Re: Douglas Ward: License 43-2542, John Hedges: Permit 43-7104

Dear Mr. Whipple:

In August, 1988 you contacted this office regarding possible interference with a well owned by Mr. Ward under water license 43-2542 from a well owned by Mr. Hedges under permit 43-7104.

In researching the file, I find that permit 43-7104 lapsed on August 12, 1987, and is of no further force or effect.

- Any use of the Hedges well may be subject to action by the department under section 42-351 of the Idaho Code.

I am forwarding the information received from you to our state office for inclusion in file 43-2542.

If this office can be of any further assistance, please contact us.

Very Truly yours,

Loren O. Holmes, P. E.

RE: John Hedge, Permit No. 43-7104

Dear Mr. Holmes:

Please remember our telephone conversation of earlier this week in which I indicated that Douglas Ward, heir of Harold K. Ward, wishes to protest the use and development of John Hedge's well, as found in permit No. 43-7104.

It is my understanding that the Hedge's well has had very little use since its construction in 1982. Mr. Ward has indicated that in the last six years the well has only been operated for a couple of weeks altogether. It is now Mr. Ward's understanding that Mr. Hedge is attempting to sell his well, which greatly concerns Mr. Ward.

Therefore, we hereby request that the Department of Water Resources investigate the situation and see if the Hedge's well is, or would, interfere with the Ward well and if so, that appropriate action be taken to restrict the Hedge's well. I have enclosed photocopies of the Ward's water right, plus an outline prepared by Doug Ward as to the impact the Hedge's well has had on his well.

Your assistance is very much appreciated, if you need additional information, please contact me. I look forward to hearing from you.

Sincerely,

Douglas R. Whipple

John Hedges drilled a well in the north-west corner of his ranch. It was tested and the temperature of his well water and ours were the same. He let Bill Tracy use it sometime during the summer of 1982. Our well started surging during that time, and that was the first time it was known to surge. I contacted Bill and he shut off Hedges well. Ours quit surging shortly after, within 24 hours or so. Bill turned Hedges well back on, after two days within 24 hours ours was surging again. Bill turned Hedges well off and left it off.

The next year John Hedges built weirs by my pump so it could be measured. Zen Taylor who was the watermaster at that time measured 60 inches of water on September 18, 1983.

August 31, 1985

Buddy Ward who was the watermaster measured 63 inches and noted a steady stream from an eight inch discharge pipe, running a little under half full. Bill Tracy witnessed.

September 15, 1986

Buddy Ward, still watermaster measured 60 inches. Jerry Udy employed at Raft River Rural Electric also measured the well using their measuring device and measured 65 inches.

July 1988

Bill Tracy contacted me and told me to have my water measured as he was going to turn Hedges well back on. He also said he would like to witness this.

July 30, 1988

Buddy Ward measured 62 inches of water, and Bill witnessed.

August 2, 1988

Bill Tracy started Hedges well. That evening I took Boyd Richins out to my pump, we noted a steady stream from the discharge pipe. I measured the water, it measured the same as Buddys measurement. The next day Bill checked my pump and noted that it had started to surge.

August 3, 1988

Boyd, Bill, and I checked the well this evening and it was still surging. It still however measured the same amount of inches as it had before. Bill turned Hedges well off. My well continued to surge thru the week, but remained measuring the same.

August 7, 1988

The well measurement has dropped to 50 inches.

August 9, 1988

Today I could only measure 48 inches.

August 10, 1988

I talked to Bill in the Almo Store, and told him, and asked if he would like to see it measured. He agreed and came down to my pump thru Hedges feild. On his way he met John Hedges in the lower end of his field spraying thistles, and I suppose he told John what I was doing, but John must of not been interested in it as he did not come to watch.

I measured 50 inches of water and we noted that the well was still surging. I wrote this down and Bill and I both signed it. I turned my well off that day and left it off for two days.

August 12, 1988

I turned my pump back on this evening and it has quit surging, but it only measured 50 inches.

Aug 17, 1988

Doug Ward measured 62 inches

Dear Sir:

This is to advise that Farmers Home Administration has a real estate loan with Harold K. Ward of Almo, Idaho, who holds water Permit number G-30356 for the appropriation of underground waters dated January 19, 1962.

We are requesting that you make note on the file of Permit number G-30356 of this loan as he has agreed not to assign, transfer or make any other changes in the permit, said permit is a portion of the security pledged to Farmers Home Administration for this loan, which would be adverse to the interests of Farmers Home Administration without prior notice in writing for our consent to such changes.

If you will please sign the copy of this letter, which is enclosed, and return it to this office as acknowledgment of this request for our records.

Gentlemen:

Approximately six months ago we made proof for Harold K. Ward of
Almo, Idaho, upon a well located in

Section 25, Township 15 South, Range 24, E.B.M.
Cassia County, Idaho

Since that date we have not heard anything from your department.
Mr. Ward needs a statement showing that we have made the proof
in order to satisfy the organization he is borrowing money from.

Would you please give us the status of this well application?

Dear Mr. Ward:

The date for proofs of Completion of Works and Application of water to beneficial use, as set out under terms of Permit No. G- 30356 are due not later than **Jan. 19, 1967**

Before these proofs can be made, the statutory requirement is that a notice of your intention of proof be published once a week for four consecutive weeks in a newspaper within the county in which the land is located. In completing the Notice of proof for publication, the information should be taken from your Permit, including any amendments made in connection with a change of point of diversion or land list, which has been recorded in this department. If changes have been made and no amendments are on record, we advise you request a form for this purpose before your Notice is published.

We enclose Form 36, in duplicate, which is to be filled out and returned to this department at least FORTY (40) DAYS BEFORE THE MENTIONED DATE, (allowing for four weeks publication). Please give the name of the town, the address of the place where the depositions will be executed, and, the name of the notary public before whom you will appear to make the depositions of proof (this may be at any place convenient for you and your two witnesses), the quantity of water filed; for what purpose it is used; the point, or points, of diversion; and the location of use or the lands which are irrigated - - all by legal land description.

Enclosed also is Form 11, which is the authorization for us to have the notice published in the designated county newspaper at your expense. This is to be returned with two Forms 36.

At the time we send the notice to the newspaper we will send to you the forms for the depositions of holder and two disinterested witnesses. It is important that the depositions be executed at the time, on the date set, at the place named, and before the notary public, as advertised in the publication notice.

Very truly yours,

R. KEITH HIGGINSON
