ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Application for Permit to appropriate the public waters of the State of Idaho No. 43-7072, and said application is hereby APPROVED.

1. Approval of said application is subject to the following limitations and conditions:

   a. SUBJECT TO ALL PRIOR WATER RIGHTS.

   b. Proof of construction of works and application of water to beneficial use shall be submitted on or before May 1, 19 84.

   c. The rate of diversion, if water is to be used for irrigation under this permit, when combined with all other water rights for the same land shall not exceed 0.02 cubic feet per second for each acre of land.

   d. Other: (1) An access port or other device as specified by the Department shall be installed by the permit holder to provide for the installation of measuring equipment and the determination of the rate of diversion by the Department. (2) The issuance of this permit in no way grants any right-of-way or easement across the land of another.

RE: License No. 43-7072 - Issuance of License

Dear Water Right Holder(s):

The Department of Water Resources has issued the enclosed Water Right License confirming that a water right has been established in accordance with your permit. Please be sure to thoroughly review the conditions of approval and remarks listed on your license.

The license is a PRELIMINARY ORDER issued by the Department pursuant to section 67-5243, Idaho Code. It can and will become a final order without further action by the Department unless a party petitions for reconsideration or files an exception and/or brief within fourteen (14) days of the service date as described in the enclosed information sheet.

Also enclosed is a copy of your approved Application for Amendment.

Please note that water right owners are required to report any change of water right ownership and/or mailing address to the Department within 120 days of the change. Failure to report these changes could result in a $100 late filing fee. Contact any office of the Department or visit the Department's homepage on the Internet to obtain the proper forms and instructions.

If you have any questions, please contact me at 208-327-7946.

Sincerely,

Shelley W. Keen
Water Rights Supervisor

EXPLANATORY INFORMATION TO ACCOMPANY A PRELIMINARY ORDER

The accompanying order or approved document is a **"Preliminary Order"** issued by the department pursuant to section 67-5243, Idaho Code. It can and will become a final order without further action of the Department of Water Resources (department) unless a party petitions for reconsideration, files an exception and brief, or requests a hearing as further described below:

PETITION FOR RECONSIDERATION

Any party may file a petition for reconsideration of a preliminary order with the department within fourteen (14) days of the service date of this order. The department will act on a petition for reconsideration within twenty-one (21) days of its receipt, or the petition will be considered denied by operation of law. See Section 67-5243(3) Idaho Code.

EXCEPTIONS AND BRIEFS

Within fourteen (14) days after (a) the service date of a preliminary order, (b) the service date of a denial of a petition for reconsideration from this preliminary order, or (c) the failure within twenty-one (21) days to grant or deny a petition for reconsideration from this preliminary order, any party may in writing support or take exceptions to any part of a preliminary order and may file briefs in support of the party's position on any issue in the proceeding with the Director. Otherwise, this preliminary order will become a final order of the agency.

REQUEST FOR HEARING

Unless a right to a hearing before the department or the Idaho Water Resource Board (Board) is otherwise provided by statute, any person aggrieved by any final decision, determination, order or action of the Director of the department and who has not previously been afforded an opportunity for a hearing on the matter may request a hearing pursuant to section 42-1701A(3), Idaho Code. A written petition contesting the action of the Director and requesting a hearing shall be filed within fifteen (15) days after receipt of the denial or conditional approval.

ORAL ARGUMENT

If the Director grants a petition to review the preliminary order, the Director shall allow all parties an opportunity to file briefs in support of or taking exceptions to the preliminary order and may schedule oral argument in the matter before issuing a final order. If oral arguments are to be heard, the Director will within a reasonable time period notify each party of the place, date and hour for the argument of the case. Unless the Director orders otherwise, all oral arguments will be heard in Boise, Idaho.

CERTIFICATE OF SERVICE

All exceptions, briefs, requests for oral argument and any other matters filed with the Director in connection with the preliminary order shall be served on all other parties to the proceedings in accordance with IDAPA Rules 37.01.01302 and 37.01.01303 (Rules of Procedure 302 and 303).

MICROFILMED

MAY 0 9 2001

FINAL ORDER

The Director will issue a final order within fifty-six (56) days of receipt of the written briefs, oral argument or response to briefs, whichever is later, unless waived by the parties or for good cause shown. The Director may remand the matter for further evidentiary hearings if further factual development of the record is necessary before issuing a final order. The department will serve a copy of the final order on all parties of record.

Section 67-5246(5), Idaho Code, provides as follows:

> Unless a different date is stated in a final order, the order is effective fourteen (14) days after its issuance if a party has not filed a petition for reconsideration. If a party has filed a petition for reconsideration with the agency head, the final order becomes effective when:
>
> (a) the petition for reconsideration is disposed of; or
> (b) the petition is deemed denied because the agency head did not dispose of the petition within twenty-one (21) days.

APPEAL OF FINAL ORDER TO DISTRICT COURT

Pursuant to sections 67-5270 and 67-5272, Idaho Code, if this preliminary order becomes final, any party aggrieved by the final order or orders previously issued in this case may appeal the final order and all previously issued orders in this case to district court by filing a petition in the district court of the county in which:

i. A hearing was held,
ii. The final agency action was taken,
iii. The party seeking review of the order resides, or
iv. The real property or personal property that was the subject of the agency action is located.

The appeal must be filed within twenty-eight (28) days of this preliminary order becoming final. See section 67-5273, Idaho Code. The filing of an appeal to district court does not itself stay the effectiveness or enforcement of the order under appeal.

Remarks:

1. General — WATER WAS USED PRIOR TO THE ORIGINAL APPLIC. FOR PERMIT BY THE PREDECESSORS TO THE SUBLETT IRRIGATION CO. THE APPLIC. WAS FILED IN 1909 HOWEVER DUE TO NOT FULLY COMPLETING THE PAPER WORK THE LICENCE WHEN ISSUED WAS GIVEN A PRIORITY OF 5/2/1930. THE LICENSE WHEN ISSUED DID NOT CORRECTLY DESCRIBE THE ACRES IRRIGATED UNDER THE SYSTEM. THIS CLAIM CORRECTS THE LEGAL DECRIPTION OF THE ACRES IRRIGATED AND THE PRIORITY IS BASED ON WHEN THE WATER WAS FIRST USED RATHER THAN THE PRIORITY OF THE LICENSE.
THE LANDS IRRIGATED ARE OWNED BY THE VARIOUS SHAREHOLDERS IN THE IRRIGATION CO.

TO: Application for Permit 43-07072 in name of Sublett Irrigation Company

SUBJECT: Field Exam Completion and Recommendation

The field review for licensing of this permit was coordinated with allocation (Mel Schulte) and adjudication (Jeanie Robertson). Note that an SRBA claim has been filed on this permit. A review of the other water rights and adjudication records associated with the Sublett Irrigation Company is as follows:

****

There is merit found for the SRBA claims filed by the Sublett Irrigation Company and likely will be recommended very similar to the way they were claimed. In the review it has been found that the present system provides irrigation water to a total of 2426 acres as listed by Mel in his land list and evidenced by the aerial maps. We measured the reasonable capacity of the natural flow that is normally diverted for irrigation and found that the capacity of the system is 43.92 cfs (See 6/20/95 memo). The documented total storage capacity of Sublett reservoir is 2742 AF (See Sublett Dam Summary Table from Dam Safety). All rights including this proposed license when combined should be limited to no more than:

43.92 cfs for natural flow irrigation
2742 AF storage capacity for Sublett Reservoir
2426 acres irrigated.

The applicant has filed an amendment but it has never been processed. This should be modified or used as the licensing amendment.

We discussed the matter of amending the various SRBA claims to place the claimed acres into a PPU of 2426 acres for all claims. They considered this but at this time wish to preserve the various classes of priority on the lands as they were developed.

Subj: DISCHARGE MEASUREMENT FROM SUBLETT DAM

THIS DAY COREY AND I INSPECTED SUBLETT DAM. AT THE TIME OF THE INSPECTION THE RESERVOIR LEVEL WAS JUST A FEW INCHES FROM THE CREST OF THE SPILLWAY. DURING THE INSPECTION THE OWNERS OPENED THE GATE TO DEMONSTRATE THE MAXIMUM RESONABLE DIVERSION THRU THE DAM. WE MEASURED THE FLOW AT THE PARSHALL FLUME APPROX. 3/8 MILE BELOW THE DAM.

THE PARSHALL FLUME IS FABRICATED FROM SHEET METAL WITH STANDARD DIMENSIONS. THE THROAT DESIGN WAS 3.00 FEET BUT THE TOP MEASURED 2.98 FEET. AT THE INITIAL FLOW WITH THE GATE FULLY OPEN AT THE DAM THE FLOWS OVERTOPPED THE FLUME WITH SOME FLOW GOING AROUND THE FLUME. THE FLUME'S UPSTREAM GAGE AT THE TOP OF THE FLUME READS 2.50 FEET. THEY THEN REDUCED THE FLOW WHERE THE FLUME CONTAINED THE ENTIRE FLOW OF THE CREEK AND THE GAGE WAS AT 2.30 FEET. BY USING THE EQUATION (17) FOUND ON PAGE 66 OF THE BUREAU OF RECLAMATION WATER MEASUREMENT MANUAL IT IS CALCULATE THE DISCHARGE TO BE 43.92 CFS.

NARRATIVE, REMARKS, COMMENTS
SUBLETT IRRIGATION CO.
PERMIT 43-07072

The diversion system consists of Sublett Creek , Sublett Reservoir, Sublett Creek below the reservoir, two diversion structures in the creek, two main delivery ditches and a series of small ditches, ponds and pumps located on the property of the Sublett Irrigation Co shareholders.

Sublett Creek flows into Sublett Reservoir and is licensed for 2300 acre feet. A headgate releases water back into Sublett Creek to be used downstream for irrigation. About one/fourth mile below the dam an in stream 3' Parshall flume is used as a measuring device. The flume's gage registered 2.16' at the time of the exam which convert's to a 40.08 cfs flow. About one mile below the flume an in stream structure diverts all of the creek water to two ditches that parallel the Sublett Creek valley, one on the North side and the other on the South. The two gages at the ditches registered 1.16' and 1.0'.

From the two main ditches a series of small ditches and or ponds with pumps are used by the irrigation company shareholders to apply the water by gravity or sprinklers to the places of use. The live flow and storage water used within the diversion system is used within the land owned by the shareholders of the irrigation company. If water is not beneficially applied it is stored for later use.

The annual volume recommended for this permit of 6473.2 AFA when combined with an assumed annual volume for right 43-02036 of 3440 AFA and the AFA for the storage right 43-02584 exceeds 4 AFA. This right should be conditioned accordingly.

The final land list developed for this report was in cooperation with the principals of Sublett Irrigation Co. and the adjudication staff. Corresponding adjudication claims will be amended to utilize a PPU for the same land list used in this report.

Dee Rassmussen, President
Sublett Irrigation Co
HC 61 Box 1128
Malta, ID 83342

Dear Dee:

As we discussed in my office last Wednesday, 4/17/96, the idea that shareholders can move water around or change the place of use without first filing a transfer with the department is not correct. The Sublett Irrigation Company presently has water rights with an identified place of use and the water must be used on the lands identified under these rights. Please reference §42-219 (Issuance of license), §42-220 (Effect of License) and §42-108 and §42-222 (Transfer statutes).

As we discussed there is basis in law to allow certain entities such as large irrigation companies or districts which supply water to more than 25,000 acres or which are Carey Act developments to move water around internally without filing a transfer with the department. Please reference §42-219 and §42-2501 which discusses this matter. It does not appear that the Sublett Irrigation Company qualifies unless the company's rights are transferred into a permissible place of use.

Please find enclosed copies of the statutes referenced above. If you have further questions let me know.

Sincerely,

Allen Merritt, PE
Southern Region Manager

SUBJECT: NEW CLAIM

phone call (.) walk-in (X)

They filed this new claim to pick up the additional 11.47 cfs which were previously unclaimed yet measured by Corey and Allen in 1995, and the extra 200 afa of storage in the reservoir which were not covered in their other rights. A late fee was not assessed as the department initiated the claim and they had filed all their other claims in a timely manner.

At this point there is some opposition from company members as far as establishing a PPU for this Permit, but the Board intends to present the idea to the other members again. In the meantime, the department will process this permit without a PPU at this time.

RE: ACRES IRRIGATED

DATE 3-30-93

NAME OF PARTY

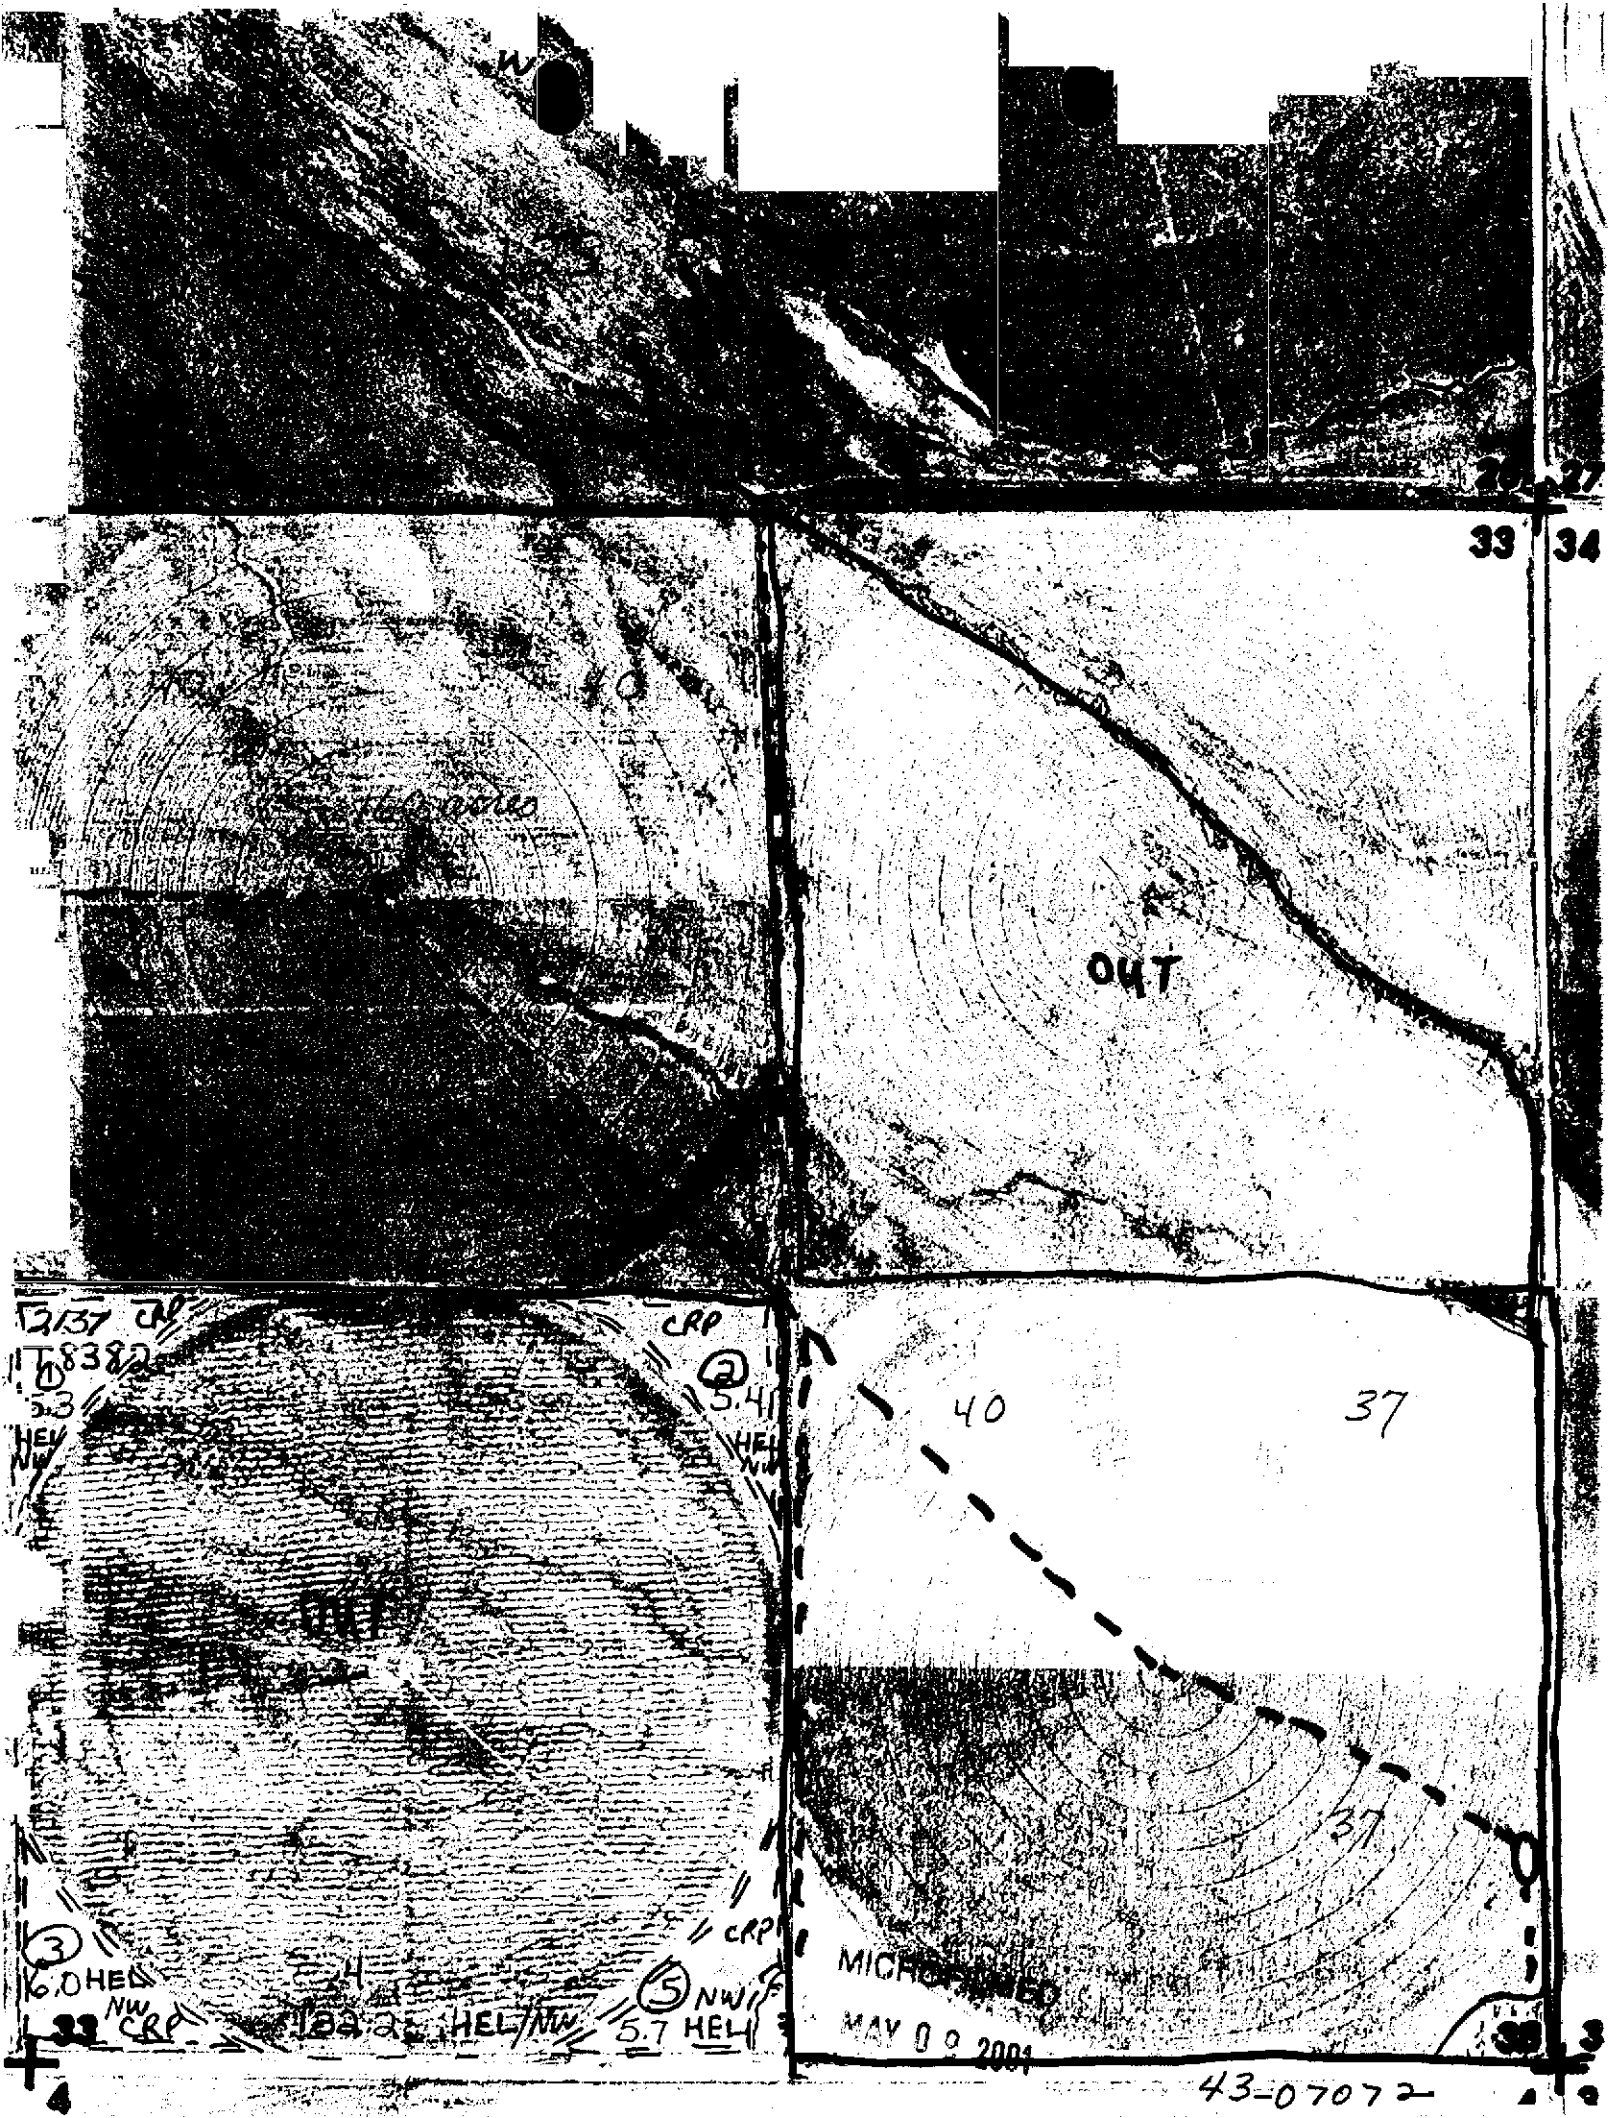

ORSON & ROLAND ZOLLINGER

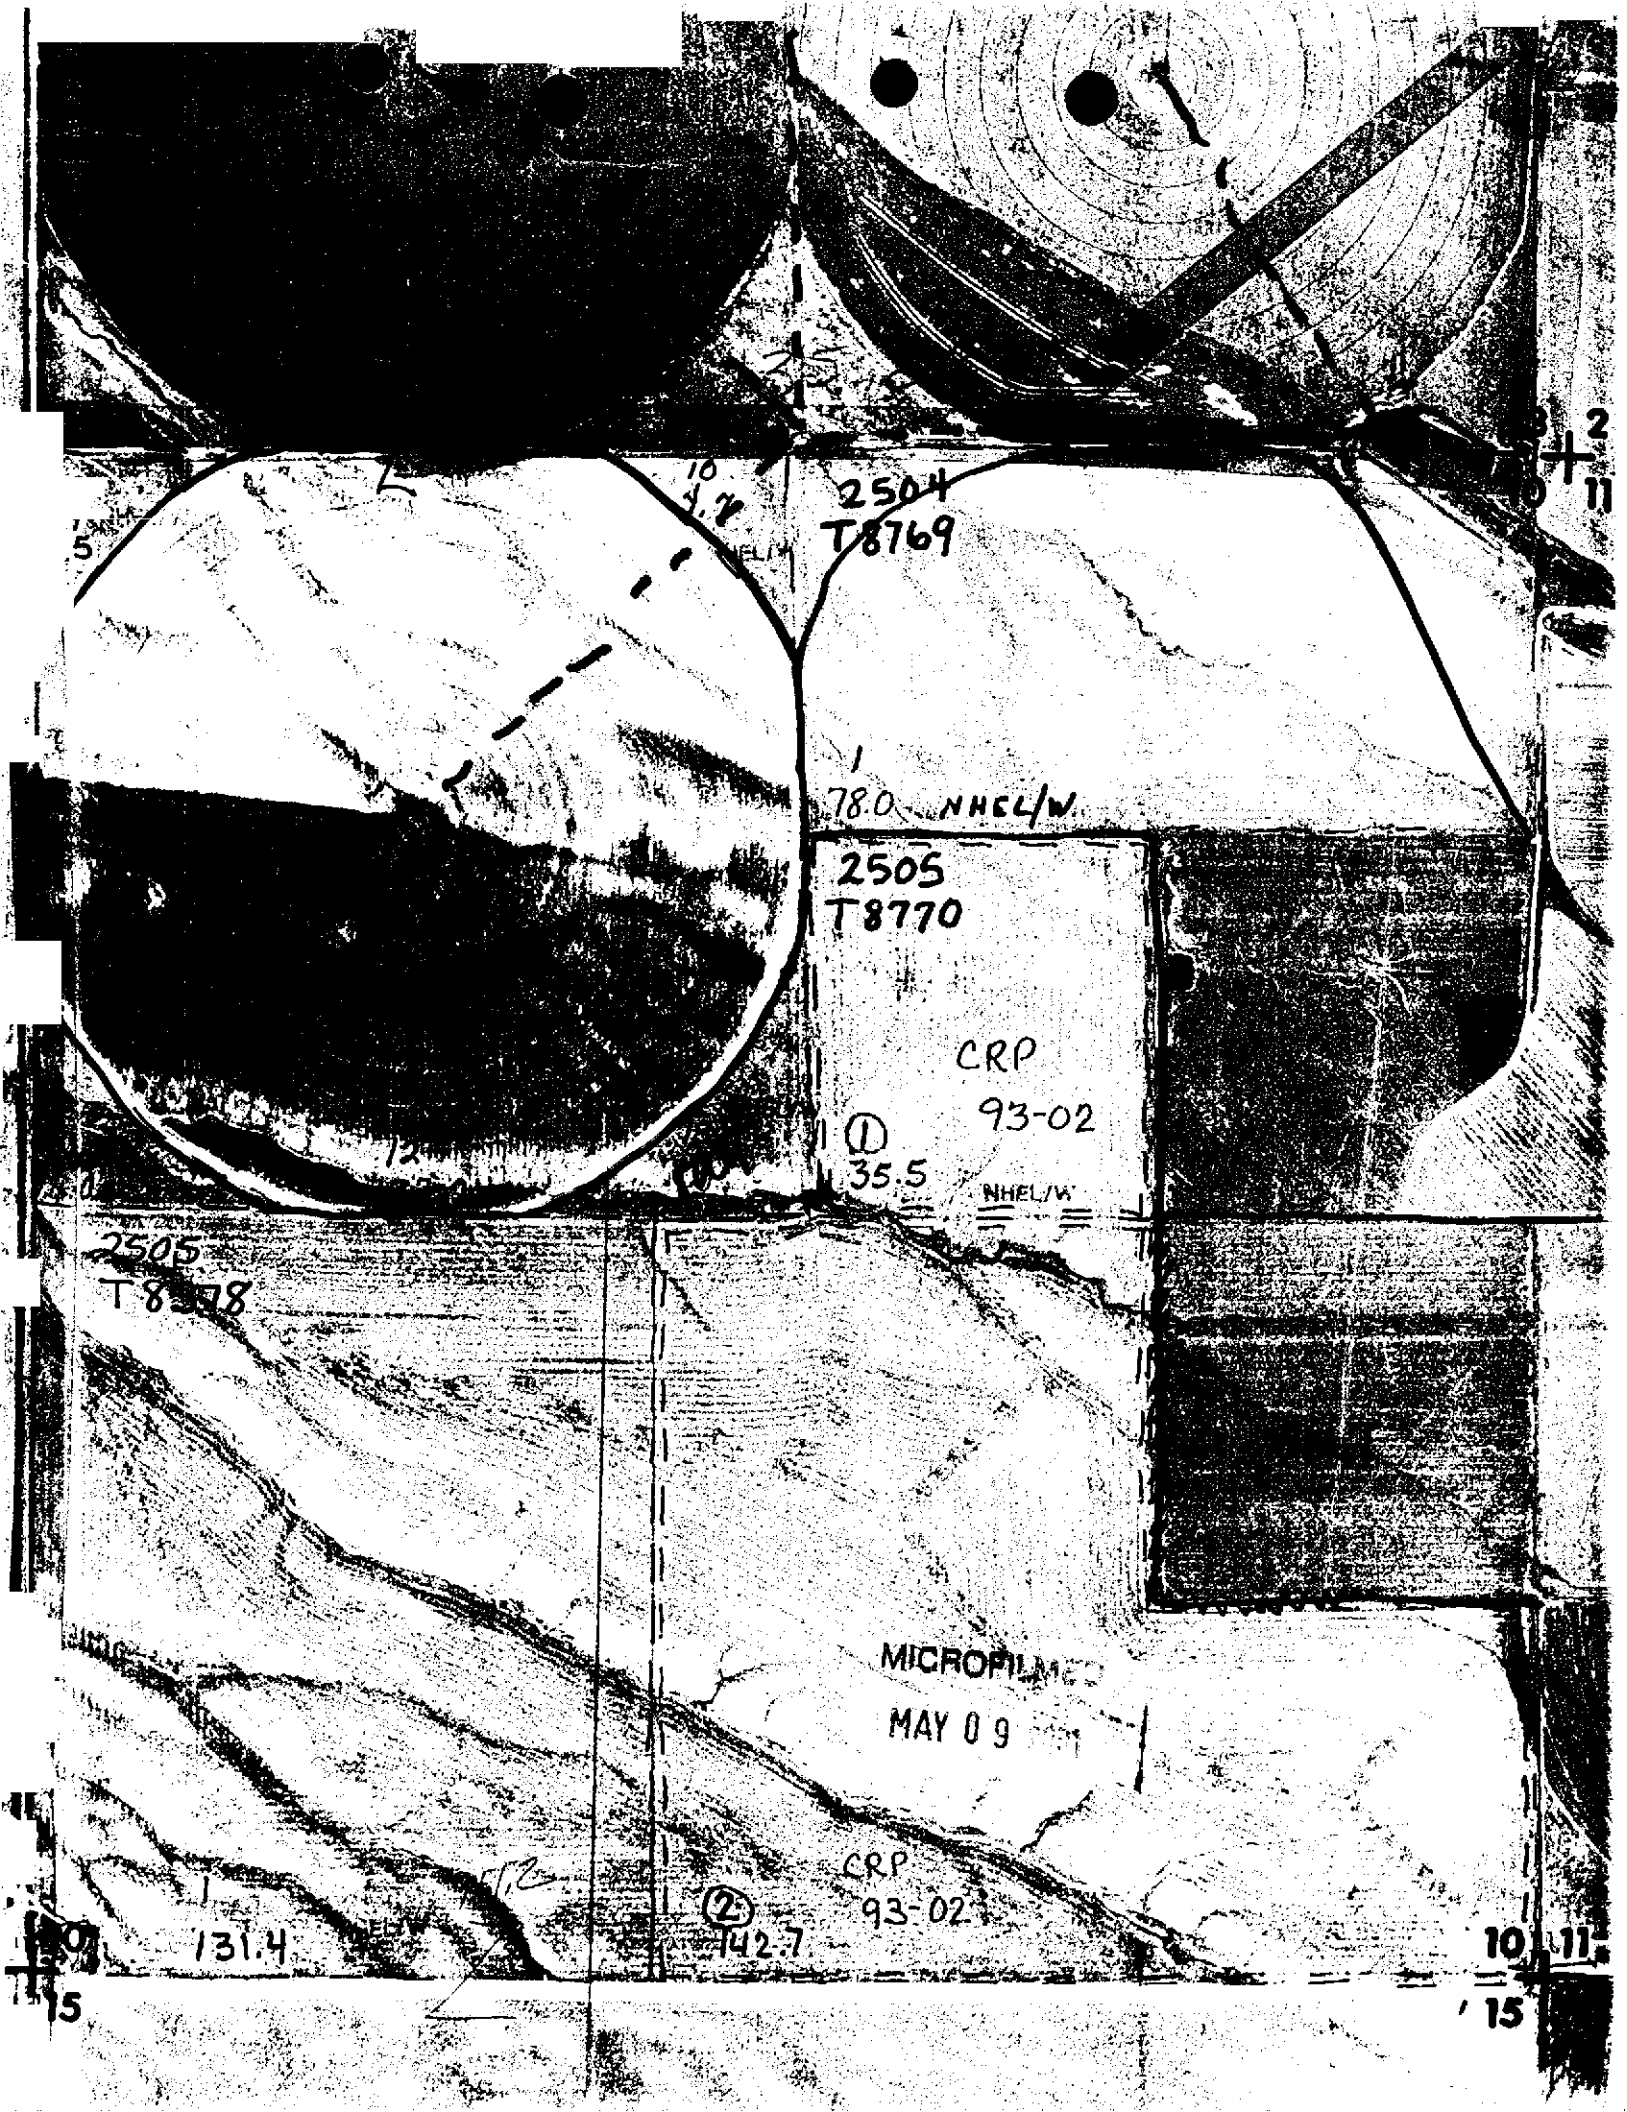

They came into the office to get a copy of the Application for permit and it was provided to them.

Their concern is in the number of acres being licensed and recommended in the SRBA claim.

They are going to contact the Sublett Irrigation Dist. to clarify the Company's position of what is irrigated.

Threaded outlet can be furnished in place of weir gage at no extra cost.

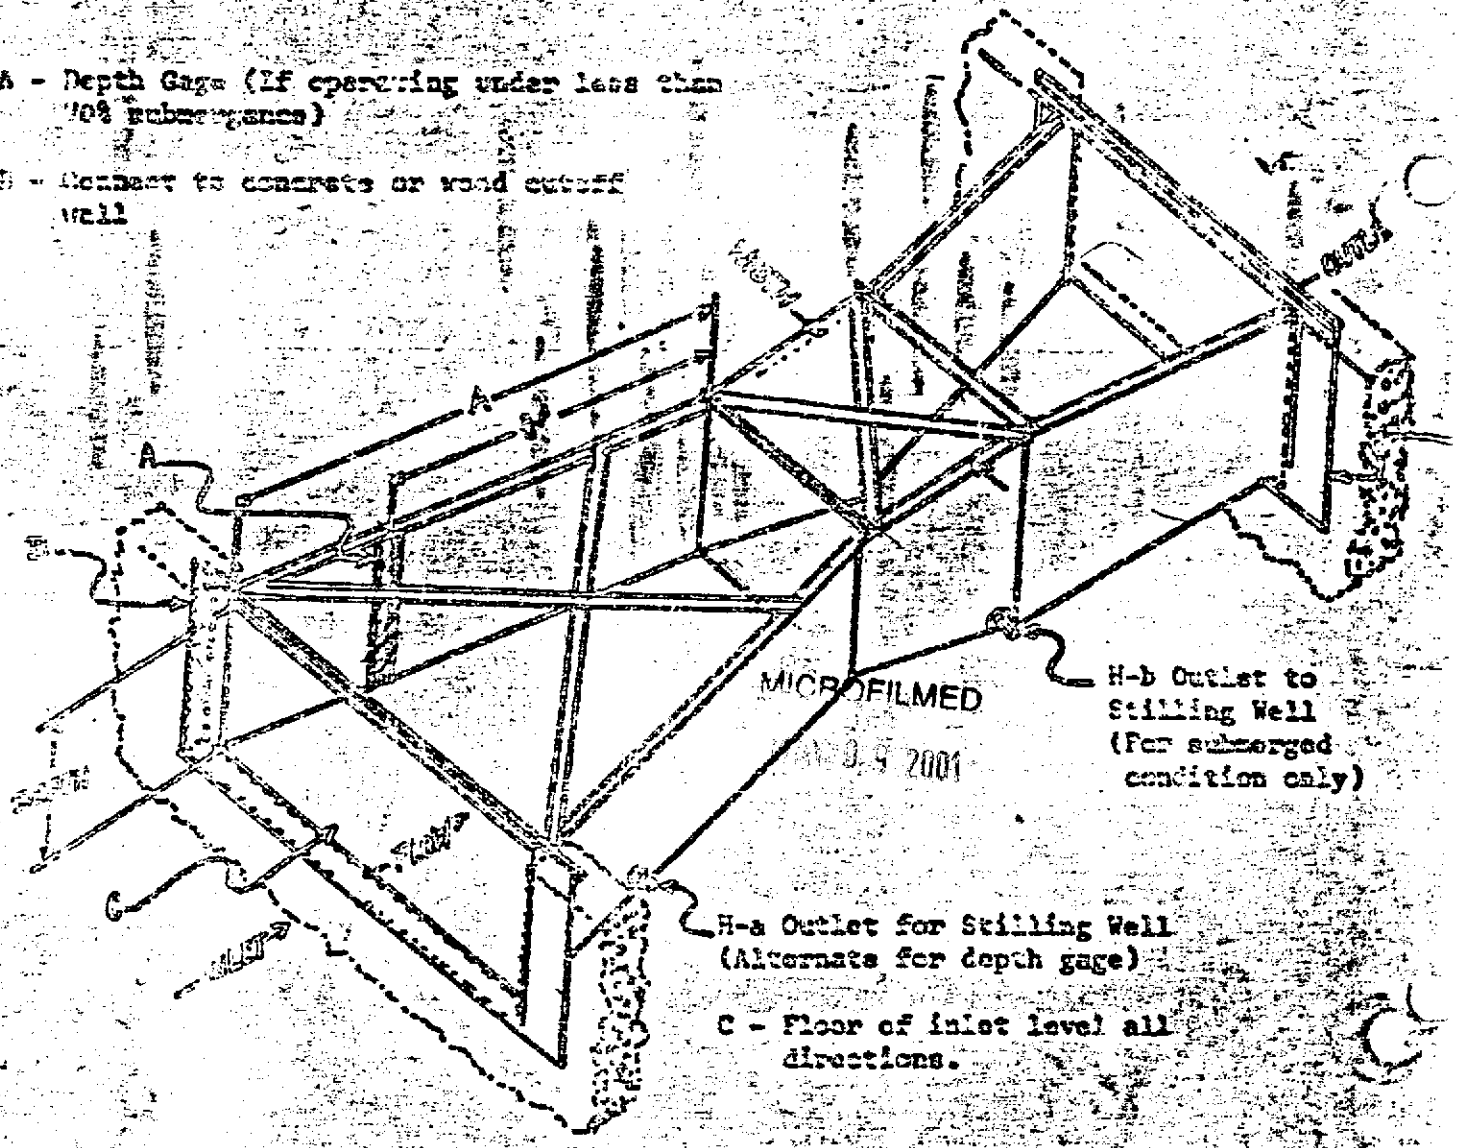

Stilling wells can be furnished for submerged flow conditions. Contact Region Office for prices.

All flumes are fabricated of hot rolled steel and are of welded construction. They are normally given one shop coat of coal tar paint (cold applied) after fabrication. If other coatings are desired secure price and delivery from Region Office. We DO NOT recommend hot dip galvanizing after fabrication.

Sizes shown on price list are standard sizes. Other sizes are available for welded construction only. Secure price and delivery from Region Office.

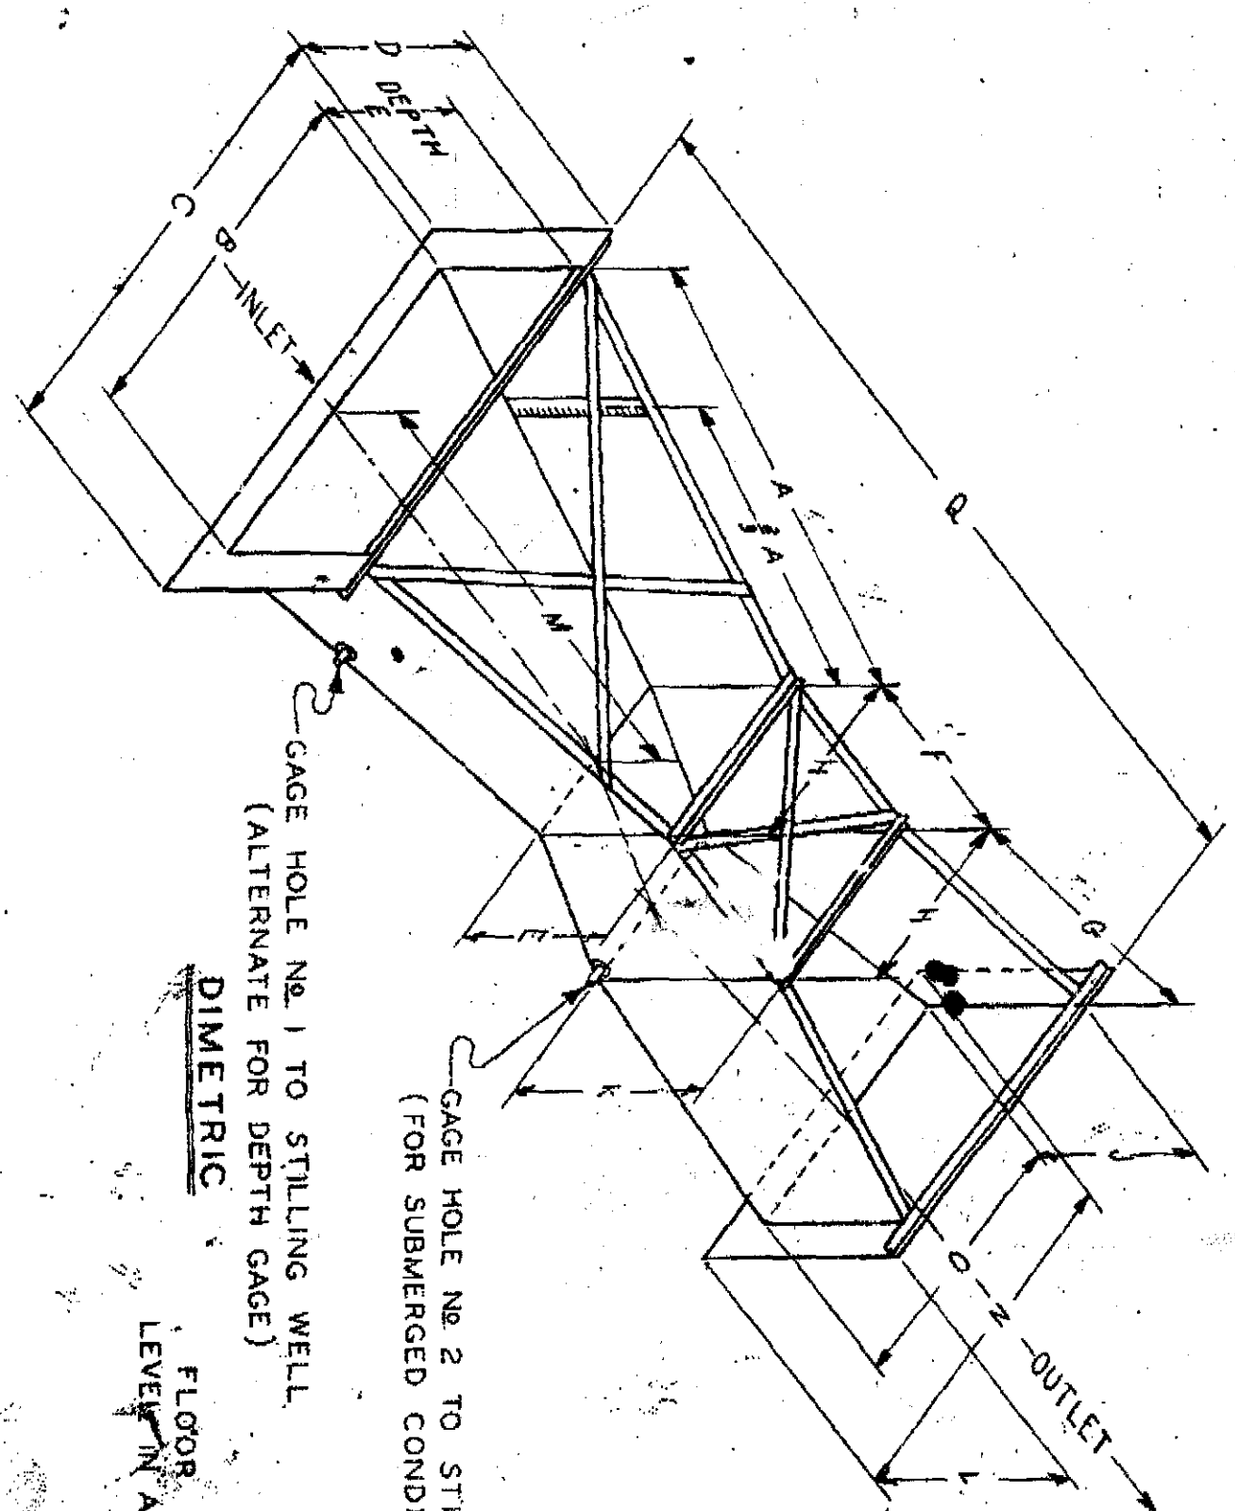

A - Depth Gage (If operating under less than 70% submergence)

B - Connect to concrete or wood cutoff wall

C - Floor of inlet level all directions.

Re: Application for Amendment, 43-07077

Dear Mr. Rasmussen:

The Department of Water Resources acknowledges receipt of your application for amendment of a permit.

This office will be advertising the application in the South Idaho Press on 6/1 & 6/8/89. A period of ten days following the second publication will be allowed for the submittal of protests.

If the application is protested you will be sent a copy of the protest. The protest must be resolved before the application is approved or denied. If the protest is not resolved voluntarily, this Department will conduct a conference and/or hearing on the matter.

If the application is not protested, it will be forwarded to our State Office in about five weeks. State office personnel will conduct a complete review prior to final processing of the application and will notify you of the outcome of this review. A typical processing time for an unprotested application is about eight weeks.

Please feel free to contact this office if you have any questions regarding this procedure.

Very truly yours,

Douglas Jones, E. I. T.
Water Resources Engineer

PROOF DUE NOTICE

RE: PERMIT NO. 43-07072

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before May 1, 1989. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully compeleted your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

Rita Fleck
Secretary/Records Manager

SEPTEMBER 1, 1985

DEAR PERMIT HOLDER:

ACCORDING TO OUR RECORDS, YOU ARE THE HOLDER OF A WATER PERMIT ON WHICH PROOF OF BENEFICIAL USE OF WATER WAS NOT SUBMITTED BEFORE JULY 1, 1985, WHICH INDICATES YOUR PROJECT IS NOT COMPLETE. THEREFORE, YOU NEED TO BE AWARE OF CHANGES IN IDAHO LAW, EFFECTIVE JULY 1, 1985, WHICH IMPACT ALL WATER PERMITS ISSUED BY THIS DEPARTMENT.

SPECIFICALLY, PURSUANT TO SECTION 42-203D, IDAHO CODE, THE DEPARTMENT MUST REVIEW ALL PERMITS FOR WHICH DEVELOPMENT OF WATER USE WAS NO COMPLETED ON OR BEFORE JULY 1, 1985, TO DETERMINE IF THEY MEET THE NEW REQUIREMENTS OF CHAPTER 2, TITLE 42, IDAHO CODE. RULES AND REGULATIONS GOVERNING THE RE-EVALUATION OF PERMITS ARE NOT YET FINALIZED. HOWEVER, IF YOU COMPLETED THE DEVELOPMENT UNDER YOUR PERMIT BEFORE JULY 1, 1985, YOU SHOULD SUBMIT A PROOF OF BENEFICIAL USE STATEMENT, STATING THAT THE PROJECT WAS COMPLETED BEFORE JULY 1, 1985 SO THAT YOUR PERMIT WILL NOT BE SUBJECT TO THE REVIEW REQUIREMENTS OF SECTION 42-203D, WHICH READS AS FOLLOWS:

> 42-203D. REVIEW OF PERMITS - OPPORTUNITY FOR HEARING. - (1)THE DEPARTMENT SHALL REVIEW ALL PERMITS ISSUED PRIOR TO THE EFFECTIVE DATE [JULY 1, 1985] OF THIS SECTION, EXCEPT TO THE EXTENT A PERMIT HAS BEEN PUT TO BENEFICIAL USE PRIOR TO JULY 1, 1985, TO DETERMINE WHETHER THEY COMPLY WITH THE PROVISIONS OF CHAPTER 2, TITLE 42, IDAHO CODE. IF THE DEPARTMENT FINDS THAT THE PROPOSED USE DOES NOT SATISFY THE CRITERIA OF CHAPTER 2, TITLE 42, IDAHO CODE, THEN THE DEPARTMENT SHALL EITHER CANCEL THE PERMIT OR IMPOSE THE CONDITIONS REQUIRED TO BRING THE PERMIT INTO COMPLIANCE WITH CHAPTER 2, TITLE 42, IDAHO CODE. IF THE DEPARTMENT FINDS THAT THE PERMIT SATISFIES THE CRITERIA ESTABLISHED IN CHAPTER 2, TITLE 42, IDAHO CODE, THEN THE DEPARTMENT SHALL ENTER AN ORDER CONTINUING THE PERMIT.
> (2)THE DEPARTMENT SHALL PROVIDE AN OPPORTUNITY FOR HEARING IN ACCORDANCE WITH SECTION 42-1701A, IDAHO CODE, AND SECTIONS 67-5209 THROUGH 67-5215, IDAHO CODE, FOR EACH HOLDER OF A PERMIT THAT IS PROPOSED EITHER TO BE CANCELLED OR MADE SUBJECT TO NEW CONDITIONS.

YOU MAY OBTAIN PROOF OF BENEFICIAL USE FORMS FROM THE DEPARTMENT. IF YOU HAVE ANY QUESTIONS, PLEASE LET US KNOW.

Gentlemen:

Re: Permit No. 43-7072

Enclosed is a copy of the approved request for extension of time. The time within which to submit the statement of beneficial use postcard is extended to May 1, 1989.

In connection with the development of a water right under this permit, the Department wishes to call to your attention an Idaho Supreme Court decision issued in November 1982 which likely could affect your future use of water.

The decision in the case of Idaho Power Company vs the State of Idaho, et al stated in part that Idaho Power Company's use of water for power generation purposes at the Swan Falls dam on the Snake River is not subordinated to upstream depletion by later-in-time uses. The question of whether Idaho Power's 8,400 cfs water right at Swan Falls dam has been diminished by subsequent development, however, was remanded back to district court for determination. The findings of the district court could restrict water availability or require compensation to Idaho Power Company for uses developed later in time than Idaho Power Company's water right at Swan Falls dam.

SUBJECT Availabe Flow in Sublett Cr.

I discussed this w/ Gary F. which/ alongs with Mike Steele had held a meeting with the applicant and the Sublett Irrigation District Ditch rider. The ditch rider had written records of water flow measurements taken during the last 10 to 15 years. Measurements made above Sublett Reservoir showed that maximum flows were about 30-35 cfs. The amended application reflects the amount determined to be available (at times) above the existing water rights existing on Sublett Cr. (122 cfs)

- Do we have any info on flow available. i.e. is there natural flow avail in excess of the 17.2 already licensed? Or does this app propose the use of part of the 17.2 & diff. land?

- The reason I raise the question is that this was the original problem w/ the app for 56.98 cfs & I'm not sure the question has yet been answered.

Re: Application for Permit No. 43-7072

Dear Mr. Rigby:

In a recent updating of Department files and records, I discovered the above referenced application which was filed on April 4, 1977, and upon which Department action is not complete.

~~A review of~~ the application ~~which~~ was filed to appropriate 56.98 cfs of the waters of Sublett Creek when considered together with licensed rights 43-2036 for 17.2 cfs and 43-2584 for the storage of 2300 AF, raises several questions related to water availability. I assume the 56.98 cfs is proposed to be diverted from the natural flow in addition to the existing right of 17.2 cfs of the natural flow. The question I would like to have you address, is how much natural flow has been measured in the creeks above the existing reservoir. You may have records of historic flows measured into the reservoir and, if so, the records would be most useful to this Department in determining final action on the application.

Thank you for your assistance in this matter.

If you have questions, please contact me.

MEMORADUM

FROM: Michael L. Steele DATE: October 28, 1977

TO: File

SUBJECT: Application for Permit No. 43-7072 - Sublett Irrigation Company

Since 1972, it has been noted that above normal spillage of water has occurred from Sublett Reservoir. It has also been noted that the additional water was causing reservoir operation problems. An investigation ensued by the reservoir company which indicated a series of small earthquakes in the area had increased spring flows in the Sublett drainage which supply water to Sublett Reservoir. The springs were observed by the reservoir district in an effort to determine if the flows would remain stable. It was determined by the reservoir district the springs have remained stable and the flows have resulted in additional water being available for irrigation use.
Water efficiency in the Sublett Irrigation system has also been improved by upgrading irrigation practices; the practices include sprinkler systems and the use of gated pipe. The lands added to the Sublett Irrigation Company would receive water from the increased spring flow and water conservation practices.

All water in the Sublett Irrigation Company system is used for irrigation and stock water. All water in Sublett ~~Irrigation~~ Creek is used by the Sublett Irrigation Company. Due to the location of the springs which in some areas originate in the reservoir, it is very difficult to quantify the amount of water produced from the springs; Also, no prior records exist on the average spring flows.

In approximately 1907, a water license was issued to the Sublett Irrigation Company. In reviewing this license it was obvious that the examiner had incorrectly identified some of the lands that were under production. However, due to the field notes, it was impossible to clarify which lands were in error. This water application was filed in an attempt to clarify the actual acres under production within the reservoir company district. This application is an attempt to correctly cover all lands that were originally irrigated in 1907, and new lands which are under development at this time.

It appears there is sufficient new water from the increased spring flow and water conservation practices to cover the additional lands which will be put into production under this application. My recommendation is to approve this application.

NOTE: It is my understanding that irrigation districts of a total acreage of under 10,000 are not required to record with the State the boundaries of the reservoir district.

RE: Application for Permit #43-7072-Sublett Irrigation Co.

Gentlemen:

Enclosed you will find a legal notice which we wish to have published once a week for two consecutive weekly issues of your newspaper. We have inserted the publication dates allowing ample time for you to submit us a galley proof for review before publication.

After sending us a galley proof, proceed with the publication on the dates we have inserted, assuming the notice is correct. If we have any corrections, we will notify you before the first publication. If you cannot publish the notice on the proposed dates, please contact us immediately.

In order to receive payment, an affidavit of publication must be submitted to the Department along with the publication bill.

Sincerely,

Michael L. Steele
Southern Region Supervisor
