him from devoting his full time when not at sea and when he was at McCall; that because of attempting to complete sea duty he did not have available financial resources to finish the work and was unable to arrange for finances but such have now been arranged for and he is financially able to complete the project over a period of time.

There have been some hydrological problems which now have been overcome.

Further factors which have caused delay have been a high water table which only goes down late in the summer; a limited flow of water which has occasioned considerable lapse of time in solving the hydrological problems and in testing for loss of water and testing complete and thorough compaction of the dam.

Request is being made to eliminate the measuring device which was a condition of approval of the permit in the original instance. It was first anticipated that the pond would be larger than it is, but such did not result. The little run-off creek runs into the upper end of the pond, at the lower end of which is the dam and then simply runs on down the drainage. The pond is measured at .94 acres and would contain only 5.6 acre feet as determined by engineer Bill Harris at McCall. The characteristics are, thus, very limited, and the water would be used for recreation, stock and domestic uses from June 1 to September 1. The State of Idaho stocks the pond with fish so that the children in the area have a place to fish and the pond is shallow enough that it is not a hazard. The rodeo people, in connection with the rodeo conducted by the Village of McCall in the summertime, water their stock from the pond for a period of approximately ten (10) days. I utilize water from the pond by way of a small pump and hoses to water our domestic garden in which we raise vegetables and produce for our own consumption.

Dear Mr. Martin:

In response to your telephone inquiries of March 21, 1972, we are enclosing a beneficial use affidavit and an application for amendment to be used in connection in the final proof of beneficial use under the above referenced permit.

As you will recall, one of the conditions of approval of this permit was that the applicant permanently install a measuring device of a type approved by the Department as part of the diverting works. From the information supplied during our telephone conversation, we would assume that a pond of only 5.6 acre feet would not normally require a measuring device. If your client should decide to have that condition removed, he should request this in writing and explain the limited characteristics of this appropriation and most probably, we could consider removing the requirement.

Since the permit holder has not developed irrigation to any extent and instead has a more limited type of irrigation as found under domestic use, we would recommend that an amendment be filed, changing the nature of use. We are enclosing a partially prepared application for amendment.

If you have any questions in this matter, please contact us.

Very truly yours,

Donald W. McEldowney
Appropriation Supervisor

Re: Permit No. 65-7007

Mr. Albert Lambert
McCall,
Idaho 83638

Dear Mr. Lambert:

One of the conditions of the approval of your permit no. 65-7007 was that proof of application of the water to beneficial use be submitted to this office on or before September 1, 1970.

Enclosed is an affidavit form which must be used to submit this proof. You may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code Amended.

Either the proof or a request for extension of time must be received by this department on or before the above mentioned date, otherwise the permit will lapse and be of no further force or effect.
