CONDITIONS/REMARKS:

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount that can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. This right is for the use of trust water and is subject to review 20 years after the issuance of the permit to determine availability of water and to re-evaluate the public interest.

BEFORE THE DEPARTMENT OF WATER RESOURCES

OF THE

STATE OF IDAHO

IN THE MATTER OF PERMIT

NO. 43-7091 IN THE NAME

OF F. STANLEY &/OR JEANETTE LLOYD

CONTINUATION ORDER

This matter having come before the Idaho Department of Water Resources (IDWR) as a requirement of Section 42-203D, Idaho Code, the department Finds, Concludes and Orders as follows:

FINDINGS OF FACT

1. Permit No. 43-7091 (permit) issued to Stanley and/or Jeanette Lloyd (permit holder) authorized the diversion of 1.53 cfs of water from a groundwater source for the irrigation of 123 acres of land.

2. Section 42-203D, Idaho Code, directs IDWR to review all permits issued prior to July 1, 1985, which propose to divert water held in trust by the state of Idaho pursuant to subsection (5) of section 42-203D, Idaho Code, to determine whether they comply with the provisions of Section 42-203C, Idaho Code. The review is not required for permits to the extent beneficial use was complete prior to July 1, 1985.

3. Information submitted by the permit holder shows that 123 acres authorized to be irrigated by Permit No. 43-7091 were not irrigated as proposed prior to July 1, 1985.

4. Water diverted and used on or after July 1, 1985 for the irrigation of land under the terms of this permit is trust water.

MICROFILMED

10/11 12 1989

5. The permit was readvertised in accordance with Water Appropriation Rule 4,2,3,1. and was not protested.

6. Proposed development of water under the permit satisfies the presumption of Water Appropriation Rule 5,2,1. that it will not cause either an individual or cumulative significant reduction.

CONCLUSIONS OF LAW

1. The permit will appropriate trust water.

2. IDWR has reviewed the permit under Section 42-203D, Idaho Code and has determined that the permit complies with Section 42-203C, Idaho Code since the diversion and use of water under the permit will not individually or cumulatively cause a significant reduction.

3. The Director should enter an order reauthorizing development in compliance with the provisions of Section 42-203D, Idaho Code.

ORDER

IT IS, THEREFORE, hereby ORDERED that development under Permit No. 43-7091 is reauthorized and CONTINUED as provided in Section 42-203D, Idaho Code, subject to the following additional conditions and limitations:

1. Proof of construction of works and application of water to beneficial use shall be submitted to IDWR on or before August 1, 1990.

2. Any license issued by IDWR pursuant to the permit or portion thereof for the use of trust water is subject to a term review 20 years after the date of this continuation order to determine availability of water for the use and to re-evaluate the public interest at the end of the term.

3. The construction of diversion works must be commenced within one (1) year of the date of this order and shall proceed diligently and uninterruptedly to completion unless temporarily interrupted by circumstances over which the permit holder has no control.

MAY 12 1990

4. Diversion and use of water under this permit is subject to an annual use fee if rules are subsequently promulgated which provide for the submittal of the fee.

5. The Director retains jurisdiction of the permit and/or subsequent license issued to change, add or remove any requirement as determined to be appropriate.

RE: Adjustment(s) Made

=====

The final licensing recommendations for the above referenced water right are based on the information below:

E. NARRATIVE/REMARKS/COMMENTS

Even though the 40 hp pump usually runs at 20 hp it still has the capacity to run at 40 hp; therefore, the theoretical "Q" is based on the total available capacity.

The two Statutory Claims were not included in the overlap review. The R-records for 43-04072 and 43-4073 are still ADJ's "working files" and have not yet been verified.

F. FLOW CALCULATIONS

Adjusted based on 40 hp.

THEORETICAL RATE OF FLOW: $Q = \frac{(8.8) \times (H.P.) \times (EFF.)}{TDH}$

Q = CFS
H.P. = Total Brake Horsepower of pumping plant (including booster)
EFF. = Pumping plant efficiency (ASSUME 70% OR 0.70)
TDH = total dynamic head = [(LIFT) + (PSI X 2.31)]
LIFT = depth to water in FEET from land surface to pumping water level
PSI = pumping pressure measured in psi near pump (if open discharge assume zero [0])

$$Q = \frac{(8.8) \left(\frac{20}{40} \right) (0.70)}{\left[\left(\frac{118}{200} \right) + \left(\frac{0}{40} \times 2.31 \right) \right]} = \frac{MAX}{1.0} \quad \frac{MIN}{0.62}$$

PROOF DUE NOTICE

RE: PERMIT NO. 43-07091

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before August 1, 1990. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

Dear Mr. and Mrs. Lloyd:

Enclosed is an order that authorizes you to continue development under permit to appropriate water no. 43-7091. Please note in condition #1., page two of the order that you must develop your system and beneficially use the water prior to August 1, 1990. Failure to beneficially use the water before August 1, 1990 could result in a loss of your water right permit.

Please note the conditions of approval contained in your permit and the continuation order. You must comply with the conditions to fully complete beneficial use.

Sincerely,

RE: PERMIT NO. _____

Dear PERMIT HOLDER:

Due to the Swan Falls litigation, development proposed by the enclosed permit may have been delayed. The Department is presently reviewing the permit and may authorize completion of development proposed under the permit.

The purpose of this letter is to determine: (1) the extent of development under the permit, and (2) your continued interest in developing or completing development under the permit.

Enclosed are two forms which will help the Department expedite the reprocessing of the permit.

Please complete and return the enclosed questionnaire if you wish to continue with your plans of development or have completed all or a portion of your development before July 1, 1985.

Please complete the enclosed relinquishment form and return it to the Department if you have abandoned or have no interest in continuing with your plans for development of the project.

If the entire project was not completed prior to July 1, 1985, and you still wish to proceed with your plans of development, then you must submit a \$20.00 re-advertisement fee to the Department as required by Water Appropriation Rule 4,2,3. and Section 42-221F, Idaho Code.

Failure to return the questionnaire and pay any required re-advertisement fee within thirty (30) days of the date of this letter is cause for the Department to cancel the permit.

If the incomplete portion of your project is for irrigation of more than 200 acres, the Department will issue a notice requesting additional information as required by Water Appropriation Rule 4.5. (copy enclosed).

RE: PERMIT NO. 43-7091 - REQUEST FOR EXTENSION OF TIME

Dear Mr. and Mrs. Lloyd:

The department has reviewed the request for extension of time submitted in connection with the above referenced permit. Since the permit is within the Swan Falls trust water area and has been named in Ada County Civil Case No. 81375 and not dismissed, the department will hold the request without action until the permit is reprocessed in compliance with the provisions of section 42-203D, Idaho Code.

The issuance of an order on March 25, 1988 by the Federal Energy Regulatory Commission (order effective May 24, 1988) made the Swan Falls Agreement effective. As a result of the order, the department is determining which permits can be reprocessed in a given year up to the 20,000 acres per year limitation.

When additional development under the permit can be authorized, the department will consider the request for extension of time and will advise you accordingly of our action.

Sincerely,

L. GLEN SAXTON

PROOF DUE NOTICE

RE: Permit No. 43-7091

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before August 1, 1988. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a completed field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this Department on or before the above described proof due date, or the permit will no longer be of any force nor effect.

Re: Permit No. 43-7091

Dear Mr. Lloyd:

The Department letter to you dated September 1, 1985 was intended to provide you with some information only. The letter did not require you to do anything.

The information we wanted to convey to you is as follows:

1. On July 1, 1985, an amended statute identified as 42-203D became effective. It essentially says that permits for which development was not complete by July 1, 1985 will be reviewed by the Department.
2. If by chance, a project was completed by July 1, 1985, the permit holder should submit the proof of beneficial use, even though it might not be done yet under the terms of the permit, in order that the Department would know that the permit is not subject to the review requirements of Sec. 42-203D, Idaho Code.

In your particular case, proof of beneficial use is not due until August 1, 1988, and, based on your letter, your project is not complete. Therefore, it is not appropriate for you to submit the proof of beneficial use.

Chapter 2, Title 42, Idaho Code, encompasses the laws under which appropriations of water may be made. Other sections of amended 42-203, Idaho Code include provisions directly related to the

Falls settlement negotiations. The provisions are complex and until rules and regulations are developed, it is not possible to know how existing permits will be measured against the criteria. Rules and regulations are presently being drafted.

Your permit is valid and I know of no reason not to complete your development.

If you have additional questions, please feel free to contact me.

DEAR PERMIT HOLDER:

ACCORDING TO OUR RECORDS, YOU ARE THE HOLDER OF A WATER PERMIT ON WHICH PROOF OF BENEFICIAL USE OF WATER WAS NOT SUBMITTED BEFORE JULY 1, 1985, WHICH INDICATES YOUR PROJECT IS NOT COMPLETE. THEREFORE, YOU NEED TO BE AWARE OF CHANGES IN IDAHO LAW, EFFECTIVE JULY 1, 1985, WHICH IMPACT ALL WATER PERMITS ISSUED BY THIS DEPARTMENT.

SPECIFICALLY, PURSUANT TO SECTION 42-203D, IDAHO CODE, THE DEPARTMENT MUST REVIEW ALL PERMITS FOR WHICH DEVELOPMENT OF WATER USE WAS NO COMPLETED ON OR BEFORE JULY 1, 1985, TO DETERMINE IF THEY MEET THE NEW REQUIREMENTS OF CHAPTER 2, TITLE 42, IDAHO CODE. RULES AND REGULATIONS GOVERNING THE RE-EVALUATION OF PERMITS ARE NOT YET FINALIZED. HOWEVER, IF YOU COMPLETED THE DEVELOPMENT UNDER YOUR PERMIT BEFORE JULY 1, 1985, YOU SHOULD SUBMIT A PROOF OF BENEFICIAL USE STATEMENT, STATING THAT THE PROJECT WAS COMPLETED BEFORE JULY 1, 1985 SO THAT YOUR PERMIT WILL NOT BE SUBJECT TO THE REVIEW REQUIREMENTS OF SECTION 42-203D, WHICH READS AS FOLLOWS:

42-203D. REVIEW OF PERMITS - OPPORTUNITY FOR HEARING. - (1)THE DEPARTMENT SHALL REVIEW ALL PERMITS ISSUED PRIOR TO THE EFFECTIVE DATE [JULY 1, 1985] OF THIS SECTION, EXCEPT TO THE EXTENT A PERMIT HAS BEEN PUT TO BENEFICIAL USE PRIOR TO JULY 1, 1985, TO DETERMINE WHETHER THEY COMPLY WITH THE PROVISIONS OF CHAPTER 2, TITLE 42, IDAHO CODE. IF THE DEPARTMENT FINDS THAT THE PROPOSED USE DOES NOT SATISFY THE CRITERIA OF CHAPTER 2, TITLE 42, IDAHO CODE, THEN THE DEPARTMENT SHALL EITHER CANCEL THE PERMIT OR IMPOSE THE CONDITIONS REQUIRED TO BRING THE PERMIT INTO COMPLIANCE WITH CHAPTER 2, TITLE 42, IDAHO CODE. IF THE DEPARTMENT FINDS THAT THE PERMIT SATISFIES THE CRITERIA ESTABLISHED IN CHAPTER 2, TITLE 42, IDAHO CODE, THEN THE DEPARTMENT SHALL ENTER AN ORDER CONTINUING THE PERMIT. (2)THE DEPARTMENT SHALL PROVIDE AN OPPORTUNITY FOR HEARING IN ACCORDANCE WITH SECTION 42-1701A, IDAHO CODE, AND SECTIONS 67-5209 THROUGH 67-5215, IDAHO CODE, FOR EACH HOLDER OF A PERMIT THAT IS PROPOSED EITHER TO BE CANCELLED OR MADE SUBJECT TO NEW CONDITIONS.

YOU MAY OBTAIN PROOF OF BENEFICIAL USE FORMS FROM THE DEPARTMENT. IF YOU HAVE ANY QUESTIONS, PLEASE LET US KNOW.

Dear Mr. and Mrs. Lloyd:

Your approved copy of Application for Permit is enclosed and we direct your attention to the conditions of approval on the fourth page.

Please note that a special condition requiring you to install and maintain a measuring device at your point of diversion has been placed upon your permit. Enclosed is a letter describing the different types of measuring devices accepted by this Department.

The exercise of this permit may also be affected by the court's determination of water rights in the case of Idaho Power Company v. State of Idaho, et al., Civil No. 62237, currently pending before the District Court of Ada County.

Idaho Power officials tell us that because of Case No. U-1006-124 filed before the Idaho Public Utilities Commission, Idaho Power Company is asking the District Court of Ada County to determine whether the Power Company's water rights on the Snake River are protected against subsequent upstream appropriations in the waters of the Snake River and surface and subterranean tributaries between Milner Dam and Hells Canyon.

Since the use of water under your permit may affect the flows in this reach of the Snake River, the final decision in Idaho Power Company v. State of Idaho, et al. (Ada County Civil No. 62237) may determine to what extent the exercise of your permit may be subject to the water rights of Idaho Power. While the Ada County court is examining this question, Idaho Power Company has not filed a specific protest to your permit. However, the Department of Water Resources has been advised that the Power Company is not waiving any of its rights to contest or limit the exercise of your permit or a subsequent license or water right. If you have any questions, please let us know.

Dear Mr. and Mrs. Lloyd:

The Department has received approximately 18 applications for the appropriation of groundwater in the Elba sub-basin. An estimated depletion of the aquifer based on those applications is approximately 4800 acre feet per year. The average annual underflow available in the Elba sub-basin, however, has been estimated at approximately 1400 acre feet per year.

Since we have received applications in excess of water available, it would be most helpful to the Department in the analysis of this matter, if you would provide some additional information. This office has been advised by our Southern Regional office that some wells have been drilled without too much success.

Attached is a sheet with five questions. Please complete the sheet and return to this office by July 21st, 1978.

Your accurate response to these questions will be appreciated by the Department.
