MEMORANDUM

TO: FILE NO. 65-02872

FROM: PAM SKAGGS/STATE OFFICE

SUBJECT: TRANSFER NO. 4279

DATE: May 31, 1994

=====

Transfer No. 4279 was filed to record a change in the point of diversion under Right No. 65-02872 which occurred in 1980.

The original point of diversion under this decreed right was from an unnamed stream tributary to the North Fork Payette River. The changed point of diversion is directly from the North Fork Payette River 700 feet upstream from the mouth of the unnamed stream. Diversion from this source will be limited to the availability of water at the original point of diversion.

The applicant was asked to provide additional information which resulted in modification of the transfer application to show irrigation use only. Since the transfer application also changes water uses in addition to recording a change in point of diversion location, proof of ownership was requested from the Valley County Assessor's office. Confirmation that Robert Zach is the contracted owner of record was received and placed in the file.

Recommended conditions include limiting diversion from North Fork Payette River flow to flow available in the unnamed stream, watermaster control, irrigation overlap and standard transfer conditions.

Conditions of Approval:

- R04 - Use of water under this water right will be regulated by the watermaster of State Water District No. 65.
- R29 - This right when combined with all other rights shall provide no more than .02 cfs per acre nor more than 3.0 afa per acre for the lands above.
- T07 - The change authorized by this transfer shall be accomplished within one (1) year of the date of this approval.
- T08 - Failure to comply with the conditions of this transfer is cause for the director to issue an order to show cause why the approval of the transfer should not be rescinded.
- T09 - Approval of this transfer does not preclude the opportunity for review of the validity of the water right(s) in the ongoing Snake River Basin Adjudication.

Remarks: Use of water under this right is limited to the rate of flow available at the original point of diversion located in S10, T11N, R03E from an unnamed stream tributary to the Payette River, North Fork.

RE: Water Right No. ~~65-02072~~

The original diversion was supplied by a 2" PVC pipe of approximately 1500' in length. The pick-up point, and supply line of 2" PVC, reduces to 1" galvanized pipe where it connects to the building. There is an elevation differential of approximately 125'. This provided about 55# of water pressure. *Static pressure*

The present diversion system extracts water from the North Fork of the Payette River using a .75 horsepower pump. With this pump we run an irrigation set of 6 Rainbird sprinklers using 5/8" garden hoses. I believe the nozzle size is 3/16" on each sprinkler.

55 x 2.31 = 127'

We no longer use the domestic or commercial rights.

Sincerely;

Robert E. Zach

RE: Application for Transfer

Dear Mr. Zach:

Our office has reviewed your application for transfer to change the point of diversion under water right No. 65-02872. Some additional information regarding your past and present delivery system is necessary for us to complete our evaluation of this change.

Please provide the following minimum information about the original diversion system beginning in SWNW Section 10 T11N R03E, from an unnamed stream:

- Pipeline dimensions. Include inside diameter of intake pipe, total length of pipeline, any incremental reductions in pipeline size, and the lengths and inside diameters of those sections.
- Pipe material.
- Total difference in elevation between intake (point of diversion) and lowest outlet point (place of use).
- Estimated operating or closed-in (static) pressure at lower end of pipeline (please specify which).

Also provide the following minimum information about the present diversion system situated in Lot 3 (SEnw) Section 10, from the North Fork Payette River:

- Pump horsepower rating and discharge size.
- Nozzle size and total number of sprinkler heads which are typically run on a single irrigation set.
- Information relative to any non-irrigation uses from this system. The information we have indicates that this right is currently used only for irrigation. If the commercial and/or domestic uses are still occurring under the right, some evidence of use is necessary. This evidence may include, but is not limited to, sizes of pipelines from the river pump to buildings or outside faucets, diagrams showing pipeline locations, photos, etc. Include a brief description of other uses.

Please feel free to call with any questions you may have regarding the submittal of this information. Your application for transfer will be advertised on our next schedule, likely February 2 and February 9 in one of the Valley County newspapers. However, the application may not be forwarded for final approval without the requested information.

Sincerely,

Cindy Hodges
