Method for determining flowrate.

Note: A flowrate was first determined by timing the filling of the pressure tank. The owner said he has noticed lately he had a hard time keeping pressure. The flowrate by timing the filling of the pressure tank was so small, there was something wrong. We found a broken mainline between the well and barn. The break had to be repaired, so when the pipe was spliced, a measurement was taken off of the mainline, by means shown in the photo.

H. REMARKS AND OVERLAP REVIEW ANALYSIS

An attempt was made at measuring the flow by means of the pressure tank in the barn. The measurement was poor because the pressure tank never filled. The owner said he had problems lately with keeping pressure. We walked down to the well and found a ruptured mainline from the well to the barn. He asked if I could wait for him to fix the break. So he dug it out and we measured it at the break by means shown.

Gentlemen:

Re: Permit No. 43-7180

Returned is your check No. 2665 (92-146/1241) in the amount of \$50.

On July 22, 1986, the regional office received a request to withdraw the proof of beneficial use form. The request was forwarded to the state office and, in error, on August 12, 1986, the regional office sent a certified notice advising of the fee requirement necessary on water right permits on which proof had been submitted. Either a fee or a statement indicating a certified water right examiner had been retained was necessary to fulfill the requirement. Then on August 20, 1986, the department acknowledged withdrawal of the proof of beneficial.

The status of the permit now is that proof has been withdrawn. Sixty days prior to August 1, 1987, the department will send you a certified notice that proof is due and request a completed proof of beneficial use form and fee or completed field exam. Another option at that time would be to submit a request for extension of time if needed and under certain circumstances.

If you have any questions concerning this matter, please feel free to contact this office.

Sincerely,

RITA I. FLECK

Pursuant to your request, the department allows you to withdrawal the proof of beneficial use. The proof has been voided and our records changed. Since your proof of beneficial use form has been withdrawn, the department will contact the regional office to cancel the pending field inspection.

Sixty days prior to when proof is due which is August 1, 1987, the department will contact you to submit proof of beneficial use or an extension of time.

If you have any questions concerning this matter, please feel free to contact this office.

Sincerely,

RITA I. FLECK

EXAMINATION FEE NOTICE

Dear Permit Holder:

Department records show that proof of beneficial use has been submitted for the above-referenced permit, but that a field examination has not yet been conducted to determine the extent of beneficial use of the water for licensing purposes.

House Bill 671 (effective April 4, 1986) enacted by the 1986 Idaho Legislature requires the payment of a fee before this department can conduct the field examination needed to issue a license confirming use of water under the permit. This letter is notification that the license examination fee is due within sixty (60) days of the date of this letter. The examination fee information sheet (enclosed) must be returned with the fee.

As an alternative to submitting the fee, the department will accept a field examination report completed by a certified water right examiner from the private sector. If you choose to have the examination done by a certified water right examiner, you need not submit the license examination fee to the department, but you must within sixty (60) days of the date of this letter return to the department, the examination fee information sheet showing appropriate information together with a statement from the certified examiner to verify that you have retained a certified examiner to conduct the field examination. If you choose this alternative, a completed field examination report must be submitted within one year of the date of this letter. You cannot later change your decision to use this alternative and submit the fee needed for the department to conduct the field examination, but you may change to another certified examiner.

Certified water right examiners are licensed engineers or geologists certified by the department to conduct water right examinations. The procedure for certifying examiners results from the recently enacted HB 671 and is being developed at this time. A listing of certified water

right examiners will be available from this department when examiners have been certified.

If your permitted use, in fact, has already been examined by the department and you have not asked to have the examination repeated, the fee requirement is not applicable to your permit. If you believe this is the case, please contact the department.

The license examination fee is to be based on the amount of water you indicate you have developed, as listed in item 6 on the examination fee information sheet. The amount of water on which the examination fee is based can be less than the permitted amount, if less water has been diverted and beneficially used. The licensed amount of water, however, will not exceed the amount you claim on the examination fee information sheet. The enclosed license examination fee schedule shows a listing of applicable fees.

FAILURE TO SUBMIT WITHIN THE SIXTY (60) DAY PERIOD, THE FEE OR THE STATEMENT THAT A CERTIFIED EXAMINER HAS BEEN RETAINED TO MAKE THE FIELD EXAMINATION, WILL BE CAUSE TO ADVANCE THE PRIORITY OF THE PERMIT ONE DAY FOR EACH DAY THAT THE FEE SUBMITTAL IS LATE.

FAILURE TO SUBMIT THE FEE OR THE COMPLETED FIELD EXAMINATION REPORT WITHIN A YEAR WILL BE CAUSE TO CONSIDER THE PROOF OF BENEFICIAL USE TO BE INCOMPLETE AND TO LAPSE THE PERMIT.

The attached examination fee information sheet and the fee may be submitted to the following department office.
