calculated system capacity is sufficient for service but less than application rate

Original system is licensed under # 41-4023

New well is primary water supply now. Other well is used mainly in summer to provide irrigation water to lands not reachable with Rock Creek water. Both wells run at full capacity in summer. Water not going directly to users runs into storage tank. Third well with 10 hp pump is not hooked up now, but could be used in emergencies. Fourth well has no pump, has not been used for 30 years or more. 8" mainline can't carry much more water - increase in users would require larger mainline.

RE: PERMIT NO. 41-07082

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

Enclosed is a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit. Also enclosed is a form entitled "Proof of Beneficial Use". If your project is already completed you should complete and submit this form immediately.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987.
