My dear Sir:-

Your of the 16th ult. to Charles Yonk containing blanks of proof of completion of works and blanks of notice of proof of application of water to Benificial use, received. Mr. Yonk is unable to make or complete the affidavit required of proof of completion of diversion works as he did not keep a copy of the application for water permit he sent you. I have here enclosed a blank copy of permit, which please fill in from the original sent you, and we will then be able to make the necessary affidavit required. If we prepared our affidavit at present from the imperfect data we now have it might conflict with the application we sent you. You will readily see that a copy of the permit is necessary in order to fully make the said affidavit. I am sorry we did not keep a copy of the permit at the time the original was forwarded to you. Kindly advise me how many permits for water Mr. Yonk has received from your office to this land and the number of second feet.

Yours truly
John A. Sneddon

INSTRUCTIONS
PROOF OF COMPLETION OF WORKS

Charles Yonk,
Mendon, Utah

Boise, Idaho, April 1, 1914.

Dear Sir:

Under the terms of your permit No. 9948, you are required to complete your diversion works on or before July 20, 1914. I enclose herewith blank affidavit to be filled out, sworn to by you before a Notary Public or a Justice of the Peace, and returned to this office on or before the above date, or within ten days thereafter, for the purpose of making proof of completion under the permit. Upon receipt of this affidavit in this office, provided the same satisfactorily shows the completion of the works substantially in accordance with the terms of the permit, together with a fee of \$5.00, a Certificate of Completion will be issued to you.

The certificate to be issued under this proof will not give a perpetual right to the use of water for which application was made, as it only confirms the completion of works of a capacity to divert and convey to the place of intended use a certain amount of water. The law requires that another proof be submitted when the water has been fully applied to a beneficial use, at which time license is issued for the amount of water actually in use. Information in regard to this last proof will be furnished on request.

Yours truly,

F. P. KING,

State Engineer
