansen's point of diversion.
- 2) That 10 inches of water or the incoming flow to the reservoirs, which ever is the lesser, will be released from the reservoirs with the point of measurement at Mr. Hansen's ditch located within the SE 1/4 NE 1/4 of Sec. 30, Twp. 16N, Rge. 4E, B.M.
- 3) The amount of water released is for the purpose of this agreement only and is subject to final determination of the Court in the Payette River Adjudication.

BEFORE THE DEPARTMENT OF WATER ADMINISTRATION
OF THE
STATE OF IDAHO

IN THE MATTER Of Protest Against Approval)
of Application for Permit No. 65-7200 in the)
name of WILLIAM ELD)

NOTICE OF CONFERENCE
AND/OR HEARING

On May 19, 1971, Mr. William Eld of McCall, Idaho, filed with the Department of Water Administration an application to appropriate the public waters of the State of Idaho. On June 17, 1971, the Department received a protest against the approval of this application from Mr. Laurel Hansen of Donnelly, Idaho.

The Department has set the matter of protest for conference and/or hearing on Friday, April 14, 1972, at 1:30 p.m., in the Conference Room of the Soil Conservation Service office at Donnelly, Idaho. Any hearing will be held in accordance with the Rules and Regulations of the Idaho Code and adopted Rules of Practice and Procedure of the Department of Water Administration. Opportunity shall be afforded all parties to respond and present evidence and argument on all issues involved.

Any party may request in writing five (5) days before any hearing that the oral proceedings thereof be taken in the form of stenographic notes. Any party may have such stenographic notes of the oral proceedings, or part thereof, transcribed at his own expense. A taped record of the proceedings will be maintained for the appeal period.

Failure to appear at the time and place set for hearing by the applicant or protestant may allow the Department without prejudice to dismiss the protest or the application. Any and all cost incurred by reason of such non-appearance may be assessed against such non-appearing parties.

Dated this 31st day of March, 1972.

Dear Ms. Jensen:

This is to confirm the use of the conference room for conference and/or hearing to be held by this office on Friday, April 14, 1972, at 1:30 p.m.

Thank you for your cooperation in this matter.

Very truly yours,

Darlene Reich, Secretary to
BOBBY D. FLEENOR
Assistant Director

Re: Application for Permit No. 65-7200

Mr. William Eld
Route 1 - Box 63
McCall, Idaho 83638

Dear Mr. Eld:

We have enclosed a copy of the protest filed against the issuance of a permit pursuant to your Application No. 65-7200. You should be aware that the following are the items we can consider at a conference and/or hearing in either approving or denying an application for permit (Section 42-203, Idaho Code):

1. Will the proposed use reduce the quantity of water under existing water rights?
2. Is the proposed water supply insufficient for the purposes intended?
3. Is the application made in good faith or for delay or speculative purposes?
4. Has the applicant sufficient financial resources with which to complete the project?

The Department cannot allow a permit for irrigation purposes which would entail the use of more than a continuous flow of 0.02 cubic feet per second of water for each acre of land, or an annual amount of 5 acre feet of water for each acre of land, unless the applicant can show that more is required due to soil or climate conditions. (Section 42-202, Idaho Code)

The waters intended to be appropriated must be public water of the State of Idaho. If private waters, as defined under Section 42-212, Idaho Code, the applicant must have authority to divert the water from the owner of the land on which the water lies.

Mr. William Eld

Re: 65-7200

June 21, 1971

A permit issued by this office is subject to all prior water rights and does not in any way convey or establish right-of-ways over private or governmental lands. Right-of-ways or easements must be obtained by the applicant through action outside of the water right proceedings.

You will be notified at a later date as to the time and place set for a hearing and/or conference to discuss the matters of protest. Legal counsel is not mandatory at any proceeding before the Department, although you may desire to employ an attorney in your behalf.

If we may be of any assistance, please contact us.

Very truly yours,

BOBBY D. FLEENOR
Assistant Director

Re: Application No. 65-7200 - William Eld

Laurel Hansen
Donnelly,
Idaho 83615

Dear Ms. Hansen:

We are in receipt of your protest to issuance of a permit pursuant to the above referenced application. The following are the items we can consider at a conference and/or hearing in either approving or denying an application for permit (Section 42-203, Idaho Code):

1. Will the proposed use reduce the quantity of water under existing water rights?
2. Is the proposed water supply insufficient for the purposes intended?
3. Is the application made in good faith or for delay or speculative purposes?
4. Has the applicant sufficient financial resources with which to complete the project?

The Department may reject an application and refuse issuance of a permit, partially approve the permit, approve the permit for a quantity of water less than applied for, or approve the permit subject to special conditions.

A permit issued by this office is subject to all prior water rights and does not in any way convey or establish right-of-ways over private or governmental lands. Right-of-ways or easements must be obtained by the individuals concerned through action outside of the water right proceedings.

You will be notified at a later date as to the time and place set for a conference and/or hearing to discuss the matters of protest. If we may be of any assistance, please contact us.

Very truly yours,

Bobby D. Fleener
Assistant Director

65-7201 - Donald J. &/or Edna R. Davis

Star News
Box 985
McCall, Idaho 83638

Gentlemen:

Enclosed you will find a legal notice which we wish to have published once a week for two consecutive weekly issues of your newspaper. We have inserted the publication dates allowing ample time for you to submit us a galley proof for review before publication.

After sending us a galley proof, proceed with the publication on the dates we have inserted assuming the notice is correct. If we have any corrections, we will notify you before the first publication date. If you cannot publish the notice on the proposed dates, please contact us immediately.

An affidavit of publication must be submitted to the Department along with the publication bill. In order to receive payment, the following certification must appear on the bill:

"I hereby certify that the foregoing account is just and correct, that the amount claimed is legally due, after allowing all just credits, and that no part of the same has been paid."

(signature of claimant)

Very truly yours,

Donald W. McEldowney
Appropriation Supervisor

NOTICE OF APPLICATION FOR WATER PERMIT

Notice is hereby given that William Eld, Route #1, Box 63,

McCall, Idaho

has on May 19, 1971 submitted Application No. 65-7200

for a permit to appropriate 3.2 cubic feet per second ~~2000 feet per second~~

of water from Laffinwell Creek

by means of two dams

within the NE1/4 of Sec. 29, T16N, R. 4E, B.M. in

Valley County

to be used from May 1 to Oct. 1

for the irrigation of 200 acres

within the SW1/4 of Sec. 20, NE1/4 of Sec. 29, T. 16N, R. 4E, B.M.

If issued, this permit will be subject to all prior water rights. Protests against the granting of the permit must be filed with the Idaho Department of Water Administration, Statehouse, Boise, Idaho, 83707, on or before June 21, 1971.
