Dear Mr. Skinner:

Gary B. Harper has notified Farm Credit Services regarding his pending application for transfer of water rights under Idaho Department of Water Resources Transfer # 69577. It is also our understanding that transfers and amendments of these rights needs consent from mortgage holders who have liens on the ground associated with the points of diversion and use. Farm Credit Services, who holds the underlying land under Mortgage under Transfer #69577, does not object and gives full consent to pursue the completion of the transfer of these water rights.

Please transfer this letter to the correct department or person working with Mr. Harper on this transfer. Should there be any additional questions or concerns, please give me a call.

Sincerely,

Robert E. Blakeslee

Subject: RE: Recommendation 43-13115, Gary Harper

43-13115 is a split of 43-10150A. Originally, 43-10150 was filed as an expansion claim with a 1985 priority date. It was later split to reflect the fact that some of the acres were developed pre 1962 (CGWMA designation) and so were a beneficial use right, while the rest were developed later as an expansion claim. BU rights can allow some additional volume and acres. In this case the system capacities of the wells were fully licensed and thus the limitations on the diversion rate.

I have started to review Harper's latest app for transfer, and have a question about this right. As recommended, there is no additional cfs but there are additional volume and acres - is this correct? While 0.08 cfs is recommended, it is not added into the total flow for 13109, 13115 & 13117. While 13117 is stated to be an expansion claim, 13115 is not; so shouldn't the flow from 13115 add to the total for the system?
