CLAIM TO A WATER RIGHT

Department of Water Resources
Southern District Office

Under the provisions of Section 42-225a, Idaho Code, a person may file a claim to a right to use water which has been established by diversion and application to beneficial use. The filing of this claim does not confirm the water right but will serve for information purposes only. It may, however, become the basis for future adjudication of the water right by the Court.

Notice is hereby given that Harold Olen and Lorrayne Ward
(name of claimant)
of 7209 Kingston Drive., Boise, Idaho 83704, claims a right to the diversion and beneficial use of
(mailing address)
the public water of the State of Idaho

The extent and nature of said claim is as follows:

(1) Describe source of water: (name of stream, lake, spring, etc., or ground water) a ground water source
_____, tributary to _____

(2) Describe the purpose for which the water has been used and the time during the year when you have used the right claimed:

Amount <u>2.9 cfs</u>	Use <u>irrigation</u>	Period of Use: From <u>Mar. 15</u> To <u>Nov. 15</u>
Amount _____	Use _____	Period of Use: From _____ To _____
Amount _____	Use _____	Period of Use: From _____ To _____
(cfs, gpm or a/f)	(dom., irri., stock, etc.)	(both dates inclusive)

(3) Total quantity of water claimed: 2.9 cfs cubic feet per second, or _____ acre feet per annum, and/or _____ gallons per minute.

(4) Priority claimed: (the date water was first applied to beneficial use) July 1, 1950

A claim is not acceptable on a ground-water source with a priority later than March 25, 1963 or on a surface-water source with a priority later than May 20, 1971. An exception to this rule is that a claim may be filed on domestic use from a ground-water source.

(5) A) Point of diversion: (give location of point where water is diverted from its source) (WELL #2)
NE ¼ NE ¼, Sec. 12 Twp. 16S Rge. 24E B. M. County of Cassia
Additional points of diversion: _____

B) Describe means of diversion of water: (pump and pipeline, well, diversion dam, reservoir, length of ditch and field, etc.) Give sizes and capacities; be as specific as possible. A 16 inch diameter well, 150 feet deep with 50 foot column. It has a 50 HP motor.

(6) A) Describe location of use by listing number of irrigated acres within each 40-acre tract in appropriate box. If use is not for irrigation, place an "X" in appropriate box to show location.

T	R	SEC.	NE¼				NW¼				SW¼				SE¼				TOTAL

ATTACHMENT A

The diversion of water from this well noted as well #2 is supplemental in part to the claim to water right for water well #1 which has a priority date of March 15, 1948. Water appurtenant to land duplicated in the land lists for these two claims should be considered as supplemental to the claim having a priority date of March 15, 1948 and is, in fact, used only on that land when the water supply is less than one miners inch per acre from water well #1. Some of the lands listed on this claim to water right are not duplicated in the earlier claim and receive their total water supply from water well #2. Because of the modernization of the existing ranch irrigation system, it is now possible to transport water from either of the wells to any part of the ranch through mainlines and sprinkler systems. It is the intent of the applicant to, in the future, comingle the water from both wells to allow greater flexibility in the irrigation of the land. Such flexibility will result in lower energy demand and lower total water consumption. Prior to the comingling of water under these two rights, however, the appropriate application for transfer of water right will be filed in order to comply with state statute and regulation. Any additional water rights appurtenant to this ground with later priority dates should be considered as supplemental in nature and it is the intent of the applicant to divert only one miners inch per acre total diversion rate in compliance with Idaho statute.
