Dear Mr. Roberts:

We have reviewed the assignments submitted in connection with the above referenced documents. After evaluating the assignments and the files, we find we are unable to accept this assignment you have submitted. The department does not have a procedure for recording an assignment in connection with a water license. We are sure that you can appreciate the problem in connection with the ownership of real property, which the water right license has the characteristics of being. We would need title insurance, or chain of title to assure that the water right was with the property. Therefore, it is an impractical matter to record assignments in connection with the license.

We also have been advised that although normally we could record the assignment in connection with a claim, that since the other water licenses are on the same document as the claim form, we are not able to accept it for the claim either. An assignment specifically on the Claim No. 43-4035, would be acceptable. We have conferred with Bob Baker, of Utah Mortgage and Loan, in Boise, in connection with this matter, and he stated that he would contact you.

If you have any questions in the matter, please contact us.
